

In honor of
**Earth
Day...**

We are once again
partnering with
Evertreen to plant trees
to absorb CO2 from
the atmosphere.

Each Evertreen
project aims
to protect
and restore
forests on a
massive scale.

Our impact last year:

125
trees planted

Our impact last year:

18.75

tons of CO2 being absorbed

The trees that are
planted on our behalf
will create work for local
farming communities,
providing food and
income for people living
in extreme poverty.

Planting trees will help clean the air we breathe, filter the water we drink, and provide habitat to over 80 percent of the world's terrestrial biodiversity.
