CURRENT PORTFOLIO POSITIONING

The North Square Tactical Growth Fund spent the month of August nearly fully invested and no changes were made to the Fund's portfolio. Our domestic equity holdings total 80.8% and are balanced with growth, value, and broad market exposure. Our equity sector holdings of Healthcare and Financial services are performing well. Our international equity position is 5.1%

of the Fund and is in an ETF representing the total market of all EuroZone countries. We have two equal sized fixed income positions totaling 10% that are invested in ETFs that own U.S. Government treasury bonds. One is a 20+ year fund while the other owns 3-7 year maturities. Our cash position stood at 4.2% at month's end.

Principal Risks of Investing: Risk is inherent in all investing including an investment in the Fund. An investment in the Fund involves risk, including, the following principal risks, among others: Management and Strategy Risk, ETF and Mutual Funds Risk, Market Risk, Sector Focus Risk, Equity Risk, Growth-Oriented Investment Strategies Risk, Commodity Risk, Currency Risk, Foreign Investment Risk, Fixed Income Securities Risk, Interest Rate Risk, Credit Risk, Liquidity Risk, High Yield ("Junk") Bond Risk, Large-Cap Company Risk, Small Cap and Mid Cap Company Risk, and Government Sponsored Entities Risk. Summary descriptions of these and other principal risks of investing in the Fund are set forth in the Fund's prospectus. Before you decide whether to invest in the Fund, carefully consider these risks associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. Beta is a measure of systematic risk, or the sensitivity of a manager to movements in the benchmark. A beta of 1 implies that you can expect the movement of a manager's return series to match that of the benchmark used to measure beta.

The Sharpe Ratio was developed by Nobel laureate William F. Sharpe and is used to help investors understand the return of an investment compared to its risk. The ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

Correlation is a measure of how investments move in relation to one another. A correlation of 1 means the two asset classes move exactly in line with each other, while a correlation of -1 means they move in the exact opposite direction. A correlation of zero means that the returns are completely uncorrelated, or a "non-correlated" asset.
