The status of any capital gains distributed to shareholders (i.e., whether they are considered short-term or long-term) depends on how long the fund owned the securities that produced the gain – not how long the shareholder owned shares in the fund. Short-term capital gains: capital gains income from assets held for one year or less and generally taxed at the investor's ordinary income tax rates in effect for the year. Long-term capital gains: capital gain income from assets held longer than one year and generally taxed at a special long-term capital gains rate. North Square does not provide legal or tax advice. Shareholders should consult a legal or tax professional for additional information.
