

NORTH SQUARE

Tactical Growth Fund

TICKER Class I: ETFOX | Class A: ETFAX | Class C: ETFCX

INVESTMENT PHILOSOPHY

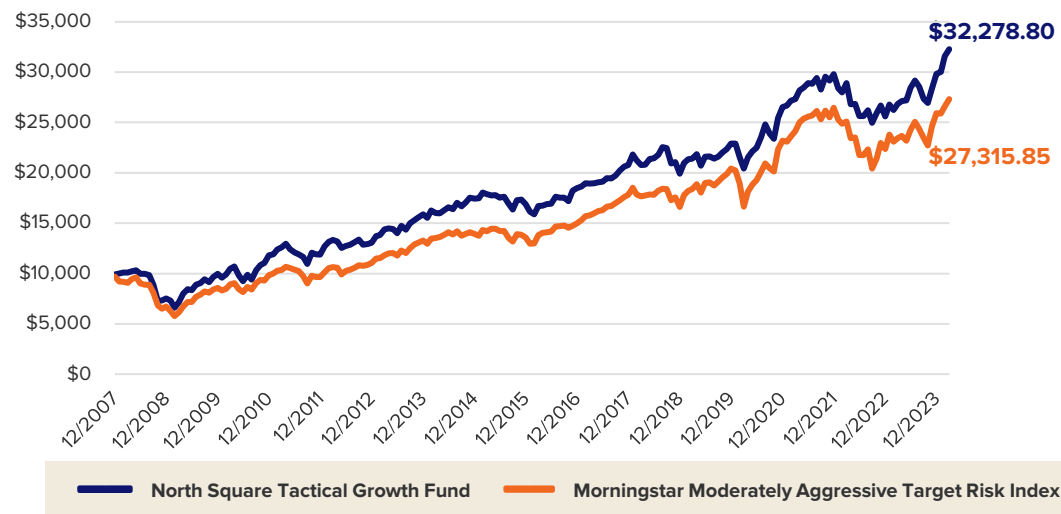

The Tactical Growth Fund is a Sharpe Ratio strategy that seeks long-term capital appreciation while mitigating market risk. A proprietary screening process is used to select ETFs and tactically allocate among domestic, international and non-correlated positions.

A RISK-ADJUSTED APPROACH TO SECURITY SELECTION:

RESEARCH	ANALYSIS	SELECTION
<p>Sharpe ratio research is conducted daily on almost 2,000 ETFs.</p> <p>Sharpe ratio, developed by Nobel Laureate William F. Sharpe, is an industry standard for measuring the risk-adjusted return of a portfolio.</p>	<p>Sharpe ratio is a tool to compare risk and return characteristics of different types of ETFs. We seek to identify ETFs with persistently high or growing Sharpe ratios.</p>	<p>As market conditions and Sharpe ratios change, the fund can reduce or increase equity exposure. A diversified portfolio of 4-15 ETFs is constructed accounting for market volatility and return potential.</p>

GROWTH OF A \$10,000 INVESTMENT VS. BENCHMARK OVER A FULL MARKET CYCLE:

(Previous market peak to present: 10/09/07 - 03/31/24)

For illustrative purposes only. The graph and performance table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemptions of fund shares. Past performance is not indicative of future results.

The Fund has adopted the historical performance of the Stadion Tactical Growth Fund, a former series of Stadion Investment Trust, as a result of a reorganization consummated after the close of business on June 11, 2021. Please see the Fund's prospectus for additional information.

Call 855-551-5521 or visit northsquareinvest.com for the most recent month-end performance results. Fund facts are as of 3/31/24 unless otherwise stated. Current performance may be lower or higher than the performance data quoted. The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

of 0 among 231 Tactical Allocation
peers (as of 3/31/24)**

0-25 - First Quartile

The Statistics presented are defined as follows:

Beta is a measure of systematic risk, or the sensitivity of a manager to movements in the benchmark. A beta of 1 implies that you can expect the movement of a manager's return series to match that of the benchmark used to measure beta.

Maximum Drawdown measures the largest percentage decline from a peak to a trough

Standard Deviation measures the average deviations of a return series from its mean, and is often used as a measure of risk.

Sharpe Ratio measures the excess return per unit of deviation, or risk.

Correlation is a measure of how investments move in relation to one another. A correlation of 1 means the two asset classes move exactly in line with each other, while a correlation of -1 means they move in the exact opposite direction.

The S&P 500 Index is the Standard & Poor's Composite Index of 500 stocks and is a widely recognized, unmanaged index of common stock prices. One cannot invest directly in an index. The Index is shown for comparative purposes only.

The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The Morningstar Moderately Aggressive Target Risk Index, the Fund's benchmark, seeks approximately 60% global equity exposure. One cannot invest directly in an index. The Index is shown for comparative purposes only.

The Morningstar Rating™ for funds, or "star rating", is calculated monthly for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Re-turn measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Ranking may reflect the waiver of all or a portion of the fund's fees. Without such waiver, the Rankings may have been lower. © 2024 Morningstar, Inc. All Rights Reserved. ***The "Fi360 Fiduciary Score®" is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. Each investment is evaluated against a set of factors and thresholds and allotted points. The points are totaled and compared to all other investments within the peer group. Investments with 0 points are automatically given an Fi360 Fiduciary Score® of 0. Every other investment is then given a Score of 1-100, representing their percent ranking based on its placement in the distribution of their peer group. An Fi360 Fiduciary Score® of 0 is most favorable. It represents that an investment meets or exceeds all of Broadridge Fi360 Solutions' recommended due diligence thresholds. A Score of 100 is least favorable. Visit www.fi360.com/fi360-Fiduciary-Score for the complete methodology document.
