

NORTH SQUARE ADVISORY RESEARCH

All Cap Value Fund

TICKER Class I: ADVGX

INVESTMENT APPROACH

Investment Objective: The investment objective of the North Square Advisory Research All Cap Value Fund (the “Fund”) is to seek long term capital appreciation.

INVESTMENT OVERVIEW

1 2 3 4

Idea Generation

Seek companies with:

- easily understood business models
- profitable operations
- solid financial positions
- attractive absolute valuations

Fundamental Analysis

- Differentiate our investment discipline through extensive fundamental analysis, a long-term perspective, and partnerships with effective management teams.

Portfolio Construction

- We position capital with what we believe are the best absolute value opportunities
- Risk is measured by the potential for permanent loss of capital; reward is measured by execution of company specific actions to unlock shareholder value.

Why?

- Experience and a long-term perspective
- Downside focus on risk to seek to avoid permanent loss of capital
- Upside potential by investing in companies with catalysts to unlock value

The Fund has adopted the historical performance of the Advisory Research All Cap Value Fund (the “Predecessor Fund”), a former series of Investment Managers Series Trust, as a result of a reorganization consummated after the close of business on February 21, 2020 (“Reorganization”), in which the Fund acquired all of the assets, subject to the liabilities, of the Predecessor Fund.

The Russell 3000 Value Index measures the performance of those Russell 3000 Index companies with lower price-to-book ratios and lower forecasted growth values.

Important Risks: Equity securities, such as common stocks, are subject to market, economic and business risks that may cause their prices to fluctuate. Investments made in small capitalization companies may be more volatile and less liquid due to limited resources or product lines and more sensitive to economic factors.

The Russell 3000 Value Index measures the performance of those Russell 3000 companies with lower price-to-book ratios and lower forecasted growth values. The volatility (beta) of an account may be greater or less than its respective benchmark. It is not possible to invest directly in an index.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus, a copy of which may be obtained by calling 855-551-5521. Please read the prospectus carefully before you invest. Price-to-Earnings Ratio is the price of a stock divided by its earnings per share. **Active share** is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.

The Morningstar Rating™ for funds, or "star rating", is calculated monthly for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Re-

turn measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Ranking may reflect the waiver of all or a portion of the fund's fees. Without such waiver, the Rankings may have been lower. © 2019 Morningstar, Inc. All Rights Reserved.
