Statement of Additional Information

NORTH SQUARE FUNDS

NORTH SQUARE STRATEGIC INCOME FUND

Class I: ADVNX

Class A: ADVAX

NORTH SQUARE SELECT SMALL CAP FUND

(formerly North Square Advisory Research Small Cap Value Fund)

Class I: ADVGX

NORTH SQUARE ALTRINSIC INTERNATIONAL EQUITY FUND

Class I: NSIVX

NORTH SQUARE MCKEE BOND FUND

Class R6: NMKBX

Class I: NMKYX

February 28, 2025

This Statement of Additional Information (“SAI”) is not a prospectus, and it should be read in conjunction with the prospectus of the North Square Strategic Income Fund, the North Square Select Small Cap Fund (formerly the North Square Advisory Research Small Cap Value Fund), the North Square Altrinsic International Equity Fund, and the North Square McKee Bond Fund (each, a “Fund,” and collectively, the “Funds”) dated February 28, 2025, as may be amended from time to time (the “Prospectus”). The Prospectus is hereby incorporated by reference, which means it is legally part of this document. North Square Investments, LLC (“North Square” or the “Adviser”) is the investment adviser to the Funds. A copy of the Funds’ Prospectus may be obtained on the Funds’ website, www.northsquareinvest.com, or by contacting the Funds at the address or telephone number specified below. Financial statements for the Funds for the fiscal year ended October 31, 2024, including the notes thereto, are included in the Form N-CSR filing, dated January 10, 2025, and are incorporated into this SAI by reference.

You may obtain a copy of the financial statements, and the Annual and Semi-Annual Reports to shareholders, at no charge on the Funds’ website, www.northsquareinvest.com, or by contacting the Funds at the address or telephone number specified below.

THE TRUST AND THE FUNDS

Each Fund is a series of Exchange Place Advisors Trust (formerly North Square Investments Trust) (the “Trust”). The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on August 2, 2018. The Trust currently consists of fifteen portfolios, four of which are contained in this SAI: the North Square Strategic Income Fund, the North Square Select Small Cap Fund (formerly the North Square Advisory Research Small Cap Value Fund), the North Square Altrinsic International Equity Fund and the North Square McKee Bond Fund (the “Funds”).

The Trust is registered with the Securities and Exchange Commission (the “SEC”) as an open-end management investment company. The Prospectus of the Funds and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee.

Each of the North Square Strategic Income Fund and the North Square Select Small Cap Fund are the successors in interest to certain funds having similar names and identical investment objectives and principal investment strategies that were series of another registered investment company, Investment Managers Series Trust (“IMST”), as follows (each, a “Predecessor Fund” and collectively, the “Predecessor Funds”):

- The North Square Strategic Income Fund is the successor to the Advisory Research Strategic Income Fund, a series of IMST.
- The North Square Select Small Cap Fund is the successor to the Advisory Research All Cap Value Fund, a series of IMST. The Fund changed its name from the North Square Advisory Research All Cap Value Fund to North Square Advisory Research Small Cap Value Fund on January 11, 2022. The Fund changed its name from the North Square Advisory Research Small Cap Value Fund to the North Square Select Small Cap Fund on February 27, 2025.

Each of the Predecessor Funds was advised by Advisory Research, Inc. (“ARI” or a “Sub-Adviser”). Shareholders of each of the Predecessor Funds approved the reorganization of the Predecessor Funds with and into corresponding series of the Trust, and effective as of the close of business on February 21, 2020, the assets and liabilities of each of the Predecessor Funds were transferred to the Trust in exchange for shares of each of the applicable Funds. Each Fund succeeded to the performance, financial and other historical information of those of the corresponding Predecessor Fund. Any historical information provided for a Fund that relates to periods prior to the close of business on February 21, 2020, is that of the corresponding Predecessor Fund.

Each Fund is a diversified fund, which means it is subject to the diversification requirements under the Investment Company Act of 1940, as amended (the “1940 Act”). Under the 1940 Act, a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, Government securities, and securities of other investment companies.

Each Fund currently offers Class I shares for purchase, the North Square McKee Bond Fund currently offers Class R6 shares for purchase, and the North Square Strategic Income Fund currently offers Class A share for purchase. Other classes may be established from time to time in accordance with the provisions of the Trust’s Amended and Restated Agreement and Declaration of Trust (the “Declaration of Trust”). Each class of shares of a Fund generally is identical in all respects except that each class of shares is subject to its own distribution expenses and minimum investments. Each class of shares also has exclusive voting rights with respect to its distribution fees, as applicable.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The Funds’ principal investment strategies and the summaries of risks associated with the same are described in the Funds’ Prospectus. The discussion below provides additional information pertaining to those principal investment strategies and related risks, as well as additional information about other investment strategies that the Funds may utilize and related risks that may apply to the Funds, even though they are not considered to be “principal” investment strategies of the Fund. Accordingly, an investment strategy and related risk that is described below, but which is not described in the Funds’ Prospectus, should not be considered to be a principal investment strategy or principal risk applicable to the Funds.

The Funds may engage in any of the investment strategies or purchase any of the investments described below directly, through their investment in one or more other investment companies, or through hybrid instruments, structured investments, or other derivatives.

PRINCIPAL INVESTMENT STRATEGIES, POLICIES AND RISKS

The Funds’ principal and non-principal investment types and related risks are identified in the table below and described in detail following the table.

EQUITY SECURITIES

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company’s stock price.

The fundamental risk of investing in common stock is that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. While common stocks have historically provided greater long-term returns than preferred stocks, fixed-income and money market investments, common stocks have also experienced significantly more volatility than the returns from those other investments.

Sector Risk. To the extent a Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors.

- *Communication Services Sector Risk.* Companies in the communications services sector are subject to the risk that they will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions, and/or increased competition.
- *Consumer Discretionary Sector Risk.* Companies in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.
- *Consumer Staples Sector Risk.* The performance of companies in the consumer staples sector may be affected by,

among other things, marketing campaigns, changes in consumer demands, government regulations and changes in commodity prices.

- *Energy Sector Risk.* Companies in the energy sector may be adversely affected by fluctuations in energy prices and supply and demand of energy fuels. Companies in the energy sector may need to make substantial expenditures, and to incur significant amounts of debt, in order to maintain or expand their reserves. The demand for oil and other energy commodities was adversely impacted by the COVID-19 pandemic. Future pandemics could lead to reduced production and price volatility.
- *Financials Sector Risk.* The performance of companies in the financials sector, as traditionally defined, may be adversely impacted by many factors, including, among others, changes in government regulations, economic conditions, and interest rates, credit rating downgrades, adverse public perception, exposure concentration and decreased liquidity in credit markets. The impact of changes in regulation of any individual financial company, or of the financials sector as a whole, cannot be predicted.
- *Health Care Sector Risk.* The performance of companies in the health care sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many health care companies are heavily dependent on patent protection. The expiration of patents may adversely affect the profitability of these companies. Many health care companies are subject to extensive litigation based on product liability and similar claims.
- *Industrials Sector Risk.* Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.
- *Information Technology Sector.* Information Technology companies face intense competition and potentially rapid product obsolescence. Like other technology companies, information technology companies may have limited product lines, markets, financial resources or personnel. Companies in the information technology sector may face obsolescence and are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies.
- *Materials Sector Risk.* Companies in the materials sector may be adversely impacted by the volatility of commodity prices, changes in exchange rates, social and political unrest, war, depletion of resources, decreases in demand, over-production, litigation and changes in government regulations, among other factors.
- *Real Estate Sector Risk.* Securities in the real estate sector are susceptible to the risks associated with the real estate industry in general. Real estate companies may have lower trading volumes and may be subject to more abrupt or erratic price movements than the overall securities markets. Certain investments in real estate-related investments were negatively affected by the COVID-19 pandemic. Potential impacts of pandemics on the real estate sector include lower occupancy rates, decreased lease payments, defaults, and foreclosures, among other consequences.
- *Utilities Sector Risk.* The utilities sector is subject to significant government regulation and oversight. Companies in the utilities sector may be adversely affected due to increases in commodity and operations costs, rising costs of financing capital construction and the cost of complying with government regulations, among other factors. Deregulation may subject utility companies to greater competition and may adversely affect their profitability. As deregulation allows utility companies to diversify outside of their original geographic regions and their traditional lines of business, utility companies may engage in riskier ventures.

Preferred Securities

Preferred securities generally pay fixed or adjustable-rate dividends or interest to investors and have preference over common stock in the payment of dividends or interest and the liquidation of a company's assets, which means that a company typically must pay dividends or interest on its preferred securities before paying any dividends on its common stock. Preferred securities are generally junior to all forms of the company's debt, including both senior and subordinated debt.

While some preferred securities are issued with a final maturity date, others are perpetual in nature. In certain instances, a final maturity date may be extended and/or the final payment of principal may be deferred at the issuer's option for a specified time without any adverse consequence to the issuer. No redemption can typically take place unless all cumulative payment obligations to preferred security investors have been met, although issuers may be able to engage in open market repurchases without regard to any cumulative dividends or interest payable. A portion of the portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to holders of such securities. Should an issuer default on its obligations under such a security, the amount of income earned by the Fund may be adversely affected.

Small- and Mid-Cap Stocks

Stock of companies with market capitalizations that are small compared to other publicly traded companies may be subject to more abrupt or erratic market movements than larger, more established companies. Investments in larger companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, and more stability and greater depth of management and personnel. Investments in smaller, less seasoned companies may present greater opportunities for growth but also may involve greater risks than customarily are associated with more established companies. These companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group. Their securities may be traded in the over-the-counter market or on a regional exchange, or may otherwise have limited liquidity. As a result of owning large positions in this type of security, a Fund is subject to the additional risk of possibly having to sell portfolio securities at disadvantageous times and prices if redemptions require such Fund to liquidate its securities positions. In addition, it may be prudent for a Fund, as its asset size grows, to limit the number of relatively small positions it holds in securities having limited liquidity in order to minimize its exposure to such risks, to minimize transaction costs, and to maximize the benefits of research. As a consequence, as a Fund's asset size increases, such Fund may reduce its exposure to small capitalization securities that have decreased liquidity, which could adversely affect performance.

Stocks of companies with medium market capitalizations (*i.e.*, mid cap companies share some of the risk characteristics of investments in stocks of companies with small market capitalizations described above, although mid cap companies tend to have longer operating histories, broader product lines and greater financial resources and their stocks tend to be more liquid and less volatile than those of smaller capitalization issuers.

Large-Cap Stocks

A Fund may invest in stock of companies with market capitalizations that are larger than small- and mid-cap companies. Large-cap companies may be unable to attain or maintain the high growth rate of successful smaller companies (compared to small- and mid-cap companies) during times of economic expansion. The securities of large-capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities, such as changes in technology and consumer tastes.

Convertible Securities

Each Fund may invest in convertible securities. A convertible security is a preferred stock, warrant or other security that may be converted or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive the dividend or interest until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both fixed income and equity securities. As such, convertible securities expose the Funds to risks associated with both equity and fixed-income securities. Although to a lesser extent than with fixed income securities generally, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stocks and, therefore, also will react to variations in the general market for equity securities. A significant feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and they may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

Contingent Convertible Securities. Contingent convertible securities (which generally provide for conversion under certain circumstances) are hybrid securities, issued by non-U.S. financial institutions and distinguished as a subset of convertible securities. Like mandatory convertible securities (and unlike traditional convertible securities), some contingent convertible securities provide for mandatory conversion under certain circumstances. The mandatory conversion might be automatically triggered, for instance, if a company fails to meet the minimum amount of capital described in the security, the company's regulator decides that the security should convert, or the company receives specified levels of extraordinary public support. Since the common stock of the issuer may not pay a dividend, investors in these instruments could experience a reduced income rate, potentially to zero, and conversion would deepen the subordination of the investor, hence worsening standing in a bankruptcy. Further, some contingent convertible securities have a set stock conversion rate that would cause a reduction in the value of the security if the price of the stock is below the conversion price on the conversion date. In addition, various contingent convertible securities may contain features that limit an investor's ability to convert the security unless certain conditions are met.

Exchange-Traded Funds and Mutual Funds

Exchange-traded funds ("ETFs") are pooled investment vehicles that generally seek to track the performance of specific indices. ETFs may be organized as open-end funds or as unit investment trusts ("UITs"). Their shares are listed on stock exchanges and can be traded throughout the day at market-determined prices.

An ETF generally issues index-based investments in aggregations of 50,000 shares known as "Creation Units" in exchange for a "Portfolio Deposit" consisting of (a) a portfolio of securities substantially similar to the component securities ("Index Securities") of the applicable index (the "Index"), (b) a cash payment equal to a pro rata portion of the dividends accrued on the ETF's portfolio securities since the last dividend payment by the ETF, net of expenses and liabilities, and (c) a cash payment or credit ("Balancing Amount") designed to equalize the net asset value ("NAV") of the Index and the NAV of a Portfolio Deposit.

Shares of ETFs are not individually redeemable, except upon termination of the ETF. To redeem shares of an ETF, an investor must accumulate enough shares of the ETF to reconstitute a Creation Unit. The liquidity of small holdings of ETF shares, therefore, will depend upon the existence of a secondary market for such shares. The secondary market is where individual investors can trade as little as a single share. Upon redemption of a Creation Unit, the portfolio will

receive Index Securities and cash identical to the Portfolio Deposit required of an investor wishing to purchase a Creation Unit that day.

The price of ETF shares is based upon (but not necessarily identical to) the value of the securities held by the ETF. Accordingly, the level of risk involved in the purchase or sale of ETF shares is similar to the risk involved in the purchase or sale of traditional common stock, with the exception that the pricing mechanism for ETF shares is based on a basket of stocks. Disruptions in the markets for the securities underlying ETF shares purchased or sold by the Fund could result in losses on such shares. There is no assurance that the requirements of the national securities exchanges necessary to maintain the listing of shares of any ETF will continue to be met.

The Funds' investment in ETFs and mutual funds (including other funds managed by the Adviser or Sub-Adviser) generally reflects the risks of owning the underlying securities the ETF or mutual fund holds. An ETF may also trade at a discount to its NAV. For example, where all or a portion of an ETF's underlying securities trade in a market that is closed when the market in which the ETF's shares are listed and trading is open, there may be changes between the last quote from its closed foreign market and the value of such security during the ETF's domestic trading day. This could, in turn, result in differences between the market price of the ETF's shares and the underlying value of those shares. The Funds will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. In addition, a Fund may invest in underlying funds which invest a larger portion of their assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors. A Fund will be indirectly exposed to the risks of the portfolio assets held by an underlying fund in which the Fund invests, including, but not limited to, derivatives, currencies and leverage risk. Investments in ETFs and mutual funds are also subject to the following additional risks:

- *Expenses.* Your cost of investing in a Fund will generally be higher than the cost of investing directly in ETFs or other investment companies, because you will indirectly bear fees and expenses charged by the underlying ETFs and investment companies in which the Fund invests in addition to the Fund's direct fees and expenses.
- *Investment Limitation.* Under Section 12(d)(1) of the 1940 Act, a Fund is generally subject to limits on investments in shares of other investment companies. However, a Fund is permitted to invest in investment companies beyond these limits, subject to certain terms and conditions set forth in SEC rules. Accordingly, the limitations, or satisfaction of certain conditions specified in the rules, may prevent a Fund from allocating its investments in the manner the Adviser/Sub-Adviser considers optimal, or cause the Adviser/Sub-Adviser to select an investment other than that which is considered optimal.
- *Market Value Risk.* The market value of an ETF's shares may differ from its NAV. This difference in price may be due to the fact that the supply and demand in the market for ETF shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when an ETF trades at a premium (creating the risk that a Fund pays more than NAV for an ETF when making a purchase) or discount (creating the risks that a Fund's NAV is reduced for undervalued ETFs it holds and that the Fund receives less than NAV when selling an ETF).
- *Operational Risks.* There can be no assurance that an active trading market will develop and be maintained for the shares of the ETFs in which a Fund invests. Further, market makers (other than lead market makers) have no obligation to make markets in an ETF's shares and may discontinue doing so at any time without notice. To the extent no market makers are willing to process creation and/or redemption orders for an ETF, shares of the ETF may trade like closed-end fund shares at a discount to NAV and the ETF may possibly face delisting. Trading in an ETF's shares may be halted because of market conditions or for reasons that, in the view of the exchange on which the ETF lists its shares, make trading in the ETF's shares inadvisable. In addition, trading in an ETF's shares is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules. During stressed market conditions, the liquidity of an ETF's shares may be less than the liquidity

of the securities in the ETF's portfolio. Any of the foregoing would have an adverse effect on the value of a Fund's investment in the ETF's shares.

- *Registration.* Shareholders of ETFs that are registered under the Securities Act of 1933 but not the 1940 Act, such as certain ETFs that invest in commodities, do not have the protections of the 1940 Act.
- *Sampling Risk.* Index-based Fund investments may utilize a representative sampling approach to track their respective underlying indices. Index-based Fund investments that utilize a representative sampling approach are subject to an increased risk of tracking error because the securities selected for the Fund Investment in the aggregate may vary from the investment profile of the underlying index. Additionally, if using a representative sampling approach, a Fund investment will typically hold a smaller number of securities than the underlying index, and as a result, an adverse development to a Fund Investment could result in a greater decline in NAV than would be the case if the Fund investment held all of the securities in the underlying index.
- *Tracking Risk.* Index-based Fund investments may not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, Fund investments may incur expenses not incurred by their applicable indices. Certain securities comprising these indices may, from time to time, temporarily be unavailable, which may further impede a Fund investment's ability to track its applicable indices or match its performance.

DEBT SECURITIES

Debt securities are used by issuers to borrow money. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest, but are purchased at a discount from their face values and accrue interest at the applicable coupon rate over a specified time period. Some debt securities pay a periodic coupon that is not fixed, instead payments "float" relative to a reference rate, such as the Secured Overnight Financing Rate ("SOFR") or an alternative rate. This "floating rate" debt may pay interest at levels above or below the previous interest payment. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall. Certain additional risk factors related to debt securities are sensitivity to interest rate and economic changes, payment expectations, and liquidity and valuation.

The United Kingdom's Financial Conduct Authority which regulated the London Interbank Offered Rate ("LIBOR"), previously announced that after 2021 it would cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. As of June 30, 2023, nearly all publications of LIBOR on a representative basis had ceased. Some LIBOR rates continue to be published but only on a temporary, synthetic, and non-representative basis. These temporary, synthetic LIBOR rates were fully discontinued at the end of September 2024. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), began publishing a SOFR, a broad measure of secured overnight U.S. Treasury repo rates, as the preferred alternative rate to U.S. dollar LIBOR. Actions by regulators have resulted in the establishment of alternative reference rates to LIBOR in most major currencies.

Markets are developing in response to these new rates, but questions around liquidity in these rates and how to appropriately adjust these rates to eliminate any economic value transfer at the time of transition remains a significant issue. The unavailability of LIBOR presents risks to a Fund, including the risk that any pricing or adjustments to the Fund's investments resulting from a substitute or alternate reference rate also may adversely affect the Fund's performance and/or NAV. The utilization of an alternative reference rate, or the transition process to an alternative reference rate, may adversely affect a Fund's performance. It remains uncertain how such changes could impact a Fund

long-term, including any negative effects on the Fund's liquidity and valuation of the Fund's investments, or on issuers of instruments, as well as financial markets generally.

The long-term effects of the discontinuation of LIBOR on a Fund will depend on, among other things, (1) existing fallback or termination provisions in applicable instruments and (2) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new instruments and contracts. The discontinuation of LIBOR could have a significant impact on the financial markets in general and may also present heightened risk to market participants, including public companies, investment advisers, investment companies, and broker-dealers. The risks associated with this discontinuation and transition could be exacerbated if the actions necessary to effect an orderly transition to an alternative reference rate are not completed in a timely manner. For example, current information technology systems may be unable to accommodate new instruments and rates with features that differ from LIBOR.

Alteration of the terms of a debt instrument or a modification of the terms of other types of contracts to replace an interbank offered rate with a new reference rate could result in a taxable exchange and the realization of income and gain/loss for U.S. federal income tax purposes. The IRS has issued Treasury regulations regarding the tax consequences of the transition from interbank offered rates to new reference rates in debt instruments and non-debt contracts. Under the Treasury regulations, to avoid such alteration or modification of the terms of a debt instrument being treated as a taxable exchange, the fair market value of the modified instrument or contract must be substantially equivalent to its fair market value before the qualifying change was made.

Lower rated debt securities, those rated Ba or below by Moody's Investors Service, Inc. ("Moody's") and/or BB or below by Standard & Poor's Ratings Group ("S&P") or unrated but determined by a Sub-Adviser to be of comparable quality, are described by the rating agencies as speculative and involve greater risk of default or price changes than higher rated debt securities due to changes in the issuer's creditworthiness or the fact that the issuer may already be in default. The market prices of these securities may fluctuate more than higher quality securities and may decline significantly in periods of general economic difficulty. It may be more difficult to sell or to determine the value of lower rated debt securities.

Certain additional risk factors related to debt securities are discussed below:

Sensitivity to interest rate and economic changes. Debt securities may be sensitive to economic changes, political and corporate developments, and interest rate changes. In addition, during an economic downturn or periods of rising interest rates, issuers that are highly leveraged may experience increased financial stress that could adversely affect their ability to meet projected business goals, obtain additional financing, and service their principal and interest payment obligations. Furthermore, periods of economic change and uncertainty can be expected to result in increased volatility of market prices and yields of certain debt securities. For example, prices of these securities can be affected by financial contracts held by the issuer or third parties (such as derivatives) related to the security or other assets or indices.

Payment expectations. Debt securities may contain redemption or call provisions. If an issuer exercises these provisions in a lower interest rate environment, a Fund would have to replace the security with a lower yielding security, resulting in decreased income to investors. If the issuer of a debt security defaults on its obligations to pay interest or principal or is the subject of bankruptcy proceedings, a Fund may incur losses or expenses in seeking recovery of amounts owed to it.

Liquidity. Liquidity risk may result from the lack of an active market, or reduced number and capacity of traditional market participants to make a market in fixed income securities, and may be magnified in a rising interest rate environment or other circumstances where investor redemptions from fixed income mutual funds may be higher than normal, causing increased supply in the market due to selling activity. In such cases, a Fund,

due to regulatory limitations on investments in illiquid investments and the difficulty in purchasing and selling such investments or instruments, may be unable to achieve its desired level of exposure to a certain sector. To the extent that a Fund's principal investment strategies involve investments in securities of companies with smaller market capitalizations, foreign non-U.S. securities, Rule 144A securities, sectors of fixed income securities that have decreased liquidity, derivatives or securities with substantial market and/or credit risk, the Fund will tend to have the greatest exposure to liquidity risk. Further, fixed income securities with longer durations until maturity face heightened levels of liquidity risk as compared to fixed income securities with shorter durations until maturity. Finally, liquidity risk also refers to the risk of unusually high redemption requests or other unusual market conditions that may make it difficult for a Fund to fully honor redemption requests within the allowable time period. Meeting such redemption requests could require a Fund to sell securities at reduced prices or under unfavorable conditions, which would reduce the value of the Fund. It may also be the case that other market participants may be attempting to liquidate fixed income holdings at the same time as a Fund, causing increased supply in the market and contributing to liquidity risk and downward pricing pressure. Please refer to "Illiquid and Restricted Securities" below for further discussion of regulatory considerations and constraints relating to investment liquidity.

The Sub-Advisers (as defined below) attempt to reduce the risks described above through diversification of each Fund's portfolio, credit analysis of each issuer, and by monitoring broad economic trends as well as corporate and legislative developments, but there can be no assurance that they will be successful in doing so. Credit ratings of debt securities provided by rating agencies indicate a measure of the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between corporate developments and the time a rating is assigned and updated.

Changing Fixed Income Market Conditions. Although interest rates were historically low in recent years in the U.S. and abroad, recently, the Board of Governors of the Federal Reserve System (the "Federal Reserve") and certain foreign central banks began to raise interest rates as part of their efforts to address rising inflation. In addition, ongoing inflationary pressures from tight labor markets and supply chain disruptions, among other factors, could continue to cause an increase in interest rates and/or negatively impact companies. It is difficult to accurately predict the pace at which interest rates may increase, or the timing, frequency or magnitude of any such increases in interest rates. Additionally, various economic and political factors could cause the Federal Reserve or other foreign central banks to change their approach in the future and such actions may result in an economic slowdown both in the U.S. and abroad. Unexpected increases in interest rates could lead to market volatility or reduce liquidity in certain sectors of the market. Deteriorating economic fundamentals may, in turn, increase the risk of default or insolvency of particular issuers, negatively impact market value, cause credit spreads to widen, and reduce bank balance sheets, among other effects. Any of these could cause an increase in market volatility or reduce liquidity across various markets. Also, regulators have expressed concern that rate increases may cause investors to sell fixed income securities faster than the market can absorb them, contributing to price volatility. Over the longer term, rising interest rates may present a greater risk than has historically been the case due to the prior period of relatively low rates and the effect of government fiscal and monetary policy initiatives and potential market reaction to those initiatives, or their alteration or cessation. Historical patterns of correlation among asset classes may break down in unanticipated ways during times of high volatility, disrupting investment programs and potentially causing losses.

Changes in fixed-income market conditions, including increases to the federal funds rate, may expose fixed-income and related markets to heightened volatility and reduced liquidity for certain Fund investments that may be difficult to sell at favorable prices to meet fund redemption obligations, causing the value of a Fund's investments and share price to decline. A rise in general interest rates may also result in increased redemptions from a Fund. Changing interest rates may also have unpredictable effects on securities markets in general,

directly or indirectly impacting a Fund's investments, yield and performance. Thus, the Funds currently face a heightened level of interest rate, liquidity and valuation risks.

Because the Funds may invest in derivatives tied to fixed income markets, they may be more substantially exposed to these risks than a fund that does not invest in derivatives. To the extent a Fund experiences high redemptions because of these policy changes, the Fund may experience increased portfolio turnover, which will increase the costs that the Fund incurs and may lower the Fund's performance. The liquidity levels of a Fund's portfolio may also be affected and the Fund could be required to sell holdings at disadvantageous times or prices in order to meet redemption obligations.

Bond markets have consistently grown over the past three decades while the capacity for traditional dealer counterparties to engage in fixed income trading has not kept pace and in some cases has decreased. As a result, dealer inventories of corporate bonds, which provide a core indication of the ability of financial intermediaries to "make markets," are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, the significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the fixed income markets. Such issues may be exacerbated during periods of economic uncertainty.

Bond Ratings. Bond rating agencies may assign modifiers (such as +/-) to ratings categories to signify the relative position of a credit within the rating category. Investment policies that are based on ratings categories should be read to include any security within that category, without considering the modifier. Please refer to Appendix A for more information about credit ratings.

Lower-Rated Debt Securities

Lower-rated fixed-income securities (commonly known as "junk bonds") have a greater possibility that adverse changes in the financial condition of the issuer or in general economic conditions, or both, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. The inability (or perceived inability) of issuers to make timely payment of interest and principal would likely make the values of these securities held by a Fund more volatile and could limit a Fund's ability to sell its securities at prices approximating the values such Fund had placed on such securities. In the absence of a liquid trading market for securities held by it, a Fund at times may be unable to establish the fair value of such securities. Securities ratings are based largely on the issuer's historical financial condition and the rating agencies' analysis at the time of rating. Consequently, the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition, which may be better or worse than the rating would indicate. In addition, the rating assigned to a security by Moody's or S&P (or by any other nationally recognized securities rating agency) does not reflect an assessment of the volatility of the security's market value or the liquidity of an investment in the security.

Like those of other fixed-income securities, the values of lower-rated securities fluctuate in response to changes in interest rates. A decrease in interest rates will generally result in an increase in the value of a Fund's fixed-income assets. Conversely, during periods of rising interest rates, the value of a Fund's fixed-income assets will generally decline. The values of lower-rated securities may often be affected to a greater extent by changes in general economic conditions and business conditions affecting the issuers of such securities and their industries. Negative publicity or investor perceptions may also adversely affect the values of lower-rated securities. Changes by nationally recognized securities rating agencies in their ratings of any fixed-income security and changes in the ability of an issuer to make payments of interest and principal may also affect the value of these investments. Changes in the value of portfolio securities generally will not affect income derived from these securities, but will affect a Fund's NAV. A Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Sub-Advisers will monitor the investment to determine whether its retention will assist in meeting a Fund's investment objective. Issuers of lower-rated securities are often highly leveraged, so that their ability to service their debt obligations during an

economic downturn or during sustained periods of rising interest rates may be impaired. Such issuers may not have more traditional methods of financing available to them and may be unable to repay outstanding obligations at maturity by refinancing.

The risk of loss due to default in payment of interest or repayment of principal by such issuers is significantly greater because such securities frequently are unsecured and subordinated to the prior payment of senior indebtedness. It is possible that, under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, a Fund could find it more difficult to sell these securities when a Sub-Adviser believes it advisable to do so or may be able to sell the securities only at prices lower than if they were more widely held. Under these circumstances, it may also be more difficult to determine the fair value of such securities for purposes of computing a Fund's NAV. In order to enforce its rights in the event of a default, a Fund may be required to participate in various legal proceedings or take possession of and manage assets securing the issuer's obligations on such securities. This could increase a Fund's operating expenses and adversely affect a Fund's NAV. The ability of a holder of a tax-exempt security to enforce the terms of that security in a bankruptcy proceeding may be more limited than would be the case with respect to securities of private issuers. In addition, a Fund's intention to qualify as a "regulated investment company" under the Internal Revenue Code of 1986, as amended (the "Code") may limit the extent to which the Fund may exercise its rights by taking possession of such assets. To the extent a Fund invests in securities in the lower rating categories, the achievement of such Fund's investment objective is more dependent on a Sub-Adviser's investment analysis than would be the case if the Fund were investing in securities in the higher rating categories.

Over-the-Counter Transactions – Fixed Income Securities

Over-the-Counter ("OTC") transactions differ from exchange-traded transactions in several respects. OTC transactions are transacted directly with dealers and not with a clearing corporation, subjecting a Fund to counterparty risk. Without the availability of a clearing corporation, OTC transaction pricing is normally done by reference to information from market makers, which information is carefully monitored by the Sub-Advisers and verified in appropriate cases. As OTC transactions are transacted directly with dealers, there is a risk of nonperformance by the dealer as a result of the insolvency of such dealer or otherwise. A Fund will seek to enter into OTC transactions only with dealers which agree to, and which are expected to be capable of, entering into closing transactions with the Fund. There is also no assurance that a Fund will be able to liquidate an OTC transaction at any time prior to expiration.

Municipal Bonds

Municipal bonds are debt obligations issued by states, possessions, or territories of the United States (including the District of Columbia) or a political subdivision, public instrumentality, agency, public authority or other governmental unit of such states, possessions, or territories (*e.g.*, counties, cities, towns, villages, districts and authorities). For example, states, possessions, territories and municipalities may issue municipal bonds to raise funds for various public purposes such as airports, housing, hospitals, mass transportation, schools, water and sewer works, gas, and electric utilities. They may also issue municipal bonds to refund outstanding obligations and to meet general operating expenses. Municipal bonds may be general obligation bonds or revenue bonds. General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue bonds are payable from revenues derived from particular facilities, from the proceeds of a special excise tax or from other specific revenue sources. They are not usually payable from the general taxing power of a municipality. In addition, certain types of "private activity" bonds may be issued by public authorities to obtain funding for privately operated facilities, such as housing and pollution control facilities, for industrial facilities and for water supply, gas, electricity and waste disposal facilities. Other types of private activity bonds are used to finance the construction, repair or improvement of, or to obtain equipment for, privately operated industrial or commercial facilities. Current federal tax laws place substantial limitations on the size of certain of such issues. In certain cases, the interest on a private activity bond may not be exempt from federal income tax or the alternative minimum tax. As such, municipal bonds are subject to the risk that the IRS may determine that an issuer has not complied with applicable tax requirements and that interest from the municipal bond is taxable, which may result in a decline in the value of the security.

U.S. Government Obligations

U.S. Government obligations include Treasury bills, certificates of indebtedness, notes and bonds. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis. U.S. Government obligations include securities issued or guaranteed by government-sponsored enterprises.

Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities, including government-sponsored enterprises, where it is not obligated to do so. In addition, the U.S. government and its agencies and instrumentalities do not guarantee the value of their securities which are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. Government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. Government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

Inflation-Linked Securities

Inflation-linked securities are fixed income securities whose principal value is periodically adjusted according to the rate of inflation. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-linked securities. However, the current market value of the bonds is not guaranteed, and will fluctuate with market conditions. Investments in other inflation-linked securities may not provide a similar guarantee and the principal amount repaid could be less than the original principal if inflation falls over the period.

The value of inflation-linked securities is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rise in inflation exceeds the rise in nominal rates, real rates are likely to decline, leading to an increase in the market value of the bonds. Conversely, if the rise in nominal interest rates outpaces the pickup in the rate of inflation, real interest might rise, generating a decline in the market value of the inflation-linked security.

The periodic adjustment of U.S. inflation-linked securities generally is tied to the Consumer Price Index (“CPI”), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-linked securities issued by a foreign government are generally adjusted to reflect a comparable country or regional inflation measure calculated by that government. There can be no assurance that the CPI or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States. Any increase in the principal amount of an inflation-linked security will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

Inflation-linked securities held by a Fund may experience an increase in original issue value due to inflation-linked adjustments. The inflation-linked growth in the value of these bonds may be reflected in a Fund’s gross income. While inflation-adjusted growth does not result in cash payments to a Fund, the Fund may be required to make distributions to shareholders for any increase in value in excess of the cash actually received by the Fund during the taxable year. A Fund may be required to sell portfolio securities to make these distribution payments. This may lead to higher transaction costs, losses from sale during unfavorable market conditions and higher capital gains taxes. If deflation-linked

adjustments decrease the value of inflation-linked securities held by a Fund, income distributions previously made by the Fund during the taxable year may be deemed a return of capital.

FOREIGN (NON-U.S.) INVESTMENTS

Each Fund may make foreign investments. Investments in the securities of foreign issuers and other non-U.S. investments may involve risks in addition to those normally associated with investments in the securities of U.S. issuers or other U.S. investments. All foreign investments are subject to risks of foreign political and economic instability, adverse movements in foreign exchange rates, and the imposition or tightening of exchange controls and limitations on the repatriation of foreign capital. Other risks stem from potential changes in governmental attitude or policy toward private investment, which in turn raises the risk of nationalization, increased taxation or confiscation of foreign investors' assets.

The financial problems in global economies over the past several years, including the European sovereign debt crisis, may continue to cause high volatility in global financial markets. In addition, global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may also be affected if one or more countries leave the Euro currency or by other policy changes made by governments or quasi-governmental organizations.

Additional non-U.S. taxes and expenses may also adversely affect each Fund's performance, including foreign withholding taxes on foreign securities' dividends. Brokerage commissions and other transaction costs on foreign securities exchanges are generally higher than in the United States. Foreign companies may be subject to different accounting, auditing and financial reporting standards. To the extent foreign securities held by a Fund are not registered with the SEC or with any other U.S. regulator, the issuers thereof will not be subject to the reporting requirements of the SEC or any other U.S. regulator. Accordingly, less information may be available about foreign companies and other investments than is generally available on issuers of comparable securities and other investments in the United States. Foreign securities and other investments may also trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities and other investments.

Future political and economic developments, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls, or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign banks and foreign branches of domestic banks are subject to less stringent reserve requirements, and to different accounting, auditing, and recordkeeping requirements. Also, the legal remedies for investors may be more limited than the remedies available in the United States.

Given the interconnectedness of global economies, a negative event or development to a single (or small number of) issuer or country could impact other markets. For example, the decline in the U.S. subprime mortgage market quickly spread throughout global credit markets, triggering a liquidity crisis that affected fixed-income and equity markets around the world. European countries can be affected by the significant fiscal and monetary controls that the European Economic and Monetary Union ("EMU") imposes for membership. Member countries are required to maintain tight control over inflation, public debt, and budget deficit to qualify for membership. Europe's economies are diverse and its governments are decentralized, and its cultures vary widely. Several European Union ("EU") countries, including Greece, Ireland, Italy, Spain and Portugal, have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the euro and the accompanying coordinate of fiscal and wage policy among EMU member countries. It is also possible that one or more of the EMU member countries could abandon the euro and return to a national currency and/or that the euro will cease to exist as a single currency in its current form. The effects of such abandonment or a country's forced expulsion from the euro on that country, the rest of the EMU, and global markets are impossible to predict, but are likely to be negative. Such an exit by one country may also increase the possibility that additional countries may exit the euro should they face similar financial difficulties.

Investing in foreign securities also includes the economic and political risks associated with the countries in which the

securities are issued. For example, the departure of the United Kingdom (the “UK”) from the EU in 2020 (commonly referred to as “Brexit”) could have a lasting impact on the currency volatility and economic growth in Europe among other political, regulatory, economic and market outcomes that cannot be predicted. The full effects of Brexit are unknown at this time and could negatively impact the value of a Fund’s investments. Securities issued by companies domiciled in the UK could be subject to changing regulatory and tax regimes. Banking and financial services companies that operate in the UK or EU could be disproportionately impacted by those actions. Further insecurity in EU membership or the abandonment of the euro could exacerbate market and currency volatility and negatively impact a Fund’s investments in securities issued by companies located in EU countries. Another example is Russia’s military incursion in Ukraine. This action led to sanctions believe levied against Russia by the United States, EU and other countries, which could adversely affect European and global energy and financial markets, as well as commodity prices, supply chains and global trade. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching, and the resulting market volatility may have an adverse effect on the performance of the Funds.

Japan’s economy is heavily dependent upon international trade and is especially sensitive to trade barriers and disputes. Domestic or foreign trade sanctions or other protectionist measures may also adversely impact Japan’s economy. In particular, Japan relies on large imports of agricultural products, raw materials and fuels. Japan also remains heavily dependent on oil imports, and a substantial rise in commodity prices, or a fall-off in Japan’s manufactured exports, may affect Japan’s economy adversely. Additionally, slowdowns in the economies of key trading partners such as the United States, China and countries in Southeast Asia could have a negative impact on the Japanese economy.

The Japanese yen has fluctuated widely at times and any increase in its value may cause a decline in exports that could weaken the economy. The Japanese yen may also be affected by currency volatility elsewhere in Asia, particularly Southeast Asia. The Japanese securities markets are less regulated than the U.S. markets. Evidence has emerged from time to time of distortion of market prices to serve political or other purposes. Shareholders’ rights also are not always enforced.

Japan has had territorial disputes and/or defense issues with China, North Korea, South Korea and Russia, among others. In the past several years, Japan’s relationship with North Korea has been especially strained because of increased nuclear and military activity by North Korea. Japan’s disputes with neighboring countries have the potential to cause uncertainty in the Japanese markets and affect the overall Japanese economy in times of crisis.

To the extent a Fund invests in investments located in South Korea, the Fund will be susceptible to adverse market, political, regulatory and geographic events affecting South Korea. The South Korean economy is dependent on the economies of other Asian countries, especially China and Southeast Asia, and the United States as key trading partners. Furthermore, South Korea’s economy may be significantly affected by currency fluctuations and increasing competition from Asia’s other low-cost emerging economies. Like Japan, tensions with North Korea could escalate and lead to further uncertainty in the political and economic climate of South Korea.

Changes in foreign exchange rates will affect the value in U.S. Dollars of any foreign currency-denominated securities and other investments held by the Funds. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from any foreign securities and other investments will be received and realized in foreign currencies, and each Fund is required to compute and distribute income in U.S. Dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. Dollar occurring after a Fund’s income has been earned and computed in U.S. Dollars may require such Fund to liquidate portfolio securities or other investments to acquire sufficient U.S. Dollars to make a distribution. Similarly, if the exchange rate declines between the time a Fund incurs expenses in U.S. Dollars and the time such expenses are paid, such Fund may be required to liquidate additional portfolio securities or other investments to purchase the U.S. Dollars required to meet such expenses.

Each Fund may purchase foreign bank obligations. In addition to the risks described above that are generally applicable to foreign investments, the investments that a Fund makes in obligations of foreign banks, branches or subsidiaries may

involve further risks, including differences between foreign banks and U.S. banks in applicable accounting, auditing and financial reporting standards, and the possible establishment of exchange controls or other foreign government laws or restrictions applicable to the payment of certificates of deposit or time deposits that may affect adversely the payment of principal and interest on the securities and other investments held by a Fund.

Emerging Markets

Each Fund may invest in companies organized or doing substantial business in emerging market countries or developing countries as defined by the World Bank, International Financial Corporation or the MSCI, Inc. emerging market indices or other comparable indices. The risks associated with foreign investments may be magnified in emerging markets as these countries are often undergoing significant evolution and rapid development, and lack the political and economic stability of more developed countries. Developing countries may impose restrictions on a Fund's ability to repatriate investment income or capital. Even where there is no outright restriction on repatriation of investment income or capital, the mechanics of repatriation may affect certain aspects of the operations of a Fund.

The economies of emerging countries may suffer from unfavorable growth of gross domestic product, rates of inflation and hyperinflation, capital reinvestment, resources, self-sufficiency and balance of payments. Many emerging countries have experienced in the past, and continue to experience, high rates of inflation. In certain countries inflation has at times accelerated rapidly to hyperinflationary levels, creating a negative interest rate environment and sharply eroding the value of outstanding financial assets in those countries. Other emerging countries, on the other hand, have recently experienced deflationary pressures and are in economic recessions. The economies of many emerging countries are heavily dependent upon international trade and are accordingly affected by protective trade barriers and the economic conditions of their trading partners. In addition, the economies of some emerging countries are vulnerable to weakness in world prices for their commodity exports.

Risks related to currencies and corporate actions are also greater in emerging countries than in developed countries. For example, some emerging countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Certain emerging countries may experience sudden and large adjustments in their currency, which can have a disruptive and adverse effect on foreign investors. Some emerging countries have a higher risk of currency devaluations, and some of these countries may experience sustained periods of high inflation or rapid changes in inflation rates which can have negative effects on a country's economy and securities markets. Some emerging countries may impose restrictions on the free conversion of their currencies into foreign currencies, including the U.S. dollar. Corporate action procedures in emerging countries may be less reliable and have limited or no involvement by the depositories and central banks. Lack of standard practices and payment systems can lead to significant delays in payment.

Some of the currencies in emerging markets have experienced devaluations relative to the U.S. Dollar, and major adjustments have been made periodically in certain of such currencies. Certain developing countries face serious exchange constraints.

Governments of some developing countries exercise substantial influence over many aspects of the private sector. In some countries, the government owns or controls many companies. Therefore, government actions in the future could have a significant effect on economic conditions in developing countries, which could affect the private sector companies in which a Fund invests.

Floating Rate, Inverse Floating Rate and Index Obligations

A Fund may invest in debt securities with interest payments or maturity values that are not fixed, but float in conjunction with (or inversely to) an underlying index or price. These securities may be backed by sovereign or corporate issuers, or by collateral such as mortgages. The indices and prices upon which such securities can be based include interest rates, currency rates and commodities prices. Floating rate securities pay interest according to a coupon which is reset

periodically. The reset mechanism may be formula based, or reflect the passing through of floating interest payments on an underlying collateral pool. Inverse floating rate securities are similar to floating rate securities except that their coupon payments vary inversely with an underlying index by use of a formula. Inverse floating rate securities tend to exhibit greater price volatility than other floating rate securities. Interest rate risk and price volatility on inverse floating rate obligations can be high, especially if leverage is used in the formula. Index securities pay a fixed rate of interest, but have a maturity value that varies by formula, so that when the obligation matures a gain or loss may be realized. The risk of index obligations depends on the volatility of the underlying index, the coupon payment and the maturity of the obligation.

Depository Receipts

Each Fund may invest in depository receipts. American Depository Receipts (“ADRs”) are negotiable receipts issued by a U.S. bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company’s office or agent in a foreign country. European Depository Receipts (“EDRs”) are negotiable certificates held in the bank of one country representing a specific number of shares of a stock traded on an exchange of another country. Global Depository Receipts (“GDRs”) are negotiable certificates held in the bank of one country representing a specific number of shares of a stock traded on an exchange of another country. Canadian Depository Receipts (“CDRs”) are negotiable receipts issued by a Canadian bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company’s office or agent in a foreign country.

Investing in ADRs, EDRs, GDRs, and CDRs presents risks that may not be equal to the risk inherent in holding the equivalent shares of the same companies that are traded in the local markets even though a Fund will purchase, sell and be paid dividends on ADRs in U.S. Dollars. These risks include fluctuations in currency exchange rates, which are affected by international balances of payments and other economic and financial conditions; government intervention; speculation; and other factors. With respect to certain foreign countries, there is the possibility of expropriation or nationalization of assets, confiscatory taxation, political and social upheaval, and economic instability. A Fund may be required to pay foreign withholding or other taxes on certain ADRs, EDRs, GDRs, or CDRs that it owns, but investors may or may not be able to deduct their pro-rata share of such taxes in computing their taxable income, or take such shares as a credit against their U.S. federal income tax. See “Federal Income Tax Matters.” ADRs, EDRs, GDRs, and CDRs may be sponsored by the foreign issuer or may be unsponsored. Unsponsored ADRs, EDRs, GDRs, and CDRs are organized independently and without the cooperation of the foreign issuer of the underlying securities. Unsponsored ADRs, EDRs, GDRs, and CDRs are offered by companies which are not prepared to meet either the reporting or accounting standards of the United States. While readily exchangeable with stock in local markets, unsponsored ADRs, EDRs, GDRs, and CDRs may be less liquid than sponsored ADRs, EDRs, GDRs, and CDRs. Additionally, there generally is less publicly available information with respect to unsponsored ADRs, EDRs, GDRs, and CDRs.

REAL ESTATE INVESTMENT TRUSTS (“REITs”)

REITs are pooled investment vehicles that invest primarily in income producing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs, or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of principal and interest payments. Similar to regulated investment companies such as each Fund, REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Code. A Fund will indirectly bear its proportionate share of expenses incurred by REITs in which it invests in addition to the expenses incurred directly by a Fund.

Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation. Investments in REITs are also subject to risks associated with extended vacancies of properties or defaults by borrowers or tenants, particularly during periods of disruptions to business operations or an economic downturn.

Investing in REITs involves risks similar to those associated with investing in small capitalization companies. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities. Historically, small capitalization stocks, such as REITs, have had more price volatility than larger capitalization stocks.

REITs may fail to qualify for the favorable federal income tax treatment generally available to them under the Code and may fail to maintain their exemptions from registration under the 1940 Act. REITs (especially mortgage REITs) also are subject to interest rate risks. When interest rates decline, the value of a REIT's investment in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investment in fixed-rate obligations can be expected to decline. In contrast, as interest rates on adjustable rate mortgage loans are reset periodically, yields on a REIT's investments in such loans will gradually align themselves to reflect changes in market interest rates, causing the value of such investments to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed-rate obligations.

WARRANTS AND RIGHTS

A Fund may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle (but do not obligate) the holder to buy equity securities at a specific price for a specific period of time but will do so only if such equity securities are deemed appropriate by a Sub-Adviser. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing stockholders to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights do not have voting rights, do not earn dividends, and do not entitle the holder to any rights with respect to the assets of the company that has issued them. They do not represent ownership of the underlying companies but only the right to purchase shares of those companies at a specified price on or before a specified exercise date. Warrants and rights tend to be more volatile than the underlying stock, and if at a warrant's expiration date the stock is trading at a price below the price set in the warrant, the warrant will expire worthless. Conversely, if at the expiration date the stock is trading at a price higher than the price set in the warrant or right, a Fund can acquire the stock at a price below its market value. The prices of warrants and rights do not necessarily parallel the prices of the underlying securities. An investment in warrants or rights may be considered speculative.

INVESTMENT COMPANY SECURITIES

Each Fund may invest in shares of other investment companies (each, an "Underlying Fund"), including open-end funds, closed-end funds, UITs and ETFs, to the extent permitted by the applicable law and subject to certain restrictions set forth in this SAI.

Under Sections 12(d)(1)(A) and 12(d)(1)(B) of the 1940 Act, a Fund and any companies controlled by the Fund may hold securities of an Underlying Fund in amounts which (i) do not exceed 3% of the total outstanding voting stock of such Underlying Fund, (ii) do not exceed 5% of the value of the Fund's total assets and (iii) when added to all other Underlying Fund securities held by the Fund, do not exceed 10% of the value of the Fund's total assets. The Funds may exceed these limits by following the requirements under Rule 12d1-4 under the 1940 Act as noted below.

Generally, under Sections 12(d)(1)(F) and 12(d)(1)(G) of the 1940 Act and SEC rules adopted pursuant to the 1940 Act, each Fund may acquire the securities of affiliated and unaffiliated Underlying Funds subject to the following guidelines and restrictions:

- A Fund may own an unlimited amount of the securities of any registered open-end fund or registered UIT that is affiliated with the Fund, so long as any such Underlying Fund has a policy that prohibits it from acquiring any securities of registered open-end funds or registered UITs in reliance on certain sections of the 1940 Act.
- A Fund and its “affiliated persons” may own up to 3% of the outstanding stock of any fund, subject to the following restrictions:
 - i. the Fund and each Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority (“FINRA”) applicable to funds of funds;
 - ii. each Underlying Fund is not obligated to redeem more than 1% of its total outstanding securities during any period less than 30 days; and
 - iii. the Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or (ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.

On October 7, 2020, the SEC adopted Rule 12d1-4 under the 1940 Act (“Rule 12d1-4”) which allows funds to invest in other investment companies in excess of some of the limitations discussed above, subject to certain limitations and conditions. An acquiring fund relying on Rule 12d1-4 must enter into a fund of funds investment agreement with the acquired fund. Rule 12d1-4 outlines the requirements for fund of funds agreements and specifies certain reporting responsibilities of the acquiring fund’s adviser. Rule 12d1-4 became effective January 19, 2021 and rescinded certain types of relief for fund of funds that invest in other investment companies in excess of the limitations under Section 12(d)(1) of the 1940 Act, as discussed above and below, one year after the effective date. The Funds expect to rely on Rule 12d1-4 to the extent the Adviser deems such reliance necessary or appropriate.

Acquired funds typically incur fees that are separate from those fees incurred directly by a Fund. Each Fund’s purchase of such investment company securities results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The NAV and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of the Funds.

Under certain circumstances an open-end investment company in which a Fund invests may determine to make payment of a redemption by the Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, a Fund may hold such securities until a Sub-Adviser determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund.

Investment decisions by the investment advisers to the registered investment companies in which a Fund invests are made independently of the Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances a Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

A Fund will consider its investments in Underlying Funds for purposes of its policy of investing at least 80% of its assets (net assets, plus the amount of any borrowings for investment purposes) in the type of investment or industry suggested by its name.

Mortgage-Backed Securities

A Fund may invest in mortgage-backed securities and derivative mortgage-backed securities and may also invest in “principal only” and “interest only” components. Mortgage-backed securities are securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. As with other debt securities, mortgage-backed securities are subject to credit risk and interest rate risk. However, the yield and maturity characteristics of mortgage-backed securities differ from traditional debt securities. A major difference is that the principal amount of the obligations may normally be prepaid at any time because the underlying assets (*i.e.*, loans) generally may be prepaid at any time. The relationship between prepayments and interest rates may give some mortgage-backed securities less potential for growth in value than conventional fixed-income securities with comparable maturities. In addition, in periods of falling interest rates, the rate of prepayments tends to increase. During such periods, the reinvestment of prepayment proceeds by a Fund will generally be at lower rates than the rates that were carried by the obligations that have been prepaid. If interest rates rise, borrowers may prepay mortgages more slowly than originally expected. This may further reduce the market value of mortgage-backed securities and lengthen their durations. Because of these and other reasons, a mortgage-backed security’s total return, maturity and duration may be difficult to predict precisely.

Mortgage-backed securities come in different classes that have different risks. Junior classes of mortgage-backed securities are designed to protect the senior class investors against losses on the underlying mortgage loans by taking the first loss if there are liquidations among the underlying loans. Junior classes generally receive principal and interest payments only after all required payments have been made to more senior classes. If a Fund invests in junior classes of mortgage-related securities, it may not be able to recover all of its investment in the securities it purchases. In addition, if the underlying mortgage portfolio has been overvalued, or if mortgage values subsequently decline, a Fund may suffer significant losses. Investments in mortgage-backed securities involve the risks of interruptions in the payment of interest and principal (delinquency) and the potential for loss of principal if the property underlying the security is sold as a result of foreclosure on the mortgage (default). These risks include the risks associated with direct ownership of real estate, such as the effects of general and local economic conditions on real estate values, the conditions of specific industry segments, the ability of tenants to make lease payments and the ability of a property to attract and retain tenants, which in turn may be affected by local market conditions such as oversupply of space or a reduction of available space, the ability of the owner to provide adequate maintenance and insurance, energy costs, government regulations with respect to environmental, zoning, rent control and other matters, and real estate and other taxes. If the underlying borrowers cannot pay their mortgage loans, they may default and the lenders may foreclose on the property.

The ability of borrowers to repay mortgage loans underlying mortgage-backed securities will typically depend upon the future availability of financing and the stability of real estate values. For mortgage loans not guaranteed by a government agency or other party, the only remedy of the lender in the event of a default is to foreclose upon the property. If borrowers are not able or willing to pay the principal balance on the loans, there is a good chance that payments on the related mortgage-related securities will not be made. Certain borrowers on underlying mortgages may become subject to bankruptcy proceedings, in which case the value of the mortgage-backed securities may decline.

Mortgage Dollar Rolls

In a mortgage dollar roll transaction, one party sells mortgage-backed securities for delivery in the current month and simultaneously contracts with the same counterparty to repurchase similar (same type, coupon and maturity) but not identical securities on a specified future date. During the period between the sale and repurchase in a mortgage dollar roll transaction, a Fund will not be entitled to receive interest and principal payments on securities sold. Losses may

arise due to changes in the value of the securities or if the counterparty does not perform under the terms of the agreement. If the counterparty files for bankruptcy or becomes insolvent, a Fund's right to repurchase or sell securities may be limited. Mortgage dollar rolls may be subject to leverage risks. In addition, mortgage dollar rolls may increase interest rate risk and result in an increased portfolio turnover rate which increases costs and may increase taxable gains. The benefits of mortgage dollar rolls may depend upon a Fund Sub-Adviser's ability to predict mortgage prepayments and interest rates. There is no assurance that mortgage dollar rolls can be successfully employed. For purposes of diversification and investment limitations, mortgage dollar rolls are considered to be mortgage-backed securities.

Asset-Backed Securities

A Fund may invest in asset-backed securities that, through the use of trusts and special purpose vehicles, are securitized with various types of assets, such as automobile receivables, credit card receivables and home-equity loans in pass-through structures similar to the mortgage-related securities described above. In general, the collateral supporting asset-backed securities is of shorter maturity than the collateral supporting mortgage loans and is less likely to experience substantial prepayments. However, asset-backed securities are not backed by any governmental agency. Credit card receivables are generally unsecured, and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. In addition, some issuers of automobile receivables permit the servicers to retain possession of the underlying obligations. If the servicers were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the related automobile receivables. The impairment of value of collateral or other assets underlying an asset-based security, such as a result of non-payment of loans or non-performance of other collateral or underlying assets, may reduce the value of such asset-based security and result in losses to a Fund.

Bank Loans and Loan Participations

A Fund may invest in bank loans and loan participations. Commercial banks and other financial institutions or institutional investors make corporate loans to companies that need capital to grow or restructure. Borrowers generally pay interest on corporate loans at rates that change in response to changes in market interest rates such as SOFR or the prime rates of U.S. banks. As a result, the value of corporate loan investments is generally less exposed to the adverse effects of shifts in market interest rates than investments that pay a fixed rate of interest. However, because the trading market for certain corporate loans may be less developed than the secondary market for bonds and notes, a Fund may experience difficulties in selling its corporate loans. A Fund may make certain corporate loan investments as part of a broader group of lenders (together often referred to as a "syndicate") that is represented by a leading financial institution (or agent bank). The syndicate's agent arranges the corporate loans, holds collateral and accepts payments of principal and interest. If the agent develops financial problems or is terminated, a Fund may not recover its investment or recovery may be delayed. Corporate loans may be denominated in currencies other than U.S. Dollars and are subject to the credit risk of nonpayment of principal or interest. Further, substantial increases in interest rates may cause an increase in loan defaults. Although the loans will generally be fully collateralized at the time of acquisition, the collateral may decline in value, be relatively illiquid or lose all or substantially all of its value subsequent to investment. If a borrower files for protection from its creditors under the U.S. bankruptcy laws, these laws may limit a Fund's rights to the collateral. In addition, the value of collateral may erode during a bankruptcy case. In the event of a bankruptcy, the holder of a corporate loan may not recover its principal, may experience a long delay in recovering its investment and may not receive interest during the delay.

A Fund may also invest in second lien loans (secured loans with a claim on collateral subordinate to a senior lender's claim on such collateral) and unsecured loans. Holders' claims under unsecured loans are subordinated to claims of creditors holding secured indebtedness and possibly other classes of creditors holding unsecured debt. Unsecured loans have a greater risk of default than secured loans, particularly during periods of deteriorating economic conditions. Also,

since they do not afford the lender recourse to collateral, unsecured loans are subject to greater risk of nonpayment in the event of default than secured loans. Many such loans are relatively illiquid and may be difficult to value.

Some bank loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the bank loans to presently existing or future indebtedness of the borrower or take other action detrimental to the holders of the bank loans, including, in certain circumstances, invalidating such bank loans or causing interest previously paid to be refunded to the borrower. If interest were required to be refunded, it could negatively affect Fund performance.

Indebtedness of companies whose creditworthiness is poor involves substantially greater risks and may be highly speculative. Some companies may never pay off their indebtedness or pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, a Fund bears a substantial risk of losing the entire amount invested.

Investments in bank loans through a direct assignment of the financial institution's interest with respect to the bank loan may involve additional risks. For example, if a secured bank loan is foreclosed, a Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, the Fund could be held liable as a co-lender. A Fund generally will treat the corporate borrower as the "issuer" of indebtedness held by the Fund. In the case of loan participations where a bank or other lending institution serves as a financial intermediary between a Fund and the corporate borrower, if the participation does not shift to the Fund the direct debtor-creditor relationship with the corporate borrower, SEC interpretations require the Fund to treat both the lending bank or other lending institution and the corporate borrower as "issuers".

Bank loans may be structured to include both term loans, which are generally fully funded at the time of investment, and revolving credit facilities, which would require a Fund to make additional investments in the bank loans as required under the terms of the credit facility at the borrower's demand.

A financial institution's employment as agent bank may be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor agent bank would generally be appointed to replace the terminated agent bank, and assets held by the agent bank under the loan agreement would remain available to the holders of such indebtedness. However, if assets held by the agent bank for the benefit of a Fund were determined to be subject to the claims of the agent bank's general creditors, the Fund may incur certain costs and delays in realizing payments on a bank loan or loan participation and could suffer a loss of principal and/or interest.

SHORT-TERM INVESTMENTS

Each Fund may invest in any of the following securities and instruments:

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. Each Fund may acquire certificates of deposit, bankers' acceptances and time deposits in U.S. Dollar or foreign currencies. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. The commercial banks issuing these short-term instruments which a Fund may acquire must, at the time of purchase, have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government. If a Fund holds instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred if a Fund invests only in debt obligations of U.S. domestic issuers.

See “Foreign Investments” above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located, the possible confiscation or nationalization of foreign deposits, the possible establishment of exchange controls, or the adoption of other foreign governmental restrictions which may adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds and the interest income generated from lending operations. General economic conditions and the quality of loan portfolios affect the banking industry.

As a result of federal and state laws and regulations, domestic banks are required to maintain specified levels of reserves, limited in the amount that they can loan to a single borrower, and are subject to regulations designed to promote financial soundness. However, such laws and regulations may not necessarily apply to foreign banks, thereby affecting the risk involved in bank obligations that a Fund may acquire.

In addition to purchasing certificates of deposit and bankers’ acceptances, to the extent permitted under its investment strategies and policies stated above and in the Prospectus, a Fund may invest in interest-bearing time deposits or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. Each Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. Each Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Each Fund’s investment in commercial paper and short-term notes will consist of issues rated at the time of purchase “A-2” or higher by S&P, “Prime-1” or “Prime-2” by Moody’s, or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by a Sub-Adviser to be of comparable quality. These rating symbols are described in Appendix A.

Corporate debt obligations are subject to the risk of an issuer’s inability to meet principal and interest payments on the obligations, *i.e.*, credit risk. A Sub-Adviser may actively expose a Fund to credit risk. However, there can be no guarantee that a Sub-Adviser will be successful in making the right selections and thus fully mitigate the impact of credit risk changes on a Fund.

OTHER INVESTMENT STRATEGIES, POLICIES AND RISKS

MARKET CONDITIONS

Events in certain sectors historically have resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other events related to the sub-prime mortgage crisis in 2008; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits; social, political, and economic instability in Europe; economic stimulus by the Japanese central bank; steep declines in oil prices; dramatic changes in currency exchange rates; China’s economic slowdown; and public health crises (including the occurrence of

a contagious disease or illness, such as COVID-19). Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Such events may cause significant declines in the values and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

Current events such as the political turmoil within the U.S. and abroad may also impact a Fund. Although the U.S. government has honored its credit obligations, it remains possible that the U.S. could default on its obligations. While it is impossible to predict the consequences of such an unprecedented event, it is likely that a default by the U.S. would be highly disruptive to the U.S. and global securities markets and could significantly impair the value of the Fund's investments. Similarly, political events within the U.S. at times have resulted, and may in the future result, in a shutdown of government services, which could negatively affect the U.S. economy, decrease the value of the Fund's investments, and increase uncertainty in or impair the operation of the U.S. or other securities markets. In recent years, the U.S. renegotiated many of its global trade relationships and imposed or threatened to impose significant import tariffs. These actions could lead to price volatility and overall declines in U.S. and global investment markets. The current contentious domestic political environment, as well as political and diplomatic events within the U.S. and abroad, such as presidential elections in the U.S. or abroad may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations.

FOREIGN CURRENCY TRANSACTIONS

A Fund may conduct foreign currency exchange transactions either on a spot, *i.e.*, cash, basis at the prevailing rate in the foreign exchange market or by entering into a forward foreign currency contract. A forward foreign currency contract ("forward contract") involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are considered to be derivatives. A Fund enters into forward contracts in order to "lock in" the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, a Fund may enter into forward contracts to hedge against risks arising from securities a Fund owns or anticipates purchasing or the U.S. Dollar value of interest and dividends paid on those securities.

If a Fund delivers the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency by selling some of the Fund's assets that are denominated in that specific currency. A Fund may close out a forward contract obligating it to purchase a foreign currency by selling an offsetting contract, in which case it will realize a gain or a loss.

Foreign currency transactions involve certain costs and risks. A Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if a Sub-Adviser is inaccurate in predicting currency movements. The projection of short-term currency market movements is extremely difficult, and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for a Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and deliver the foreign currency. The use of forward contracts as a hedging technique does not eliminate the fluctuation in the prices of the underlying securities the Fund owns or intends to acquire, but it fixes a rate of exchange in advance. Although forward contracts can reduce the risk of loss if the values of the hedged currencies decline, these instruments also limit the potential gain that might result from an increase in the value of the hedged currencies.

There is no systematic reporting of last sale information for foreign currencies, and there is no regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis. Quotation

information available is generally representative of very large transactions in the interbank market. The interbank market in foreign currencies is a global around-the-clock market. Since foreign currency transactions occurring in the interbank market involve substantially larger amounts than those that may be involved in the use of foreign currency options, a Fund may be disadvantaged by having to deal in an odd lot market (generally consisting of transactions of less than \$1 million) for the underlying foreign currencies at prices that are less favorable than for round lots. A Fund may take positions in options on foreign currencies in order to hedge against the risk of foreign exchange fluctuation on foreign securities the Fund holds in its portfolio or which it intends to purchase.

CLOSED-END FUNDS

A Fund may invest in shares of closed-end funds. Investments in closed-end funds are subject to various risks, including reliance on management's ability to meet the closed-end fund's investment objective and to manage the closed-end fund portfolio; fluctuation in the NAV of closed-end fund shares compared to the changes in the value of the underlying securities that the closed-end fund owns; and bearing a pro rata share of the management fees and expenses of each underlying closed-end fund resulting in a Fund's shareholders being subject to higher expenses than if he or she invested directly in the closed-end fund(s).

DEBT SECURITIES

Sovereign Debt Obligations

A Fund may invest in sovereign debt obligations, which are securities issued or guaranteed by foreign governments, governmental agencies or instrumentalities and political subdivisions, including debt of developing countries. Sovereign debt may be in the form of conventional securities or other types of debt instruments such as loans or loan participations. Sovereign debt of developing countries may involve a high degree of risk, and may be in default or present the risk of default. Governmental entities responsible for repayment of the debt may be unable or unwilling to repay principal and pay interest when due, and may require renegotiation or rescheduling of debt payments. In addition, prospects for repayment of principal and payment of interest may depend on political as well as economic factors. Although some sovereign debt, such as Brady Bonds, is collateralized by U.S. Government securities, repayment of principal and payment of interest is not guaranteed by the U.S. Government. There is no bankruptcy proceeding by which sovereign debt on which governmental entities have defaulted may be collected in whole or in part.

SHORT SALES

A Fund may seek to hedge investments or realize additional gains through the use of short sales. A short sale is a transaction in which a Fund sells a security it does not own (i.e., by first borrowing that security from a broker-dealer) in anticipation that the market price of that security will decline. To close out such a sale, a Fund will purchase the security that it sold and then return the security to the broker-dealer that loaned the Fund that security initially. If the price of the security sold short increases between the time of the short sale and the time a Fund purchases and returns the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss will be increased, by the transaction costs incurred by a Fund, including the costs associated with providing collateral to the broker-dealer (usually cash and liquid investments) and the maintenance of collateral with its custodian. A Fund also may be required to pay a premium to borrow a security, which would increase the cost of the security sold short. Although a Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

The broker-dealer will retain the net proceeds of the short sale to the extent necessary to meet margin requirements until the short position is closed out.

When a Sub-Adviser believes that the price of a particular security held by a Fund may decline, it may make “short sales against the box” to hedge the unrealized gain on such security. Selling short against the box involves selling a security which a Fund owns for delivery at a specified date in the future. A Fund will incur transaction costs to open, maintain and close short sales against the box.

DERIVATIVES

A Fund may utilize a variety of derivatives contracts, such as futures, options, swaps and forward contracts, both for investment purposes and for hedging purposes. Hedging involves special risks including the possible default by the other party to the transaction, decreased liquidity and, to the extent a Sub-Adviser’s assessment of certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if hedging had not been used. Nonetheless, with respect to certain investment positions, a Fund may not be sufficiently hedged against market fluctuations, in which case an investment position could result in a loss greater than if a Sub-Adviser had been sufficiently hedged with respect to such position.

The Sub-Advisers will not, in general, attempt to hedge all market or other risks inherent in a Fund’s positions, and may hedge certain risks, if at all, only partially. Specifically, a Sub-Adviser may choose not, or may determine that it is economically unattractive, to hedge certain risks, either in respect of particular positions or in respect of a Fund’s overall portfolio. Moreover, it should be noted that a Fund’s portfolio always will be exposed to unidentified systematic risk factors and to certain risks that cannot be completely hedged, such as credit risk (relating both to particular securities and to counterparties). A Fund’s portfolio composition may result in various directional market risks remaining unhedged, although a Sub-Adviser may rely on diversification to control such risks to the extent that a Sub-Adviser believes it is desirable to do so.

Rule 18f-4 under the 1940 Act permits the Funds to enter into Derivatives Transactions (as defined below) and certain other transactions notwithstanding the restrictions on the issuance of “senior securities” under Section 18 of the 1940 Act. Section 18 of the 1940 Act, among other things, prohibits open-end funds, including the Funds, from issuing or selling any “senior security,” other than borrowing from a bank (subject to a requirement to maintain 300% “asset coverage”).

Under Rule 18f-4, “Derivatives Transactions” include the following: (1) any swap, security-based swap (including a contract for differences), futures contract, forward contract, option (excluding purchased options), any combination of the foregoing, or any similar instrument, under which a Fund is or may be required to make any payment or delivery of cash or other assets during the life of the instrument or at maturity or early termination, whether as margin or settlement payment or otherwise; (2) any short sale borrowing; (3) reverse repurchase agreements and similar financing transactions (e.g., recourse and non-recourse tender option bonds, and borrowed bonds), if the Fund elects to treat these transactions as Derivatives Transactions under Rule 18f-4; and (4) when-issued or forward-settling securities (e.g., firm and standby commitments, including to-be-announced commitments, and dollar rolls) and non-standard settlement cycle securities, unless the Fund intends to physically settle the transaction and the transaction will settle within 35 days of its trade date (the “Delayed-Settlement Securities Provision”).

The North Square Strategic Income Fund does not intend to rely on the Limited Derivatives User Exception (as defined below). Accordingly, the North Square Strategic Income Fund must comply with Rule 18f-4 with respect to its Derivatives Transactions. Rule 18f-4, among other things, requires the North Square Strategic Income Fund to adopt and implement a comprehensive written derivatives risk management program (“DRMP”) and comply with a relative or absolute limit on Fund leverage risk calculated based on value-at-risk (“VaR”). The DRMP is administered by a “derivatives risk manager,” who is appointed by the Board, including a majority of Independent Trustees (as such term is defined below under “Management of the Funds”), and periodically reviews the DRMP and reports to the Board.

Rule 18f-4 provides an exception from the DRMP, VaR limit and certain other requirements if a Fund’s “derivatives exposure” (as defined in Rule 18f-4) is limited to 10% of its net assets (as calculated in accordance with Rule 18f-4) and the Fund adopts and implements written policies and procedures reasonably designed to manage its derivatives risks

(the “Limited Derivatives User Exception”).

Certain additional risk factors related to derivatives are discussed below:

Derivatives Risk. Under regulations promulgated by the Commodity Futures Trading Commission (“CFTC”), transactions in some types of interest rate swaps and index credit default swaps on North American and European indices will be required to be cleared. In a cleared derivatives transaction, a Fund’s counterparty is a clearing house (such as CME Clearing, ICE Clearing or LCH Clearnet), rather than a bank or broker. Since each Fund is not a member of clearing houses and only members of a clearing house can participate directly in the clearing house, the Funds will hold cleared derivatives through accounts at clearing members, which are CFTC regulated futures commission merchants with the appropriate regulatory approvals to engage in swap transactions. The Funds will make and receive payments owed under cleared derivatives transactions (including margin payments) through their accounts at clearing members. Clearing members guarantee performance of their clients’ obligations to the clearing house. In contrast to bilateral derivatives transactions, following a period of advance notice to the Funds, clearing members generally can require termination of existing cleared derivatives transactions at any time and increases in margin above the margin that it required at the beginning of a transaction. Clearing houses also have broad rights to increase margin requirements for existing transactions and to terminate transactions. Any such increase or termination could interfere with the ability of a Fund to pursue its investment strategy. Also, a Fund is subject to execution risk if it enters into a derivatives transaction that is required to be cleared (or that a Sub-Adviser expects to be cleared), and no clearing member is willing or able to clear the transaction on the Fund’s behalf. While the documentation in place between the Funds and their clearing members generally provides that the clearing members will accept for clearing all transactions submitted for clearing that are within credit limits specified by the clearing members in advance, a Fund could be subject to this execution risk if the Fund submits for clearing transactions that exceed such credit limits, if the clearing house does not accept the transactions for clearing, or if the clearing members do not comply with their agreement to clear such transactions. In that case, the transaction might have to be terminated, and a Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the transaction. In addition, new regulations could, among other things, restrict a Fund’s ability to engage in, or increase the cost to the Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to the Fund or increasing margin or capital requirements. If a Fund is not able to enter into a particular derivatives transaction, the Fund’s investment performance and risk profile could be adversely affected as a result.

Counterparty Risk. Counterparty risk with respect to OTC derivatives may be affected by new regulations promulgated by the CFTC and SEC affecting the derivatives market. As described under “Derivatives Risk” above, some derivatives transactions are required to be cleared, and a party to a cleared derivatives transaction is subject to the credit risk of the clearing house and the clearing member through which it holds its cleared position, rather than the credit risk of its original counterparty to the derivative transaction. Clearing members are required to segregate all funds received from customers with respect to cleared derivatives transactions from the clearing member’s proprietary assets. However, all funds and other property received by a clearing broker from its customers are generally held by the clearing broker on a commingled basis in an omnibus account, which may also invest those funds in certain instruments permitted under the applicable regulations. The assets of a Fund might not be fully protected in the event of the bankruptcy of the Fund’s clearing member because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker’s customers for a relevant account class. Also, the clearing member transfers to the clearing house the amount of margin required by the clearing house for cleared derivatives transactions, which amounts are generally held in an omnibus account at the clearing house for all customers of the clearing member. For commodities futures positions, the clearing house may use all of the collateral held in the clearing member’s omnibus account to meet a loss in that account, without regard to which customer in fact supplied that collateral. Accordingly, in addition to bearing the credit risk of its clearing member, each customer to a futures

transaction also bears “fellow customer” risk from other customers of the clearing member. However, with respect to cleared swaps positions, regulations promulgated by the CFTC require that the clearing member notify the clearing house of the amount of initial margin provided by the clearing member to the clearing house that is attributable to each customer. Because margin in respect of cleared swaps must be earmarked for specific clearing member customers, the clearing house may not use the collateral of one customer to cover the obligations of another customer. However, if the clearing member does not provide accurate reporting, a Fund is subject to the risk that a clearing house will use the Fund’s assets held in an omnibus account at the clearing house to satisfy payment obligations of a defaulting customer of the clearing member to the clearing house. In addition, a clearing member may generally choose to provide to the clearing house the net amount of variation margin required for cleared swaps for all of the clearing member’s customers in the aggregate, rather than the gross amount of each customer. A Fund is therefore subject to the risk that a clearing house will not make variation margin payments owed to the Fund if another customer of the clearing member has suffered a loss and is in default.

Options on Securities and Securities Indices

A call option would entitle a Fund, in return for the premium paid, to purchase specified securities at a specified price during the option period. A put option would entitle a Fund, in return for the premium paid, to sell specified securities during the option period. A Fund may invest in both European-style or American-style options. A European-style option is only exercisable immediately prior to its expiration. American-style options are exercisable at any time prior to the expiration date of the option.

Writing Call Options. A call option is “covered” if a Fund owns the security underlying the call or has an absolute right to acquire the security without additional cash consideration (or, if additional cash consideration is required, cash or cash equivalents in such amounts as held in a segregated account by the Fund’s custodian). The writer of a call option receives a premium and gives the purchaser the right to buy the security underlying the option at the exercise price. The writer has the obligation upon exercise of the option to deliver the underlying security against payment of the exercise price during the option period. If the writer of an exchange-traded option wishes to terminate his obligation, he may effect a “closing purchase transaction.” This is accomplished by buying an option of the same series as the option previously written. A writer may not effect a closing purchase transaction after it has been notified of the exercise of an option.

Effecting a closing transaction in a written call option will permit a Fund to write another call option on the underlying security with either a different exercise price, expiration date or both. Also, effecting a closing transaction will permit the cash or proceeds from the concurrent sale of any securities subject to the option to be used for other investments of a Fund. If a Fund desires to sell a particular security from its portfolio on which it has written a call option, it will effect a closing transaction prior to or concurrent with the sale of the security.

A Fund will realize a gain from a closing transaction if the cost of the closing transaction is less than the premium received from writing the option or if the proceeds from the closing transaction are more than the premium paid to purchase the option. A Fund will realize a loss from a closing transaction if the cost of the closing transaction is more than the premium received from writing the option or if the proceeds from the closing transaction are less than the premium paid to purchase the option. However, because increases in the market price of a call option will generally reflect increases in the market price of the underlying security, any loss to a Fund resulting from the repurchase of a call option is likely to be offset in whole or in part by appreciation of the underlying security owned by a Fund.

If a Fund were assigned an exercise notice on a call it has written, it would be required to liquidate portfolio securities in order to satisfy the exercise, unless it has other liquid investments that are sufficient to satisfy the exercise of the call. If the Fund has written a call, there is also a risk that the market may decline between the time the Fund has a call

exercised against it, at a price which is fixed as of the closing level of the index on the date of exercise, and the time it is able to sell securities in its portfolio.

In addition to covered call options, a Fund may write uncovered (or “naked”) call options on securities, including shares of ETFs, and indices. A Fund will have to enter into collateral arrangements with the option buyer (i.e., a broker-dealer in the case of an exchange traded option) and its custodian to support the Fund’s obligations under any call option that it writes.

Writing Covered Index Call Options. A Fund may sell index call options. A Fund may also execute a closing purchase transaction with respect to the option it has sold and then sell another option with either a different exercise price and/or expiration date. A Fund’s objective in entering into such closing transactions is to increase option premium income, to limit losses or to protect anticipated gains in the underlying stocks. The cost of a closing transaction, while reducing the premium income realized from the sale of the option, should be offset, at least in part, by the appreciation in the value of the underlying index, and by the opportunity to realize additional premium income from selling a new option.

When a Fund sells an index call option, it does not deliver the underlying stocks or cash to the broker through whom the transaction is effected. In the case of an exchange-traded option, a Fund establishes an escrow account. The Funds’ custodian (or a securities depository acting for the custodian) acts as each Fund’s escrow agent. The escrow agent enters into documents known as escrow receipts with respect to the stocks included in a Fund (or escrow receipts with respect to other acceptable securities). The escrow agent releases the stocks from the escrow account when the call option expires or a Fund enters into a closing purchase transaction. Until such release, the underlying stocks cannot be sold by a Fund. A Fund may enter into similar collateral arrangements with the counterparty when it sells OTC index call options.

The purchaser of an index call option sold by a Fund may exercise the option at a price fixed as of the closing level of the index on exercise date. Unless a Fund has liquid investments sufficient to satisfy the exercise of the index call option, a Fund would be required to liquidate portfolio securities to satisfy the exercise. The market value of such securities may decline between the time the option is exercised and the time a Fund is able to sell the securities. For example, even if an index call which the Fund has written is “covered” by an index call held by the Fund with the same strike price, it will bear the risk that the level of the index may decline between the close of trading on the date the exercise notice is filed with the Options Clearing Corporation and the close of trading on the date the Fund exercises the call it holds or the time it sells the call, which in either case would occur no earlier than the day following the day the exercise notice was filed. If a Fund fails to anticipate an exercise, it may have to borrow from a bank (in amounts not exceeding 5% of a Fund’s total assets) pending settlement of the sale of the portfolio securities and thereby incur interest charges. If trading is interrupted on the index, a Fund would not be able to close out its option positions.

Risks of Transactions in Options. There are several risks associated with transactions in options on securities and indices. Options may be more volatile than the underlying securities and, therefore, on a percentage basis, an investment in options may be subject to greater fluctuation in value than an investment in the underlying securities themselves. There are also significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objective. In addition, a liquid secondary market for particular options may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options of underlying securities; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or clearing corporation may not be adequate to handle current trading volume at all times; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been

issued by a clearing corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. The extent to which a Fund may enter into options transactions may be limited by the requirements of the Code, for qualification of a Fund as a regulated investment company.

Over-the-Counter Options. Certain additional risks are specific to OTC options. A Fund may engage a clearing corporation to exercise exchange-traded options, but if a Fund purchased an OTC option, it must then rely on the dealer from which it purchased the option if the option is exercised. Failure by the dealer to do so would result in the loss of the premium paid by a Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while OTC options may not. Consequently, a Fund may generally be able to realize the value of an OTC option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when a Fund writes an OTC option, the Fund may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom the Fund originally wrote the option. While a Fund will seek to enter into OTC options only with dealers who will agree to and are expected to be capable of entering into closing transactions with the Fund, there can be no assurance that a Fund will at any time be able to liquidate an OTC option at a favorable price at any time prior to expiration. Unless a Fund, as a covered OTC call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, a Fund may be unable to liquidate an OTC option. With respect to options written by a Fund, the inability to enter into a closing transaction may result in material losses to a Fund. For example, since each Fund must maintain a secured position with respect to any call option on a security it writes, a Fund may not sell the assets which it has segregated to secure the position while it is obligated under the option. This requirement may impair a Fund's ability to sell portfolio securities at a time when such sale might be advantageous.

Stock Index Options. A Fund may invest in options on indices, including broad-based security indices. Puts and calls on indices are similar to puts and calls on other investments except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities. When a Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple ("multiplier"), which determines the total dollar value for each point of such difference. When a Fund buys a call on an index, it pays a premium and has the same rights as to such call as are indicated above. When a Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund's exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When a Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and exercise price times the multiplier if the closing level is less than the exercise price.

The risks of investment in options on indices may be greater than options on securities. Because index options are settled in cash, if a Fund writes a call on an index it cannot provide in advance for its potential settlement obligations by acquiring and holding the underlying index. A Fund can offset some of the risk of writing a call index option by holding a diversified portfolio of securities or instruments similar to those on which the underlying index is based. However, a Fund cannot, as a practical matter, acquire and hold a portfolio containing exactly the same securities or

instruments as underlie the index and, as a result, bears a risk that the value of the securities or instruments held will vary from the value of the index.

Even if a Fund could assemble a portfolio that exactly reproduced the composition of the underlying index, it still would not be fully covered from a risk standpoint because of the “timing risk” inherent in writing index options. When an index option is exercised, the amount of cash that the holder is entitled to receive is determined by the difference between the exercise price and the closing index level on the date when the option is exercised. As with other kinds of options, a Fund as the call writer will not learn of the assignment until the next business day at the earliest. The time lag between exercise and notice of assignment poses no risk for the writer of a covered call on a specific underlying security or instrument, such as common stock, because there the writer’s obligation is to deliver the underlying security or instrument, not to pay its value as of a fixed time in the past. So long as the writer already owns the underlying security or instrument, it can satisfy its settlement obligations by simply delivering it, and the risk that its value may have declined since the exercise date is borne by the exercising holder. In contrast, even if the writer of an index call holds investments that exactly match the composition of the underlying index, it will not be able to satisfy its assignment obligations by delivering those investments against payment of the exercise price. Instead, it will be required to pay cash in an amount based on the closing index value on the exercise date. By the time it learns that it has been assigned, the index may have declined, with a corresponding decline in the value of its portfolio. This “timing risk” is an inherent limitation on the ability of index call writers to cover their risk exposure by holding security or instrument positions. If a Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, a Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

Futures and Options on Futures

A Fund may use interest rate, foreign currency, index and other futures contracts. A Fund may use options on futures contracts. A futures contract provides for the future sale by one party and purchase by another party of a specified quantity of the security or other financial instrument at a specified price and time. A futures contract on an index is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract originally was written. Although the value of an index might be a function of the value of certain specified securities, physical delivery of these securities is not always made. A public market exists in futures contracts covering a number of indices, as well as financial instruments, including, without limitation: U.S. Treasury bonds; U.S. Treasury notes; GNMA Certificates; three-month U.S. Treasury bills; 90-day commercial paper; bank certificates of deposit; Eurodollar certificates of deposit; the Australian Dollar; the Canadian Dollar; the British Pound; the Japanese Yen; the Swiss Franc; the Mexican Peso; and certain multinational currencies, such as the Euro. It is expected that other futures contracts will be developed and traded in the future.

A Fund may purchase and write (sell) call and put futures options. Futures options possess many of the same characteristics as options on securities and indices (discussed above). A futures option gives the holder the right, in return for the premium paid, to assume a long position (call) or short position (put) in a futures contract at a specified exercise price upon expiration of, or at any time during the period of, the option. Upon exercise of a call option, the holder acquires a long position in the futures contract and the writer is assigned the opposite short position. In the case of a put option, the opposite is true. When a purchase or sale of a futures contract is made by a Fund, the Fund is required to deposit with its futures commission merchant a specified amount of liquid investments (“initial margin”). The margin required for a futures contract is set by the exchange on which the contract is traded and may be modified during the term of the contract. The initial margin is in the nature of a performance bond or good faith deposit on the futures contract that is returned to the Fund upon termination of the contract, assuming all contractual obligations have been satisfied. A Fund expects to earn taxable interest income on its initial margin deposits.

A Fund, as a writer of an option, may have no control over whether the underlying futures contracts may be sold (call) or purchased (put) and as a result, bears the market risk of an unfavorable change in the valuation of the futures contracts underlying the written option. A Fund, as a purchaser of an option, bears the risk that the counterparties to the option may not have the ability to meet the terms of the option contract.

Futures and options on futures are regulated by the CFTC. A Fund invests in futures, options on futures and other instruments subject to regulation by the CFTC in reliance upon and in accordance with CFTC Regulation 4.5. Under Regulation 4.5, if a Fund uses futures, options on futures, or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options that are “in-the-money” at the time of purchase of a new position are “in-the-money”) may not exceed 5% of a Fund’s liquidation value, or alternatively, the aggregate net notional value of those positions at the time may not exceed 100% of a Fund’s liquidation value (after taking into account unrealized profits and unrealized losses on any such positions). The Trust, on behalf of each Fund, has filed a notice of eligibility for exclusion from the definition of the term “commodity pool operator” in accordance with CFTC Regulation 4.5. Therefore, as of the date of this SAI, neither the Trust nor a Fund is subject to regulation as a “commodity pool” under the Commodity Exchange Act (“CEA”). As of the date of this SAI, neither the Adviser nor the Sub-Advisers are deemed to be a “commodity pool operator” or “commodity trading adviser” with respect to the advisory services it provides to each Fund. In the future, if a Fund’s use of futures, options on futures, or swaps requires the Adviser and Sub-Advisers to register as a commodity pool operator with the CFTC with respect to the Funds, the Adviser and Sub-Advisers will do so at that time. A futures contract held by a Fund is valued daily at the official settlement price of the exchange on which it is traded. Each day a Fund pays or receives cash, called “variation margin,” equal to the daily change in value of the futures contract. This process is known as “marking to market.” Variation margin does not represent a borrowing or loan by a Fund but is instead a settlement between a Fund and the broker of the amount one would owe the other if the futures contract expired. In computing daily NAV, a Fund will mark to market its open futures positions. A Fund also is required to deposit and to maintain margin with respect to put and call options on futures contracts written by it. Such margin deposits will vary depending on the nature of the underlying futures contract (and the related initial margin requirements), the current market value of the option and other futures positions held by a Fund. Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (involving the same exchange, underlying security or index and delivery month). If an offsetting purchase price is less than the original sale price, a Fund realizes a capital gain, or if it is more, a Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, a Fund realizes a capital gain, or if it is less, a Fund realizes a capital loss. The transaction costs also must be included in these calculations.

A Fund may write covered straddles consisting of a call and a put written on the same underlying futures contract. A straddle will be covered when sufficient assets are deposited to meet a Fund’s immediate obligations. A Fund may use the same liquid investments to cover both the call and put options if the exercise price of the call and put are the same, or if the exercise price of the call is higher than that of the put. In such cases, a Fund also will segregate liquid investments equivalent to the amount, if any, by which the put is “in the money.”

Stock Index Futures

A Fund may invest in stock index futures only as a substitute for a comparable market position in the underlying securities. A stock index future obligates the seller to deliver (and the purchaser to accept), effectively, an amount of cash equal to a specific dollar amount times the difference between the value of a specific stock index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying stocks in the index is made. With respect to stock indices that are permitted investments, a Fund intends to purchase and sell futures contracts on the stock index for which it can obtain the best price with consideration also given to liquidity.

Swap Transactions

A Fund may enter into interest rate, currency and index swaps and the purchase or sale of related caps, floors and collars. A Fund may enter into these transactions to preserve a return or spread on a particular investment or portion of its portfolio, to protect against currency fluctuations or to protect against any increase in the price of securities it anticipates purchasing at a later date. Swaps may be used in conjunction with other instruments to offset interest rate, currency or other underlying risks. For example, interest rate swaps may be offset with “caps,” “floors” or “collars.” A “cap” is essentially a call option which places a limit on the amount of floating rate interest that must be paid on a certain principal amount. A “floor” is essentially a put option which places a limit on the minimum amount that would be paid on a certain principal amount. A “collar” is essentially a combination of a long cap and a short floor where the limits are set at different levels.

A Fund will usually enter into swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with a Fund receiving or paying, as the case may be, only the net amount of the two payments.

The use of swap transactions by a Fund entails certain risks, which may be different from, or possibly greater than, the risks associated with investing directly in the securities and other investments that are the referenced asset for the swap transaction. Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with stocks, bonds, and other traditional investments. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index, but also of the swap itself, without the benefit of observing the performance of the swap under all the possible market conditions. Because some swap transactions have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. Certain swaps have the potential for unlimited loss, regardless of the size of the initial investment.

Total Return Swaps. A Fund may enter into total return swap contracts for investment purposes. Total return swaps are contracts in which one party agrees to make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indices during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets. Total return swaps may be used to obtain exposure to a security or market without owning or taking physical custody of such security or market, including in cases in which there may be disadvantages associated with direct ownership of a particular security. In a typical total return equity swap, payments made by a Fund or the counterparty are based on the total return of a particular reference asset or assets (such as an equity security, a combination of such securities, or an index). That is, one party agrees to pay another party the return on a stock, basket of stocks, or stock index in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Total return swaps involve not only the risk associated with the investment in the underlying securities, but also the risk of the counterparty not fulfilling its obligations under the agreement.

Credit Default Swaps. A Fund may enter into credit default swap transactions for investment purposes. A credit default swap may have as reference obligations one or more securities that are not currently held by a Fund. A Fund may be either the buyer or seller in the transaction. Credit default swaps may also be structured based on the debt of a basket of issuers, rather than a single issuer, and may be customized with respect to the default event that triggers purchase or other factors. As a seller, a Fund would generally receive an upfront payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full face amount of deliverable obligations of the reference obligations that may have little or no value. The notional value of the credit default swap will be used to segregate liquid investments for selling protection on credit default swaps. If a Fund were a buyer and no credit event occurs, the Fund would recover nothing if the swap is held through its termination date. However, if a credit event

occurs, the buyer may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference obligation that may have little or no value.

A Fund may also purchase credit default swap contracts in order to hedge against the risk of default of the debt of a particular issuer or basket of issuers, in which case the Fund would function as the counterparty referenced in the preceding paragraph. This would involve the risk that the investment may expire worthless and would only generate income in the event of an actual default by the issuer(s) of the underlying obligation(s) (or, as applicable, a credit downgrade or other indication of financial instability). It would also involve the risk that the seller may fail to satisfy its payment obligations to a Fund in the event of a default. The purchase of credit default swaps involves costs, which will reduce a Fund's return.

Currency Swaps. A Fund may enter into currency swap transactions for investment purposes. Currency swaps are similar to interest rate swaps, except that they involve multiple currencies. A Fund may enter into a currency swap when it has exposure to one currency and desires exposure to a different currency. Typically, the interest rates that determine the currency swap payments are fixed, although occasionally one or both parties may pay a floating rate of interest. Unlike an interest rate swap, however, the principal amounts are exchanged at the beginning of the contract and returned at the end of the contract. In addition to paying and receiving amounts at the beginning and termination of the agreements, both sides will also have to pay in full periodically based upon the currency they have borrowed. Changes in foreign exchange rates and changes in interest rates, as described above, may negatively affect currency swaps.

Interest Rate Swaps. A Fund may enter into an interest rate swap in an effort to protect against declines in the value of fixed income securities held by a Fund. In such an instance, a Fund may agree to pay a fixed rate (multiplied by a notional amount) while a counterparty agrees to pay a floating rate (multiplied by the same notional amount). If interest rates rise, resulting in a diminution in the value of the Fund's portfolio, the Fund would receive payments under the swap that would offset, in whole or in part, such diminution in value.

Options on Swaps. A Fund may enter into options on swap agreements. An option on a swap agreement, or a "swaption," is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. In return, the purchaser pays a "premium" to the seller of the contract. The seller of the contract receives the premium and bears the risk of unfavorable changes on the underlying swap. A Fund may write (sell) and purchase put and call swaptions. A Fund may also enter into swaptions on either an asset-based or liability-based basis, depending on whether a Fund is hedging its assets or its liabilities. A Fund may write (sell) and purchase put and call swaptions to the same extent it may make use of standard options on securities or other instruments. A Fund may enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its holdings, as a duration management technique, to protect against an increase in the price of securities the Fund anticipates purchasing at a later date, or for any other purposes, such as for speculation to increase returns. Swaptions are generally subject to the same risks involved in a Fund's use of options.

Depending on the terms of the particular option agreement, a Fund will generally incur a greater degree of risk when it writes a swaption than it will incur when it purchases a swaption. When a Fund purchases a swaption, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when a Fund writes a swaption, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

Over-the-Counter Derivatives Transactions

A Fund may enter into OTC derivatives transactions. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), which was signed into law on July 21, 2010, established a new statutory framework that comprehensively regulates the OTC derivatives markets. Prior to the Dodd-Frank Act, the OTC derivatives markets

were traditionally traded on a bilateral basis (so-called “bilateral OTC transactions”). Now certain OTC derivatives contracts are required to be centrally cleared and traded on exchanges or electronic trading platforms called swap execution facilities (“SEFs”).

Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. Without the availability of a clearing corporation, bilateral OTC transaction pricing is normally done by reference to information from market makers, which information is carefully monitored by the Sub-Advisers and verified in appropriate cases. As bilateral OTC transactions are entered into directly with a dealer, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under CFTC regulations, counterparties of registered swap dealers and major swap participants have the right to elect segregation of initial margin in respect of uncleared swaps. If a counterparty makes such an election, any initial margin that is posted to the swap dealer or major swap participant must be segregated in individual customer accounts held at an independent third party custodian. In addition, the collateral may only be invested in certain categories of instruments identified in the CFTC’s regulations. Agreements covering these segregation arrangements must generally provide for consent by both the counterparty and the swap dealer or major swap participant to withdraw margin from the segregated account. Given these limitations on the use of uncleared swaps collateral, there is some likelihood that the electing counterparty will experience an increase in the costs associated with trading swaps with the relevant swap dealer or major swap participant. Certain other protections apply to a counterparty to uncleared swaps under the CFTC’s regulations even if the counterparty does not elect segregation of its initial margin..

Furthermore, a bilateral OTC transaction may only be terminated voluntarily by entering into a closing transaction with the dealer with which a Fund originally dealt. Any such cancellation may require a Fund to pay a premium to that dealer. In those cases in which a Fund has entered into a covered transaction and cannot voluntarily terminate the transaction, the Fund will not be able to sell the underlying security until the transaction expires or is exercised or different cover is substituted. The Funds will seek to enter into OTC transactions only with dealers which agree to, and which are expected to be capable of, entering into closing transactions with the Funds. There is also no assurance that a Fund will be able to liquidate an OTC transaction at any time prior to expiration.

The requirement to execute certain OTC derivatives contracts on SEFs may offer certain advantages over traditional bilateral OTC trading, such as ease of execution, price transparency, increased liquidity and/or favorable pricing. However, SEF trading may make it more difficult and costly for a Fund to enter into highly tailored or customized transactions and may result in additional costs and risks. Market participants such as the Funds that execute derivatives contracts through a SEF, whether directly or through a broker intermediary, are required to submit to the jurisdiction of the SEF and comply with SEF and CFTC rules and regulations which impose, among other things disclosure and recordkeeping obligations. In addition, a Fund will generally incur SEF or broker intermediary fees when it trades on a SEF. A Fund may also be required to indemnify the SEF or broker intermediary for any losses or costs that may result from the Fund’s transactions on the SEF.

Pandemic Risk

Disease outbreaks that affect local economies or the global economy may materially and adversely impact the Funds and/or the Adviser’s business. For example, uncertainties regarding the Coronavirus (“COVID-19”) outbreak resulted in serious economic disruptions across the globe. These types of outbreaks can be expected to cause severe decreases in core business activities such as manufacturing, purchasing, tourism, business conferences and workplace participation, among others. These disruptions may lead to instability in the market place, including stock market losses and overall volatility, like what occurred in connection with COVID-19. In the past, in the face of such instability, governments have taken extreme and unpredictable measures to combat the spread of disease and mitigate the resulting market disruptions and losses. The Adviser and the Sub-Advisers have in place business continuity plans reasonably designed to ensure that they maintain normal business operations, and periodically test those plans. However, in the

event of a future pandemic or an outbreak, there can be no assurance that the Adviser, the Sub-Advisers or the Fund's service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. The full impacts of a pandemic or disease outbreaks are unknown, resulting in a high degree of uncertainty for potentially extended periods of time.

TEMPORARY INVESTMENTS

Each Fund may take temporary defensive measures that are inconsistent with a Fund's normal fundamental or non-fundamental investment policies and strategies in response to adverse market, economic, political, or other market-related conditions as determined by a Sub-Adviser. Such measures could include, but are not limited to, investments in (1) highly liquid short-term fixed income securities issued by or on behalf of municipal or corporate issuers, obligations of the U.S. Government and its agencies, commercial paper, and bank certificates of deposit; (2) repurchase agreements involving any such securities; and (3) other money market instruments. Each Fund also may invest in shares of money market mutual funds to the extent permitted under applicable law. Money market mutual funds are investment companies, and the investments in those companies by a Fund are in some cases subject to certain fundamental investment restrictions. As a shareholder in a mutual fund, each Fund will bear its pro rata share of expenses, including management fees, and will remain subject to payment of the fees to the Adviser, with respect to assets so invested. A Fund may not achieve its investment objective during temporary defensive periods.

Repurchase Agreements

Each Fund may enter into repurchase agreements with respect to its portfolio securities. Pursuant to such agreements, a Fund acquires securities from financial institutions such as banks and broker-dealers deemed to be creditworthy by the Adviser or a Sub-Adviser, subject to the seller's agreement to repurchase and a Fund's agreement to resell such securities at a mutually agreed upon date and price. The repurchase price generally equals the price paid by a Fund plus interest negotiated on the basis of current short-term rates (which may be more or less than the rate on the underlying portfolio security). Securities subject to repurchase agreements will be held by the custodian or in the Federal Reserve/Treasury Book-Entry System or an equivalent foreign system. The seller under a repurchase agreement will be required to maintain the value of the underlying securities at not less than 102% of the repurchase price under the agreement. If the seller defaults on its repurchase obligation, a Fund will suffer a loss to the extent that the proceeds from a sale of the underlying securities are less than the repurchase price under the agreement. Bankruptcy or insolvency of such a defaulting seller may cause a Fund's rights with respect to such securities to be delayed or limited. Repurchase agreements are considered to be loans under the 1940 Act.

OTHER STRATEGIES AND RISKS

BORROWING

The Funds may engage in limited borrowing activities. Borrowing creates an opportunity for increased return, but, at the same time, creates special risks. Furthermore, if a Fund were to engage in borrowing, an increase in interest rates could reduce the value of a Fund's shares by increasing a Fund's interest expense. Subject to the limitations described under "Investment Limitations" below, each Fund may be permitted to borrow for temporary purposes and/or for investment purposes. Such a practice will result in leveraging of a Fund's assets and may cause a Fund to liquidate portfolio positions when it would not be advantageous to do so. This borrowing may be secured or unsecured. Provisions of the 1940 Act require a Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of a Fund's total assets made for temporary administrative purposes. Any borrowings for temporary administrative purposes in excess of 5% of a Fund's total assets will count against this asset coverage requirement. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, a Fund may be required to

sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint if a Fund sells securities at that time. Borrowing will tend to exaggerate the effect on NAV of any increase or decrease in the market value of a Fund's portfolio. Money borrowed will be subject to interest charges which may or may not be recovered by appreciation of the securities purchased, if any. A Fund also may be required to maintain minimum average balances in connection with such borrowings or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate. During the fiscal year ended October 31, 2024, the North Square Strategic Income Fund, the North Square Altrinsic International Equity Fund and the North Square McKee Bond Fund drew on their line of credit for one, two and four days, respectively.

ILLIQUID AND RESTRICTED SECURITIES

Pursuant to Rule 22e-4 under the 1940 Act, each Fund may not acquire any "illiquid investment" if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An "illiquid investment" is any investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. The Trust has implemented a written liquidity risk management program and related procedures (the "Liquidity Program") that is reasonably designed to assess and manage each Fund's "liquidity risk" (defined by the SEC as the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of remaining investors' interests in the Fund). The Trust's Board of Trustees (the "Board" or the "Board of Trustees") has approved the designation of the Adviser to administer the Liquidity Program.

Illiquid investments include (i) securities for which there is no readily available market; (ii) securities in which the disposition would be subject to legal restrictions (so called "restricted securities"); and (iii) repurchase agreements having more than seven days to maturity, unless, based upon a review of the relevant market, trading and investment-specific considerations, those investments are determined not to be illiquid.

A considerable period of time may elapse between a Fund's decision to sell illiquid investments and the time when the Fund is able to sell them, during which time the value of the securities could decline. Illiquid investments will usually be priced at fair value as determined in good faith by the Board or its delegate. If, through the appreciation of illiquid investments or the depreciation of liquid investments, more than 15% of the value of a Fund's net assets is invested in illiquid investments, the Fund will take such steps as is deemed advisable, if any, to protect liquidity and the condition will be reported to the Board and, when required, to the SEC.

Each Fund may invest in restricted securities. Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act of 1933, as amended (the "1933 Act"). Where registration is required, a Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time a Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, a Fund might obtain a less favorable price than that which prevailed when it decided to sell. Restricted securities issued pursuant to Rule 144A under the 1933 Act that have a readily available market usually are not classified as illiquid by a Fund based on relevant market, trading and investment-specific considerations. However, investing in Rule 144A securities could result in decreased liquidity for a Fund if qualified institutional buyers become, for a time, uninterested in purchasing these securities.

A Fund may purchase commercial paper issued pursuant to Section 4(2) of the 1933 Act. 4(2) commercial paper has substantially the same price and liquidity characteristics as commercial paper generally, except that the resale of 4(2) commercial paper is limited to the institutional investor marketplace. Such a restriction on resale makes 4(2) commercial paper technically a restricted security under the 1933 Act. In practice, however, 4(2) commercial paper can be resold as

easily as any other unrestricted security held by the Fund. Accordingly, 4(2) commercial paper usually is classified as liquid by a Fund based on relevant market, trading and investment-specific considerations.

LARGE SHAREHOLDER RISK

Shares of a Fund may be offered as an investment to certain other investment companies and other large investors. Certain account holders may from time to time own (beneficially or of record) or control a significant percentage of a Fund's shares. The Funds are subject to the risk that a large investor can purchase or redeem a large percentage of Fund shares at any time. To meet large redemption requests, a Fund may have to hold large uninvested cash positions or sell investments to raise the cash needed to satisfy redemption requests at times when it would not otherwise do so. In turn, a Fund's performance may suffer and the Fund can incur high turnover, brokerage costs, realize gains or losses at inopportune times, lose money or hold a portfolio with decreased liquidity. Similarly, large Fund share purchases may adversely affect a Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. A Fund may also experience adverse tax consequences as a result of a large shareholder transaction. Under certain circumstances, a Fund may also experience frequent large shareholder transactions.

REDEMPTION RISK

A Fund may need to sell portfolio securities to meet redemption requests. A Fund could experience a loss when selling portfolio securities to meet redemption requests if there is (i) significant redemption activity by shareholders, including, for example, when a single investor or few large investors make a significant redemption of the Fund's shares, (ii) a disruption in the normal operation of the markets in which the Fund buys and sells portfolio securities or (iii) the inability of the Fund to sell portfolio securities because such securities have decreased liquidity. In such events, a Fund could be forced to sell portfolio securities at unfavorable prices in an effort to generate sufficient cash to pay redeeming shareholders. A Fund may suspend redemptions or the payment of redemption proceeds when permitted by applicable regulations.

LENDING PORTFOLIO SECURITIES

Consistent with applicable regulatory requirements and a Fund's investment restrictions, each Fund may lend portfolio securities to securities broker-dealers or financial institutions, provided that such loans are callable at any time by the Fund (subject to notice provisions described below), and are at all times secured by cash or cash equivalents, which are maintained in a segregated account pursuant to applicable regulations and that are at least equal to the market value, determined daily, of the loaned securities. The advantage of such loans is that a Fund continues to receive the income on the loaned securities while at the same time earns interest on the cash amounts deposited as collateral, which will be invested in short-term obligations. A Fund will not lend portfolio securities if such loans are not permitted by the laws or regulations of any state in which its shares are qualified for sale. Each Fund's loans of portfolio securities will be collateralized in accordance with applicable regulatory requirements and no loan will cause the value of all loaned securities to exceed 33 1/3% of the value of the Fund's total assets.

A loan may generally be terminated by the borrower on one business days' notice, or by a Fund on five business days' notice. If the borrower fails to deliver the loaned securities within five days after receipt of notice or fails to maintain the requisite amount of collateral, a Fund could use the collateral to replace the securities while holding the borrower liable for any excess of replacement cost over collateral. As with any extensions of credit, there are risks of delay in recovery and in some cases even loss of rights in the collateral should the borrower of the securities fail financially. However, these loans of portfolio securities will only be made to firms deemed by a Fund's management to be creditworthy and when the income that can be earned from such loans justifies the attendant risks. Upon termination of the loan, the borrower is required to return the securities to the Fund. Any gain or loss in the market price during the loan period would inure to the Fund. The risks associated with loans of portfolio securities are substantially similar

to those associated with repurchase agreements. Thus, if the counterparty to the loan petitions for bankruptcy or becomes subject to the United States Bankruptcy Code, the law regarding the rights of a Fund is unsettled. As a result, under extreme circumstances, there may be a restriction on a Fund's ability to sell the collateral, and the Fund would suffer a loss. When voting or consent rights that accompany loaned securities pass to the borrower, the Fund will follow the policy of calling the loaned securities, to be delivered within one day after notice, to permit the exercise of such rights if the matters involved would have a material effect on a Fund's investment in such loaned securities. Each Fund will pay reasonable administrative and custodial fees in connection with a loan of its securities.

DEVELOPMENTS IN THE CHINA REGION

After nearly 30 years of unprecedented growth, the People's Republic of China now faces a slowing economy. The real estate market, which many observers believed to be inflated, has begun to decline. Local governments, which had borrowed heavily to bolster growth, face high debt burdens and limited revenue sources. The Chinese economy is heavily dependent on its large export sector and its economic growth may be adversely affected by trade disputes with key trading partners and escalating tariffs imposed on goods and services it produces. A national economic slowdown in the export sector may also affect companies that are not heavily dependent on exports. Companies that rely on imported products may experience increased costs of production or reduced profitability, which may harm consumers, investors and the domestic economy as a whole. Trade disputes and retaliatory actions may include embargoes and other trade limitations, which may trigger a significant reduction in international trade and impact the global economy. Trade disputes may also lead to increased currency exchange rate volatility, which can adversely affect the prices of Fund securities valued in US dollars. The potential threat of trade disputes may also negatively affect investor confidence in the markets generally and investment growth.

Additionally, Chinese actions to lay claim to disputed islands have caused relations with China's regional trading partners to suffer, and could cause further disruption to regional and international trade. Internal social unrest or confrontations with other neighboring countries, including military conflicts in response to such events, may also disrupt economic development in China and result in a greater risk of currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation. Export growth continues to be a major driver of China's rapid economic growth. Reduction in spending on Chinese products and services, institution of tariffs or other trade barriers, or a downturn in any of the economies of China's key trading partners may have an adverse impact on its economy. In the long run, China's ability to develop and sustain a credible legal, regulatory, monetary, and socioeconomic system could influence the course of outside investment.

In addition, there has been enhanced regulatory focus in the U.S. on access to audit and other information regarding Chinese companies. In November 2020, an executive order was issued prohibiting investments in certain Chinese companies that might be owned or controlled by the military, resulting in NASDAQ removing shares of certain companies from its indexes and the NYSE delisting certain companies. In December 2020, the Holding Foreign Companies Accountable Act ("HFCAA") was signed into law, requiring the SEC to ban trading on all U.S. exchanges of any foreign company for which the Public Company Accounting Oversight Board ("PCAOB") is unable to inspect audit workpapers for three consecutive years, which is a particular threat to Chinese companies as PCAOB inspection of the audit work of foreign accounting firms conflicts with Chinese law and policy. The enactment of the HFCAA and other efforts to increase U.S. regulatory access to audit workpapers could cause investor uncertainty, and the market price of any Chinese securities held by the Fund could be adversely affected. In addition, PCAOB's inability to evaluate the audits and quality control procedures of auditors deprive investors of the transparency and protections provided by such evaluations and may subject such investors to a heightened risk of fraud. The composition of an emerging market index generally will not weigh individual securities by investor protection considerations. Therefore, to the extent the Funds track an emerging market index, they could invest in companies that lack transparency and other investor protections.

There are special risks associated with investments in China, Hong Kong and Taiwan, including exposure to currency fluctuations, less liquidity, expropriation, confiscatory taxation, nationalization and exchange control regulations

(including currency blockage). Inflation and rapid fluctuations in inflation and interest rates have had, and may continue to have, negative effects on the economy and securities markets of China, Hong Kong and Taiwan. In addition, investments in Hong Kong or Taiwan could be adversely affected by a deterioration in their prospective political and economic relationships with China.

EUROPE—RECENT EVENTS

A number of countries in Europe have experienced severe economic and financial difficulties. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts; many other issuers have faced difficulties obtaining credit or refinancing existing obligations; financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit; and financial markets in Europe and elsewhere have experienced extreme volatility and declines in asset values and liquidity. These difficulties may continue, worsen or spread within or outside Europe. Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world.

The European Union (the “EU”) currently faces major issues involving its membership, structure, procedures and policies, including the successful political, economic and social integration of new member states, the EU’s resettlement and distribution of refugees, and resolution of the EU’s problematic fiscal and democratic accountability. In addition, one or more countries may abandon the Euro, the common currency of the EU, and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

On January 31, 2020, the United Kingdom (“UK”) left the EU (commonly referred to as “Brexit”). The full effects of Brexit are unknown at this time and could negatively impact the value of a Fund’s investments. Securities issued by companies domiciled in the UK could be subject to changing regulatory and tax regimes. Banking and financial services companies that operate in the UK or EU could be disproportionately impacted by these actions. Further insecurity in EU membership or the abandonment of the euro, could exacerbate market and currency volatility and negatively impact a Fund’s investments in securities issued by companies located in EU countries. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching. A number of countries in Europe have suffered terror attacks, and additional attacks may occur in the future. Ukraine has experienced ongoing military conflict; this conflict may expand and military attacks could occur in Europe. Europe has also been struggling with mass migration from the Middle East and Africa. Recent and upcoming European elections could, depending on the outcomes, further call into question the future direction of the EU. The ultimate effects of these events and other socio-political or geopolitical issues are not known but could profoundly affect global economies and markets. The impact of these actions, especially if they occur in a disorderly fashion, is not clear, but could be significant and far-reaching. Whether or not a Fund invests in securities of issuers located in Europe or with significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of the Fund’s investments.

In addition, Russia’s military incursions in Ukraine led to sanctions being levied against Russia by the United States, EU and other countries, which could adversely affect European and global energy and financial markets, as well as commodity prices, supply chains and global trade. This and future geopolitical tensions could have an outsized impact on a Fund’s investments due to its exposure to frontier markets, commodities, and energy.

CYBER SECURITY RISK

Like other funds and other parts of the modern economy, the Funds and their service providers, as well as exchanges and market participants through or with which the Funds trade and other infrastructures, services and parties on which

the Funds or their service providers rely, are susceptible to ongoing risks and threats resulting from and related to cyber incidents. Cyber incidents can result from unintentional events (such as an inadvertent release of confidential information) or deliberate attacks by insiders or third parties, including cyber criminals, competitors, nation-states and “hacktivists,” and can be perpetrated by a variety of complex means, including the use of stolen access credentials, malware or other computer viruses, ransomware, phishing, structured query language injection attacks, and distributed denial of service attacks, among other means. Cyber incidents may result in actual or potential adverse consequences for critical information and communications technology, systems and networks that are vital to the Funds’ or their service providers’ operations or otherwise impair Fund or service provider operations. For example, a cyber incident may cause operational disruptions and failures impacting information systems or information that a system processes, stores, or transmits, such as by theft, damage or destruction, or corruption or modification of and denial of access to data maintained online or digitally, denial of service on websites rendering the websites unavailable to intended users or not accessible for such users in a timely manner, and the unauthorized release or other exploitation of confidential information.

A cyber incident could adversely impact a Fund and its shareholders by, among other things, interfering with the processing of shareholder transactions or other operational functionality, impacting the Fund’s ability to calculate its NAV or other data, causing the release of private shareholder information (i.e., identity theft or other privacy breaches) or confidential Fund information or otherwise compromising the security and reliability of information, impeding trading, causing reputational damage, and subjecting the Fund to regulatory fines, penalties or financial losses, reimbursement or other compensation or remediation costs, litigation expenses and additional compliance and cyber security risk management costs, which may be substantial. A cyber incident could also adversely affect the ability of a Fund (and the Adviser or Sub-Adviser) to invest or manage the Fund’s assets.

Although the Funds and their service providers, as well as exchanges and market participants through or with which the Funds trade and other infrastructures on which the Funds or their service providers rely, may have established business continuity plans and systems reasonably designed to protect from and/or defend against the risks or adverse consequences associated with cyber incidents, there are inherent limitations in these plans and systems, including that certain risks may not yet be identified, in large part because different or unknown threats may emerge in the future and the threats continue to rapidly evolve and increase in sophistication. As a result, it is not possible to anticipate and prevent every cyber incident and attempts to mitigate the occurrence or impact of a cyber incident may be unsuccessful. The nature, extent, and potential magnitude of the adverse consequences of a cyber incident cannot be predicted accurately but may result in significant risks and costs to a Fund and its shareholders.

The issuers of securities in which a Fund invests are also subject to the ongoing risks and threats associated with cyber incidents. These incidents could result in adverse consequences for such issuers, and may cause a Fund’s investment in such securities to lose value. For example, a cyber incident involving an issuer may include the theft, destruction or misappropriation of financial assets, intellectual property or other sensitive information belonging to the issuer or their customers (i.e., identity theft or other privacy breaches). As a result, the issuer may experience the types of adverse consequences summarized above, among others (such as loss of revenue), despite having implemented preventative and other measures reasonably designed to protect from and/or defend against the risks or adverse effects associated with cyber incidents.

The Funds and their service providers, as well as exchanges and market participants through or with which the Funds trade and other infrastructures on which the Funds or their service providers rely, are also subject to the risks associated with technological and operational disruptions or failures arising from, for example, processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, errors in algorithms used with respect to a Fund, changes in personnel, and errors caused by third parties or trading counterparties. Although the Funds attempt to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Funds or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures or other disruptions in service.

Cyber incidents and operational errors or failures or other technological issues may adversely affect a Fund's ability to calculate its NAV correctly, in a timely manner or process trades or Fund or shareholder transactions, including over a potentially extended period. The Funds do not control the cyber security or other operational defense plans or systems of their service providers, intermediaries, companies in which they invest or other third-parties. The value of an investment in Fund shares may be adversely affected by the occurrence of the cyber incidents and operational errors or failures or technological issues summarized above or other similar events and a Fund and its shareholders may bear costs tied to these risks.

OPERATIONAL RISK

An investment in a Fund, like any fund, can involve operational risks arising from factors such as processing errors, human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel and errors caused by third-party service providers. The occurrence of any of these failures, errors or breaches could result in a loss of information, regulatory scrutiny, reputational damage or other events, any of which could have a material adverse effect on a Fund. While the Funds seeks to minimize such events through controls and oversight, there may still be failures that could cause losses to a Fund.

INVESTMENT RESTRICTIONS

Each Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a "majority" of the outstanding voting securities of a Fund, as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" of a Fund means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. Each Fund's investment objective is a non-fundamental policy and may be changed without shareholder approval.

Each Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its net assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales or investing in financial futures, swaps, when-issued or delayed delivery securities, or reverse repurchase agreements.
2. Act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;
3. With respect to 75% of the Fund's total assets, purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. Government or any of its agencies or instrumentalities and securities of other investment companies) if, as a result, (a) more than 5% of the Fund's total assets would be invested in the securities of that issuer, or (b) the Fund would hold more than 10% of the outstanding voting securities of that issuer;
4. Invest 25% or more of its total assets, calculated at the time of purchase and taken at market value, in any one industry or group of industries (other than securities issued by the U.S. Government, its agencies or instrumentalities);
5. Purchase or sell real estate or interests in real estate or real estate limited partnerships (although the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate, such as REITs);

6. Make loans of money, except (a) for purchases of debt securities consistent with the investment policies of the Fund, (b) by engaging in repurchase agreements or, (c) through the loan of portfolio securities in an amount up to 33 1/3% of the Fund's net assets; or
7. Purchase or sell commodities or commodity futures contracts (although the Fund may invest in financial futures and in companies involved in the production, extraction, or processing of agricultural, energy, base metals, precious metals, and other commodity-related products).

Each Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

Each Fund may not invest, in the aggregate, more than 15% of its net assets in securities with legal or contractual restrictions on resale, securities that are not readily marketable and repurchase agreements with more than seven days to maturity.

In addition, each Fund may invest in shares of securities of registered open-end investment companies or registered UITs subject to the limits of Section 12(d)(1) of the 1940 Act, including the rules, regulations and exemptive orders obtained thereunder.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Funds will not be considered a violation.

MANAGEMENT OF THE FUNDS

Board of Trustees and Officers

The overall management of the business and affairs of the Trust is vested with its Board. The Board consists of three individuals, all of whom are not "interested persons" of the Trust, as that term is defined in the 1940 Act (the "Independent Trustees"). The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Adviser, Sub-Advisers, administrator, distributor, custodian and transfer agent. The Board appoints officers who are responsible for day-to-day business decisions based on policies set by the Board, except that the Sub-Advisers are responsible for making day-to-day investment decisions in accordance with the Funds' investment objective, strategies, and policies, all of which are subject to general supervision by the Board.

The current Trustees and officers of the Trust and their years of birth are listed below with their addresses, present positions with the Trust, term of office with the Trust and length of time served, principal occupations over at least the last five years and other directorships/trusteeships held.

Name, Address ^(a) , Year of Birth and Position(s) with the Trust	Position with the Trust	Term of Office and Length of Time Served ^(b)	Principal Occupations During the Past Five Years or Longer	Number of Portfolios in Fund Complex Overseen by Trustee ^(c)	Other Directorship/ Trusteeship Positions held by Trustee During the Past 5 Years
Independent Trustees					
David B. Boon (1960)	Chairperson of the Board and Trustee	08/2018 to present (Chairperson since 03/2024)	Chief Financial Officer and Managing Director, Eagle Capital Management, LLC (since 2018); Chief Financial Officer and Partner, Cedar Capital, LLC (2013 – 2018).	13	None
Donald J. Herrema (1952)	Trustee	08/2018 to present (Chairperson from 08/2018 to 03/2024)	Vice Chair and Chief Investment Officer, Independent Life Insurance Company (since 2018); Financial Services Executive, Advisor and Founder of BlackSterling Partners, LLC (private investments and advisory firm) (since 2004).	13	Chairman and Director Emeritus, TD Funds USA (2009 - 2019); Director, Abel Noser Holdings, LLC (since 2016); Member, USC Marshall Business School Board (since 2010); Director, FEG Investment Advisors (since 2017); Director, Independent Life Insurance Company (since 2018); and Director, Independent Insurance Group (since 2023).
Catherine A. Zaharis (1960)	Trustee	08/2018 to present	Professor of Practice (since 2019), Director, Professional/ Employer Development, Finance Department (2015 - 2019), Adjunct Lecturer (2010 - 2019), and Business Director, MBA Finance Career Academy (2008 – 2015), University of Iowa, Tippie College of Business; Chair (2013 – 2016), Director (1999 – 2016), and Investment Committee Member (1999 – 2013) and Chair (2003 –	13	None
Officers of the Trust

Ian Martin (1968) ^(d)	President	05/2023 to present	Executive Vice President, Chief Administrative Officer of Ultimus Fund Solutions, LLC (2019 – present); Executive Vice President (1992 – 2019), U.S. Bank Global Fund Services.	N/A	N/A
Zachary P. Richmond (1980)	Treasurer	05/2023 to present	Senior Vice President, Director of Financial Administration of Ultimus Fund Solutions, LLC (August 2024 – present) (Vice President from 2015 – August 2024).	N/A	N/A
Karen Jacoppo-Wood (1966)	Secretary	05/2023 to present	Senior Vice President and Associate General Counsel of Ultimus Fund Solutions, LLC (2022 – present); Managing Director and Managing Counsel of State Street Bank and Trust Company (2019 – 2022) (Vice President and Managing Counsel from 2014 – 2019).	N/A	N/A
Martin R. Dean (1963)	Chief Compliance Officer	05/2023 to present	President of Northern Lights Compliance Services, LLC (January 2023 – present); Senior Vice President, Head of Fund Compliance (2020 – January 2023) of Ultimus Fund Solutions, LLC (Vice President and Director of Fund Compliance from 2016 – 2020).	N/A	N/A

- a. The business address of each Trustee and officer is Exchange Place Advisors Trust, c/o Ultimus Fund Solutions, LLC, 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246.
- b. Trustees and officers serve until their successors are duly elected and qualified.
- c. As of the date of this SAI, the Trust was comprised of 15 active portfolios managed by three unaffiliated investment advisers. The term “Fund Complex” applies only to those funds that are (i) advised by a common investment adviser or by an investment adviser that is an affiliated person of the investment adviser of any of the other funds of the Trust or (ii) hold themselves out to investors as related companies for purposes of investment and investor services.

These Funds hold themselves out as related to the following series within the Trust: the North Square Spectrum Alpha Fund, the North Square Preferred and Income Securities Fund, the North Square Multi Strategy Fund, the North Square Dynamic Small Cap Fund, the North Square Tactical Growth Fund, the North Square Tactical Defensive Fund, the North Square Core Plus Bond Fund, the North Square Kennedy MicroCap Fund and the North Square RCIM Tax-Advantaged Preferred and Income Securities ETF (offered in separate Prospectuses and SAIs).

- d. Mr. Martin served as an interested trustee from May 2023 to December 31, 2024. He was considered to be an “interested person” of the Trust as that term is defined in the 1940 Act by virtue of his positions with the administrator, transfer agent and fund accountant.

Additional Information Concerning the Board of Trustees

Board Leadership Structure

The Board has general oversight responsibility with respect to the operation of the Trust. The Board has engaged the Adviser to manage the Funds and is responsible for overseeing the Adviser and other service providers to the Funds in accordance with the provisions of the 1940 Act and other applicable laws. Subject to the provisions of the Trust’s Declaration of Trust, its Amended and Restated By-Laws (“By-Laws”) and Delaware law, the Board has all powers necessary and convenient to carry out these responsibilities, including, among other things, the election and removal of the Trust’s officers.

The Board is currently composed of three members, all of whom are Independent Trustees. The Board meets periodically throughout the year to discuss and consider matters concerning the Trust and to oversee the Trust’s activities, including its investment performance, compliance program and risks associated with its activities. The Board also regularly meets outside the presence of management and is advised by independent legal counsel.

The Board has appointed Mr. Boon to serve in the role of Chairperson. The Chairperson’s role is to preside at all meetings of the Board and to act as a liaison with the service providers, officers, attorneys, and other Trustees generally between meetings. The Chairperson may also perform such other functions as may be delegated by the Board from time to time. Except for duties specified herein or pursuant to the Trust’s charter documents, the designation of Chairperson does not impose on such Independent Trustee any duties, obligations or liability that are greater than the duties, obligations or liability imposed on such person as a member of the Board generally. The Board has established two standing Committees (described in more detail below) to assist the Board in the oversight and direction of the business and affairs of the Trust, and from time to time may establish additional committees or informal working groups to review and address the policies and practices of the Trust with respect to certain specified matters. The Board reviews its structure regularly as part of its annual self-assessment. The Board has determined that its current leadership structure is appropriate in light of the characteristics and circumstances of the Trust because it allows the Board to exercise informed and independent judgment over matters under its purview, and it allocates areas of responsibility among the Committees and the full Board in a manner that enhances effective oversight. The leadership structure of the Board may be changed at any time and in the discretion of the Board, including in response to changes in circumstances or the characteristics of the Trust.

Board Oversight of Risk Management

The Board oversees risk as part of its general oversight of the Funds. The Board has emphasized to the Adviser, Sub-Advisers and other service providers the importance of maintaining vigorous risk management programs and procedures. The Funds are subject to a number of risks, including investment, liquidity, compliance, financial, operational, and valuation risks, among others. Under the overall supervision of the Board, the Adviser, Sub-Advisers and other service providers perform risk management as part of the day-to-day operations of the Funds. Each of the Adviser, Sub-Advisers and other service providers have their own independent interest in risk management, and their

policies and methods of carrying out risk management functions will depend, in part, on their individual priorities, resources and controls. The Board has appointed a Chief Compliance Officer for the Trust who oversees the implementation and testing of the Funds' compliance program and regularly reports to the Board regarding compliance matters for the Funds and their principal service providers. The Board recognizes that it is not possible to identify all of the risks that may affect a Fund or to develop processes and controls to eliminate or mitigate their occurrence or effects. Risk oversight forms part of the Board's general oversight of the Funds and is addressed as part of various Board and Committee activities. Various personnel, including the Trust's Chief Compliance Officer and senior personnel of the Adviser, Sub-Advisers and other service providers (such as the Funds' independent registered public accounting firm) make periodic reports to the Board and its Committees with respect to a variety of matters, including matters relating to risk management.

Board Committees

The Board has two standing committees: the Audit Committee and the Nominating and Governance Committee (the "Governance Committee").

The Audit Committee is responsible for advising the full Board with respect to the oversight of accounting, auditing and financial matters affecting the Trust. In performing its oversight function, the Audit Committee has, among other things, specific power and responsibility: (1) to oversee the Funds' accounting and financial reporting policies and practices, their internal controls and, as deemed appropriate by the Audit Committee, the internal controls of the Funds' service providers; (2) to oversee the quality, objectivity, and integrity of the Funds' financial statements and the independent audit thereof; (3) to approve, prior to appointment by the Board, the engagement of the Trust's independent registered public accounting firm and, in connection therewith, monitor the independent auditor's qualifications, independence, and performance; and (4) to act as a liaison between the Trust's independent registered public accounting firm and the Board. The Audit Committee meets as often as necessary or appropriate to discharge its functions and will meet at least semi-annually. The Audit Committee is comprised of all of the Independent Trustees. Mr. Herrema is the Chairperson of the Audit Committee. For the fiscal year ended October 31, 2024, the Audit Committee met four times.

The Governance Committee is responsible for assisting the Board with matters related to the periodic review and evaluation of the governance, composition and operations of the Board and its Committees, including the selection and nomination of candidates to serve as Trustees of the Trust and of chairpersons of the Committees. The Governance Committee is comprised of all of the Independent Trustees. Ms. Zaharis is the Chairperson of the Governance Committee. Shareholders who wish to recommend a nominee should send nominations to the Secretary of the Trust, including biographical information and qualifications of the proposed nominee. The Governance Committee may request additional information deemed reasonably necessary for the Committee to evaluate such nominee. The Governance Committee meets as often as necessary or appropriate to discharge its functions and will meet at least annually. For the fiscal year ended October 31, 2024, the Governance Committee met four times.

Qualifications of the Trustees

The governing documents for the Trust do not set forth any specific qualifications to serve as a Trustee. The charter of the Governance Committee also does not set forth any specific qualifications. The Board has determined that each of the Trustees is qualified to serve as a Trustee of the Trust, based on a review of the experience, qualifications, attributes and skills ("Qualifications") of each Trustee, including those listed in the chart earlier in this section. Among the Qualifications common to all Trustees are their ability to review critically, evaluate, question and discuss information and proposals provided to them regarding the Trust, to interact effectively with each of the other Trustees, the Adviser, Sub-Advisers, independent registered public accounting firm and the other service providers, and to exercise effective and independent business judgment in the performance of their duties as Trustees. Each Trustee's ability to perform his or her duties effectively has been attained through: (1) the individual's business and professional experience and

accomplishments; (2) the individual's experience working with the other Trustees and management; (3) the individual's prior experience serving in senior executive positions and/or on the boards of other companies and organizations; and (4) the individual's educational background, professional training, and/or other experiences. Generally, no one factor was decisive in determining that an individual should serve as a Trustee. The following is a summary of Qualifications that support the conclusion that each individual qualifies to serve as a Trustee of the Trust. Additional details regarding the background of each Trustee is included in the chart earlier in this section.

David B. Boon. Mr. Boon has been a Trustee since August 2018 and Chairperson of the Board since March 2024. Mr. Boon has experience in the financial, operations and management areas of the financial industry, including as the chief financial officer at various investment management firms. He has also served as the managing director of a retail and institutional investment management firm and full service defined contribution provider. Mr. Boon has been determined by the Board to be an audit committee financial expert as such term is defined in the applicable rules of the SEC.

Donald J. Herrema. Mr. Herrema has been a Trustee since August 2018 and was Chairperson of the Board from August 2018 to March 2024. Mr. Herrema has over 25 years of executive-level experience in the asset management and private wealth segments of the financial services industry, including as chief executive officer of a large private wealth management company. Mr. Herrema has served as a director and chairman of the board of directors of another mutual fund complex. He has also served on the boards of directors of a variety of public and private companies and non-profit organizations. Mr. Herrema has been determined by the Board to be an audit committee financial expert as such term is defined in the applicable rules of the SEC.

Catherine A. Zaharis. Ms. Zaharis has been a Trustee since August 2018. Ms. Zaharis has experience in the financial services industry having served in senior positions at various asset management firms, including an SEC-registered investment adviser. Ms. Zaharis has served on the board of directors of another mutual fund complex. She has also served as a director, chairperson and committee member (as well as committee chair) of the board of directors at an educational organization's endowment foundation, and she has served on the boards of directors of certain philanthropic and civic leadership organizations.

Trustee Ownership of Fund Shares and Other Interests

The following table shows the aggregate dollar range of equity securities in all registered investment companies overseen by the Trustees in the family of investment companies owned by the Trustees as of December 31, 2024, using the following ranges: None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, and Over \$100,000.

Name of Fund ⁽¹⁾	David B. Boon Independent Trustee	Donald J. Herrema Independent Trustee	Catherine A. Zaharis Independent Trustee	Ian Martin Interested Trustee ⁽³⁾
North Square Strategic Income Fund	None	None	None	None
North Square Select Small Cap Fund	None	None	\$10,001-\$50,000	None
North Square Altrinsic International Equity Fund	None	None	None	None
North Square McKee Bond Fund	None	None	None	None
Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies⁽²⁾	None	None	Over \$100,000	None

⁽¹⁾ Beneficial ownership is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended.

⁽²⁾ Refers to all series in the Trust.

⁽³⁾ Effective December 31, 2024, Mr. Martin resigned as a Trustee of the Trust.

As of the calendar year ended December 31, 2024, none of the Independent Trustees or their immediate family members owned beneficially or of record any securities of the Adviser, any Sub-Adviser, or the Distributor (as defined below), or any of their affiliates. During the two most recently completed calendar years, none of the Independent Trustees or their immediate family members had a direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, any Sub-Adviser, or the Distributor, or any of their affiliates. In addition, during the two most recently completed calendar years, none of the Independent Trustees or their immediate family members had any material interest, direct or indirect, in any transaction (or series of transactions), in which the amount involved exceeds \$120,000 and to which the Adviser, any Sub-Adviser, or the Distributor, or any affiliate thereof, was a party. During the two most recently completed calendar years, none of the Independent Trustees or their immediate family members had any direct or indirect relationship, in which the amount involved exceeds \$120,000, with the Adviser, any Sub-Adviser, or the Distributor, or any of their affiliates.

Compensation

Effective January 1, 2025, each Independent Trustee receives from the Trust an annual retainer of \$50,000, plus an annual fee per Fund of \$2,000, plus reimbursement of related expenses. The Chairperson of the Board receives an additional annual retainer of \$18,750, and each of the Chairs of the Audit Committee and the Governance Committee receives an additional annual retainer of \$7,500 and \$3,000, respectively. Prior to January 1, 2025, each Independent Trustee received from the Trust an annual retainer of \$50,000, plus an annual fee per Fund of \$1,666.67, plus reimbursement of related expenses. Prior to January 1, 2025, the Chairperson of the Board received an additional annual retainer of \$6,250, and each of the Chairpersons of the Audit Committee and the Governance Committee received an additional annual retainer of \$2,500 and \$1,250, respectively. Effective November 3, 2023, each Independent Trustee receives a fee of \$2,000 for each special Board meeting attended. The Independent Trustees may waive part of the annual retainer fees from time to time. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees. The Trust does not pay any compensation to Interested Trustees or to the Trust's officers.

Set forth below is the compensation received by the Independent Trustees from the Trust for the fiscal year ended October 31, 2024:

Name of Person/Position	Aggregate Compensation from the Funds	Pension or Retirement Benefits Accrued as Part of the Trust Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Fund Complex Paid to Trustees¹
David B. Boon	\$20,933.60	\$0	\$0	\$77,208.33
Donald J. Herrema	\$21,016.14	\$0	\$0	\$77,208.33
Catherine A. Zaharis	\$20,127.29	\$0	\$0	\$74,083.33

1 The Trust is comprised of multiple series with differing fiscal year ends. The Funds in the Fund Complex, as defined below, may also have differing fiscal year ends. The compensation paid to the Board of Trustees is determined on a calendar quarter basis.

2 As of the date of this SAI, the Trust was comprised of 15 active portfolios managed by three unaffiliated investment advisers. The term "Fund Complex" refers only to the North Square Strategic Income Fund, the North Square Select Small Cap Fund, the North Square Altrinsic International Equity Fund, the North Square McKee Bond Fund, the North Square Spectrum Alpha Fund, the North Square Preferred and Income Securities Fund, the North Square Multi Strategy Fund, the North Square Dynamic Small Cap Fund, the North Square Tactical Growth Fund, the North Square Tactical Defensive Fund, the North Square Core Plus Bond Fund, the North Square Kennedy MicroCap Fund, the North Square RCIM Tax-Advantaged Preferred and Income Securities ETF. For the fiscal year ended October 31, 2024, the aggregate Independent Trustees' fees paid by the entire Trust were \$246,499.99.

Control Persons, Principal Shareholders, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of the Funds. For control persons only, if a control person is a company, the table also indicates the control person's parent, if any, and the jurisdiction under the laws of which the control person is organized. As of February 7, 2025, the following shareholders were considered to be either a principal shareholder or control person of the Funds:

As of February 8, 2025, the Trustees and officers of the Trust, as a group, beneficially owned less than 1% of the outstanding shares of each class of the Funds.

The Adviser

North Square, located at 200 West Madison Street, Suite 2610, Chicago, Illinois 60606, serves as the investment adviser to each of the Funds pursuant to an investment advisory agreement (the “Advisory Agreement”).

Under the Advisory Agreement, the Adviser is responsible for providing or overseeing the provision of all investment management services to the Funds, including furnishing a continuous investment program for each Fund and determining what securities and other investments the Funds should buy and sell. The Adviser, together with the administrator to the Funds, is also responsible for assisting in the supervision and coordination of all aspects of each Fund’s operations, including the coordination of the Fund’s other services providers and the provision of related administrative and other services. The Adviser is authorized to delegate certain of its duties with respect to a Fund to one or more sub-advisers. The Adviser has engaged the Sub-Advisers pursuant to this authority and is responsible for overseeing the Sub-Advisers and recommending their hiring, termination, and replacement for approval by the Board. The Adviser is also responsible for determining the portion of the Fund’s assets to be managed by any given sub-adviser and reallocating those assets as necessary from time to time.

For each sub-advised Fund, the Adviser retains overall responsibility for the management and investment of the assets of the Fund. In this capacity, the Adviser plays an active role in overseeing, monitoring and reviewing each Sub-Adviser in the performance of its duties. The Adviser monitors the investment performance of each Sub-Adviser and also evaluates the portfolio management teams to determine whether their investment activities remain consistent with the Funds’ investment objectives, strategies and policies. The Adviser also monitors changes that may impact a Sub-

Adviser's overall business and regularly performs due diligence reviews of each Sub-Adviser. In addition, the Adviser obtains detailed, comprehensive information concerning each Sub-Adviser's performance and Fund operations and provides regular reports on these matters to the Board. In its role as sponsor and primary investment adviser to the Funds, the Adviser assumes reputational and other risks associated with the operation of each Fund and provides the Funds with the ability to use the Adviser's name and brand, as well as access to other services provided by the Adviser and its affiliates.

The Advisory Agreement remains in effect with respect to each Fund for an initial two-year period. After the initial two-year period, the Advisory Agreement will continue in effect with respect to a Fund from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of a Fund, upon giving the Adviser 60 days' notice when authorized either by a majority vote of the Fund's shareholders or by a vote of a majority of the Board, or by the Adviser on 60 days written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Advisory Agreement, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from reckless disregard by the Adviser of its duties under the Advisory Agreement.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser receives from each Fund an investment advisory fee computed daily and paid monthly based on an annual rate equal to a percentage of each Fund's average daily net assets specified in the Prospectus.

Manager-of-Managers Arrangement

Section 15(a) of the 1940 Act requires that all contracts pursuant to which persons serve as investment advisers to investment companies be approved by shareholders. This requirement also applies to the appointment of sub-advisers to the Funds. The Trust and the Adviser have been granted exemptive relief from the SEC (the "Order"), which permits the Adviser, on behalf of a Fund and subject to the approval of the Board, including a majority of the Independent Trustees, to hire, and to modify any existing or future sub-advisory agreement with, unaffiliated sub-advisers and affiliated sub-advisers, including sub-advisers that are wholly-owned subsidiaries (as defined in the 1940 Act) of the Adviser or its parent company and sub-advisers that are partially-owned by, or otherwise affiliated with, the Adviser or its parent company (the "Manager-of-Managers Structure"). The Adviser has the ultimate responsibility for overseeing a Fund's sub-advisers and recommending their hiring, termination and replacement, subject to oversight by the Board. The Order also provides relief from certain disclosure obligations with regard to sub-advisory fees. With this relief, a Fund may elect to disclose the aggregate fees payable to the Adviser and wholly-owned sub-advisers and the aggregate fees payable to unaffiliated sub-advisers and sub-advisers affiliated with Adviser or its parent company, other than wholly-owned sub-advisers. The Order is subject to various conditions, including that a Fund will notify shareholders and provide them with certain information required by the exemptive order within 90 days of hiring a new sub-adviser. A Fund may also rely on any other current or future laws, rules or regulatory guidance from the SEC or its staff applicable to the Manager-of-Managers Structure. The sole initial shareholder of each Fund has approved the operation of the Fund under a Manager-of-Managers Structure with respect to any affiliated or unaffiliated sub-adviser, including in the manner that is permitted by the Order.

The Manager-of-Managers Structure enables the Trust to operate with greater efficiency by not incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. Operation of the Funds under the Manager-of-Managers Structure does not permit management fees paid by the Fund to the Adviser to be increased without shareholder approval. Shareholders will be notified of any changes made to sub-advisers or material changes to sub-advisory agreements within 90 days of the change.

The Adviser and its affiliates may have other relationships, including significant financial relationships, with current or potential sub-advisers or their affiliates, which may create a conflict of interest. However, in making recommendations to the Board to appoint or to change a sub-adviser, or to change the terms of a sub-advisory agreement, the Adviser considers the sub-adviser's investment process, risk management, and historical performance with the goal of retaining sub-advisers for the Fund that the Adviser believes are skilled and can deliver appropriate risk-adjusted returns over a full market cycle. The Adviser does not consider any other relationship it or its affiliates may have with a sub-adviser or its affiliates, and the Adviser discloses to the Board the nature of any material relationships it has with a sub-adviser or its affiliates when making recommendations to the Board to appoint or to change a sub-adviser, or to change the terms of a sub-advisory agreement.

The Adviser has ultimate responsibility for the investment performance of each Fund due to its responsibility to oversee the Sub-Advisers and recommend their hiring, termination and replacement.

The Sub-Advisers

Red Cedar

The Adviser has entered into a sub-advisory agreement with Red Cedar Investment Management, LLC ("Red Cedar" or a "Sub-Adviser") with respect to the North Square Strategic Income Fund (the "Red Cedar Sub-Advisory Agreement"). Red Cedar is 51% employee-owned and 49% owned by the 4100 Group, which is a subsidiary of Delta Dental of Michigan and Ohio.

ARI

The Adviser has entered into a sub-advisory agreement with Advisory Research, Inc ("ARI" or a "Sub-Adviser") with respect to the North Square Select Small Cap Fund (the "ARI Sub-Advisory Agreement"). ARI is owned by Ostara Inc., a company owned by the current employees/management of ARI.

Altrinsic

The Adviser has entered into a sub-advisory agreement with Altrinsic Global Advisors, LLC ("Altrinsic" or a "Sub-Adviser") with respect to North Square Altrinsic International Equity Fund (the "Altrinsic Sub-Advisory Agreement"). Altrinsic is an employee-controlled and majority owned global equity investment management firm. John D. Hock is the Founder, CEO and CIO of Altrinsic.

CS McKee

The Adviser has entered into a sub-advisory agreement with CSM Advisors, LLC ("CS McKee" or a "Sub-Adviser") with respect to the North Square McKee Bond Fund (the "CS McKee Sub-Advisory Agreement"). CS McKee is a wholly owned subsidiary of the Adviser.

The Adviser compensates each of the Sub-Advisers out of the investment advisory fees the Adviser receives from the Funds. Each of the Sub-Advisers makes investment decisions for the assets it has been allocated to manage, subject to the overall supervision of the Adviser.

The Sub-Advisory Agreements remain in effect with respect to each Fund for an initial two-year period. After the initial two-year period, the Sub-Advisory Agreements will continue in effect from year to year only as long as such continuance is specifically approved at least annually by (i) the Board or by the vote of a majority of the outstanding voting shares of the Funds, and (ii) by the vote of a majority of the Trustees of the Trust who are not parties to the Sub-Advisory Agreements or interested persons of the Adviser or the Sub-Advisers or the Trust. The Sub-Advisory Agreements may be terminated at any time without the payment of any penalty by the Board or by the vote of a majority of the outstanding voting shares of the Funds, or by the Sub-Advisers or the Adviser, upon 60 days' written notice to the other party. Additionally, the Sub-Advisory Agreements automatically terminate in the event of their assignment. The Sub-

Advisory Agreements provide that the Sub-Advisers shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Sub-Advisory Agreements, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of their duties, or from reckless disregard by the Sub-Advisers of their duties under the Sub-Advisory Agreements.

Fund Expenses

Each Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Fund's shareholders), including among others, legal fees and expenses of counsel to the Fund and the Fund's Independent Trustees; insurance (including trustees' and officers' errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; dues and expenses incurred in connection with membership in investment company organizations; fees and expenses of the Funds' custodian, administrator, transfer agent, registrar and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; expenses relating to investor and public relations; expenses of registering or qualifying securities of the Fund for public sale; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Fund; expenses of preparation and distribution of reports, notices and dividends to shareholders; expenses of the dividend reinvestment plan; compensation and expenses of trustees; any litigation expenses; and costs of shareholders' and other meetings.

The Adviser has contractually agreed to waive its fees and/or pay for or reimburse operating expenses of each Fund to ensure that the total annual fund operating expenses (excluding, as applicable, any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, any acquired fund fees and expenses, expenses incurred in connection with any merger or reorganization, extraordinary expenses such as litigation expenses) do not exceed the limit set forth in the Expense Table in the Prospectus (the "expense cap").

This agreement is in effect until February 28, 2026, for each Fund and may be terminated before that date only by the Trust's Board of Trustees.

	Expense Cap as percent of the average daily net assets
North Square Strategic Income Fund - Class I shares	0.68%*
North Square Strategic Income Fund - Class A shares	0.93%*
North Square Select Small Cap Fund – Class I shares	0.94%
North Square Altrinsic International Equity Fund - Class I shares	0.97%
North Square McKee Bond Fund - Class R6 shares	0.28%
North Square McKee Bond Fund - Class I shares	0.47%

*Prior to January 1, 2025, the Fund's contractual expense limitations were 0.90% and 1.15% for the Class I shares and Class A shares, respectively.

Any waiver of advisory fees or payment or reimbursement of Fund expenses made by the Adviser in a fiscal year may be reimbursed by such Fund for a period ending 36 months after the date of the waiver, payment or reimbursement if the Adviser so requests. This reimbursement may be requested from a Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the expense limitation amount in effect at the time such fees were waived, payments made or expenses reimbursed, or (b) the expense limitation amount in effect at the time of the reimbursement. The reimbursement amount may not exceed the total amount of fees waived and/or Fund expenses paid or reimbursed by the Adviser and will not include any amounts previously reimbursed to the Adviser by a Fund. Any such reimbursement is contingent upon the Board's subsequent review of the reimbursed amounts. A Fund must pay current ordinary operating expenses before the Adviser is entitled to any reimbursement of fees and/or Fund expenses.

Under the Advisory Agreement, the Funds paid the following advisory fees to the Adviser for the past three fiscal periods:

	Advisory Fees Accrued	Advisory Fees (Waived)/ Recouped	Advisory Fee Retained
North Square Strategic Income Fund			
For the fiscal year ended October 31, 2024	\$1,194,659	\$(212,414)	\$982,245
For the fiscal year ended October 31, 2023	\$1,078,462	\$(232,600)	\$845,862
For the fiscal year ended October 31, 2022	\$695,169	\$(235,391)	\$459,778
North Square Select Small Cap Fund			
For the fiscal year ended October 31, 2024	\$164,016	\$(46,346)	\$117,670
For the fiscal year ended October 31, 2023	\$137,089	\$(60,005)	\$77,084
For the fiscal year ended October 31, 2022	\$137,039	\$(58,446)	\$78,593
North Square Altrinsic International Equity Fund			
For the fiscal year ended October 31, 2024	\$967,589	\$(189,973)	\$777,616
For the fiscal year ended October 31, 2023	\$748,254	\$(185,890)	\$562,364

Material Conflicts of Interest. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. Where conflicts of interest arise between a Fund and other accounts managed by the portfolio manager, the Adviser will proceed in a manner that ensures that the Fund will not be treated less favorably. There may be instances where similar portfolio transactions may be executed for the same security for numerous accounts managed by the portfolio managers. In such instances, securities will be allocated in accordance with the Adviser's or Sub-Adviser's trade allocation policy.

Compensation. Each portfolio manager receives a base salary and may receive an annual bonus based on the profitability of the firm. The portfolio managers' compensation arrangements are not determined on the basis of the performance of specific funds or accounts managed.

Ownership of the Funds by the Portfolio Managers. The following chart sets forth the dollar range of Fund shares beneficially owned by each portfolio manager in the Funds that they manage as of October 31, 2024, using the following dollar ranges: None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, \$100,001-\$500,000, \$500,001-\$1,000,000, and over \$1,000,000.

Service Providers

Administrator, Transfer Agent and Fund Accountant. The Funds retain Ultimus Fund Solutions, LLC (“Ultimus”), 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246 (the “Administrator” or the “Transfer Agent”), to serve as transfer agent, dividend paying agent and shareholder service agent, and to provide the Funds with administrative services, including regulatory reporting and necessary office equipment, personnel and facilities. The Funds also retain Ultimus to provide the Funds with fund accounting services, including calculating the Funds’ daily net asset value, necessary office equipment, personnel and facilities. The Funds pay Ultimus for its transfer agency fund administrative services, and fund accounting services. Officers of the Trust are also officers and/or employees of Ultimus (the Administrator, the Transfer Agent and accounting services agent for the Trust). Prior to May 8, 2023, the Funds retained a different service provider for such services.

The Funds paid the following administration fees for the periods indicated (fees paid prior to May 8, 2023 were paid to the Funds' former administrator and fees paid after May 8, 2023 were paid to Ultimus):

	Administration Fees
North Square Strategic Income Fund	
For the fiscal year ended October 31, 2024	\$139,448
For the fiscal year ended October 31, 2023	\$129,451
For the fiscal year ended October 31, 2022	\$71,303

For the fiscal year ended October 31, 2024	\$27,363
For the fiscal year ended October 31, 2023	\$16,407
For the fiscal year ended October 31, 2022	\$16,079
North Square Altrinsic International Equity Fund	
For the fiscal year ended October 31, 2024	\$97,370
For the fiscal year ended October 31, 2023	\$73,872
For the fiscal year ended October 31, 2022	\$49,051
North Square McKee Bond Fund	
For the fiscal year ended October 31, 2024	\$94,408
For the fiscal year ended October 31, 2023	\$88,944
For the fiscal year ended October 31, 2022	\$105,700

Custodian. U.S. Bank National Association (the “Custodian”) is the custodian of the assets of the Funds pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides services for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 1555 N. RiverCenter Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian does not participate in decisions pertaining to the purchase and sale of securities by the Funds.

Independent Registered Public Accounting Firm. Cohen & Company, Ltd., 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, is the independent registered public accounting firm for the Funds. Its services include auditing the Funds’ financial statements and the performance of related tax services.

Counsel to the Trust. Blank Rome LLP, 1271 Avenue of the Americas, New York, New York, 10020, serves as legal counsel to the Trust.

Compliance Consulting Agreement

Northern Lights Compliance Services, LLC (“NLCS”), an affiliate of Ultimus, provides a Chief Compliance Officer to the Trust, as well as related compliance services, pursuant to a consulting agreement between NLCS and the Trust. Under the terms of such agreement, NLCS receives fees from the Funds, which are approved annually by the Board.

Distributor and the Distribution Agreement

Foreside Fund Services, LLC a wholly-owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group) (the “Distributor”) is the distributor (also known as principal underwriter) of the shares of the Fund and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”).

Under a Distribution Agreement with the Trust, the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Adviser, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary’s procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the intermediary. The Distributor does not receive compensation from the Funds for its distribution services. The Adviser pays the Distributor a fee for certain distribution-related services.

Pursuant to the Distribution Agreement, the Distributor receives, and may re-allow to certain financial institutions, all, or a portion of, the sales charge paid on purchases of the Fund’s Class A Shares, Class I Shares, and Class R6 Shares, as applicable. Sales charges and 12b-1 amounts not paid to dealers may be retained by the Distributor for Fund distribution expenses that are permitted under the Fund’s Rule 12b-1 plan. Such amounts paid to the Distributor may be reimbursed to the Adviser for distribution-related expenses.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds’ outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Trust on behalf of a Fund on no less than 60 days’ written notice when authorized either by a vote of a majority of the outstanding voting securities of a Fund or by vote of a majority of the members of the Board who are not “interested persons” (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the operation of the Distribution Agreement, or by the Distributor, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor’s obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor’s willful misfeasance, bad faith or gross negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

Pursuant to the Distribution Agreement, amounts received by the Distributor are not held for profit by the Distributor, but instead are used to pay for and/or reimburse the Adviser for distribution-related expenditures.

Prior to May 8, 2023, and pursuant to a Distribution Agreement, Compass Distributors, LLC, Three Canal Plaza, Suite 100, Portland, Maine 04101, an affiliate of the Distributor, was the exclusive agent for distribution of shares of the Funds.

Rule 12b-1 Plan

The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act (the “12b-1 Plan”) that provides for Fund assets to be used for the payment for distribution services for Class A shares. The 12b-1 Plan provides for the payment of service fees in connection with the provision of post-sales shareholder liaison services to holders of Class A shares, as defined in FINRA regulations, including services such as responding to customer inquiries, and services related to the maintenance of shareholder accounts. Because 12b-1 fees are paid out of Fund assets attributable to Class A shares on an ongoing basis, they will, over time, increase the cost of an investment and may cost more than other types of sales charges.

The 12b-1 Plan provides alternative methods for paying sales charges and may help the Fund grow or maintain asset levels to provide operational efficiencies and economies of scale. The 12b-1 Plan also provides that the distribution fees paid by Class A shares of a Fund may be used to pay for any expenses primarily intended to result in the sale of shares of such Class, including, but not limited to: (a) costs of payments, including incentive compensation, made to agents for and consultants to the Distributor or the Trust, including pension administration firms that provide distribution services and broker-dealers that engage in the distribution of the shares of such Class of the Fund; (b) payments made to, and expenses of, persons who provide support services in connection with the distribution of shares of such Class of the Fund; (c) payments made pursuant to any dealer agreements between the Distributor and certain broker-dealers, financial institutions and other service providers with respect to such Class of the Fund; (d) costs relating to the formulation and implementation of marketing and promotional activities; (e) costs of printing and distributing prospectuses, statements of additional information and reports of the Fund to prospective shareholders of such Class of the Fund; (f) costs involved in preparing, printing and distributing sales literature pertaining to such Class of the Fund; (g) costs involved in obtaining such information, analyses and reports with respect to marketing and promotional activities that the Trust may deem advisable with respect to such Class of the Fund, and (h) reimbursement to the Adviser for expenses advanced on behalf of the Fund or Class with respect to such activities. The 12b-1 Plan is a compensation plan, which means that the Distributor is compensated regardless of its expenses, as opposed to a reimbursement plan which reimburses only for expenses incurred. The Distributor does not retain any 12b-1 fees for profit. All 12b-1 fees are held in a retention account by the Distributor to pay for and/or reimburse the Adviser for distribution related expenditures.

The 12b-1 Plan may not be amended to materially increase the amount to be paid by a Fund’s Class A shares for distribution services without the vote of a majority of the outstanding voting securities of such shares. The 12b-1 Plan shall continue in effect indefinitely, with respect to a Class, provided that such continuance is approved at least annually by a vote of a majority of the Trustees, including the Independent Trustees, cast in person at a meeting called for such purpose or by vote of at least a majority of the outstanding voting securities of such Class. The 12b-1 Plan may be terminated with respect to a Class at any time without penalty by vote of a majority of the Independent Trustees or by vote of the majority of the outstanding voting securities of such Class.

If the 12b-1 Plan is terminated for a Fund’s Class A shares in accordance with its terms, the obligation of the Fund to make payments to the Distributor pursuant to the 12b-1 Plan will cease and the Fund will not be required to make any payments past the termination date. Thus, there is no legal obligation for a Fund to pay any expenses incurred by the Distributor other than fees already payable under the 12b-1 Plan, if the 12b-1 Plan is terminated in accordance with its terms for any reason.

Class A shares of the North Square Strategic Income Fund paid \$4,935 in fees under the 12b-1 Plan during the fiscal year ended October 31, 2024.

Shareholder Service Plan

The Board has adopted, on behalf of each Fund a Shareholder Service Plan (the “Service Plan”) under which the Adviser will provide, or arrange for others (such as banks, trust companies, broker-dealers and other financial intermediaries (each, a “Service Organization”)) to provide, certain specified non-distribution shareholder servicing functions for the Funds’ shares owned by its respective customers, including but not limited to (a) establishing and maintaining accounts and records relating to customers who invest in the Fund; (b) aggregating and processing orders involving Fund shares; (c) processing dividend and other distribution payments from the Fund on behalf of customers; (d) preparing tax reports or forms on behalf of customers; (e) forwarding communications from the Fund; (f) providing sub-accounting with respect to Fund shares; (g) providing customers with a service that invests the assets of their accounts in Fund shares pursuant to specific or pre-authorized instructions; and (h) providing such other similar services as the Adviser may reasonably request to the extent it or a Service Organization is permitted to do so under applicable statutes, rules or regulations. A Fund will pay the Adviser or Service Organizations, as applicable, a shareholder servicing fee at an annual rate of up to 0.15% of the Fund’s average daily net assets, payable monthly.

For the fiscal year ended October 31, 2024, the Funds paid the following shareholder servicing fees, as applicable:

	Class I	Class R6	Class A
North Square Strategic Income Fund	\$118,086	N/A	\$2,961
North Square Select Small Cap Fund	\$2,343	N/A	N/A
North Square Altrinsic International Equity Fund	\$72,567	N/A	N/A
North Square McKee Bond Fund	\$142	N/A	N/A

Marketing and Support Payments

The Adviser and/or its affiliates, out of their own resources and without additional cost to the Funds or its shareholders, may provide cash payments or other compensation to certain financial intermediaries that sell shares of the Funds. These payments are in addition to other fees described in the Funds’ Prospectus and this SAI, and are generally provided for shareholder services or marketing support. Payments for marketing support are typically for inclusion of the Funds on sales lists, including electronic sales platforms. Investors may wish to take these payments into account when considering and evaluating recommendations to purchase shares of the Funds.

Dealer Reallowances

The North Square Strategic Income Fund’s shares are subject to a sales charge that includes a dealer reallowance, which varies depending on how much the shareholder invests. The Distributor pays the appropriate dealer reallowance to dealers who have entered into an agreement with the Distributor to sell shares of the Fund. More detailed information on the sales charge and its application is contained in the Prospectus.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Advisory Agreement and Sub-Advisory Agreements, the Adviser and applicable Sub-Adviser determine which securities are to be purchased and sold by the Funds and which broker-dealers are eligible to execute the Funds’ portfolio transactions. The purchases and sales of securities in the OTC market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for the Funds also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which the Funds will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser and Sub-Advisers will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Adviser that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. Each of the Adviser and Sub-Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement and Sub-Advisory Agreement with the Funds, to be useful in varying degrees, but of indeterminable value.

While it is the Funds' general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Funds, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Funds or to the Adviser or the Sub-Adviser, even if the specific services are not directly useful to the Funds and may be useful to the Adviser or Sub-Adviser(s) in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Funds may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser or Sub-Adviser(s) to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's or Sub-Adviser's overall responsibilities to the Funds.

Investment decisions for a Fund are made independently from those of other client accounts that may be managed or advised by the Adviser or Sub-Adviser. Nevertheless, it is possible that at times, identical securities will be acceptable for both the Funds and one or more of such client accounts. In such event, the position of the Funds and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Funds at the same time, a Fund may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, a Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Adviser's or Sub-Adviser's other client accounts.

The Funds do not effect securities transactions through brokers in accordance with any formula, nor do they effect securities transactions through brokers for selling shares of the Funds. However, broker-dealers who execute brokerage transactions may effect purchase of shares of the Funds for their customers. The brokers may also supply the Funds with research, statistical and other services.

The Funds paid the following brokerage commissions for the periods indicated:

	Broker Commissions
North Square Strategic Income Fund	
For the fiscal year ended October 31, 2024	\$35,651 [^]
For the fiscal year ended October 31, 2023	\$67,195
For the fiscal year ended October 31, 2022	\$78,891
North Square Select Small Cap Fund	
For the fiscal year ended October 31, 2024	\$28,404
For the fiscal year ended October 31, 2023	\$14,942*
For the fiscal year ended October 31, 2022	\$50,057
North Square Altrinsic International Equity Fund	
For the fiscal year ended October 31, 2024	\$85,628
For the fiscal year ended October 31, 2023	\$93,541*
For the fiscal year ended October 31, 2022	\$49,998
North Square McKee Bond Fund	
For the fiscal year ended October 31, 2024	\$0
For the fiscal year ended October 31, 2023	\$0
For the fiscal year ended October 31, 2022	\$0

[^] The lower brokerage commissions paid by the North Square Strategic Income Fund during the October 31, 2024, fiscal year is due to lower trade volume .

*The higher brokerage commissions paid by the North Square Select Small Cap Fund during the October 31, 2024, fiscal year is due to a higher portfolio turnover and the use of brokers to facilitate management meetings with portfolio companies.

Pursuant to the Distribution Agreement, should any amounts be retained by the Distributor, such amounts would not be held for profit by the Distributor, but instead would be used solely for distribution-related expenditures.

For the fiscal year ended October 31, 2024, the Funds listed below paid the following brokerage commissions to brokers who also provided research services.

Fund	Commissions paid for soft dollar arrangements	Dollar value of securities traded
North Square Strategic Income Fund	\$24,082.92	\$75,123,766.37
North Square Select Small Cap Fund	\$9,452	\$14,328,929
North Square Altrinsic International Equity Fund	\$84,310.17	\$52,672,050.58

Directed Brokerage

For the fiscal year ended October 31, 2024, the Funds did not pay any commissions on brokerage transactions directed to brokers pursuant to an agreement or understanding whereby the broker provides research or other brokerage services to the Adviser or Sub-Adviser.

Holdings of Securities of the Fund’s Regular Brokers or Dealers

From time to time, a Fund may acquire and hold securities issued by its “regular brokers or dealers” or the parents of those brokers or dealers. “Regular brokers or dealers” (as such term is defined in the 1940 Act) of the Fund are the ten brokers or dealers that, during the most recent fiscal year, (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions, (ii) engaged as principal in the largest dollar amounts of the portfolio transactions of the Fund, or (iii) sold the largest dollar amounts of the Fund’s shares. The Funds held securities of the following “regular brokers or dealers” during the fiscal year ended October 31, 2024.

Fund	Security	Value as of 10-31-24

PORTFOLIO TURNOVER

Although each Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will generally be taxed at ordinary income tax rates for federal income tax purposes.

	Portfolio Turnover
North Square Strategic Income Fund	
For the fiscal year ended October 31, 2024	115%
For the fiscal year ended October 31, 2023	152%
North Square Select Small Cap Fund	
For the fiscal year ended October 31, 2024	52%
For the fiscal year ended October 31, 2023	45%
North Square Altrinsic International Equity Fund	
For the fiscal year ended October 31, 2024	25%
For the fiscal year ended October 31, 2023	27%
North Square McKee Bond Fund	
For the fiscal year ended October 31, 2024	171%*
For the fiscal year ended October 31, 2023	104%

* The portfolio turnover rate for the Fund increased during 2024 because, as more portfolio companies met price objectives, the Fund reallocated capital to other opportunities.

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures (the “Trust Proxy Policies”) on behalf of the Trust, which delegates the responsibility for voting the Funds’ proxies to the Adviser and Sub-Adviser, as applicable, subject to the Board’s continuing oversight. The Trust Proxy Policies require that the Adviser and Sub-Advisers vote proxies received in a manner consistent with the best interests of the Funds. The Trust Proxy Policies also require the Adviser and Sub-Advisers to present to the Board, at least annually, the Adviser’s Proxy Voting Policies and Procedures (the “Adviser Proxy Policies”) and the Sub-Advisers’ Proxy Voting Policies and Procedures (the “Sub-Adviser Policies”) and a record of each proxy voted by the Adviser and Sub-Advisers on behalf of each Fund, including a report on the resolution of all proxies identified by the Adviser and Sub-Advisers as involving a conflict of interest. See Appendix B for the Trust Proxy Policies, the Adviser Proxy Policies and the Sub-Advisers’ Proxy Policies. The Trust Proxy Policies, the Adviser Proxy Policies and the Sub-Adviser Proxy Policies are intended to serve as guidelines and to further the economic value of each security held by the Funds. The Trust’s CCO will review the Trust Proxy Policies, the Adviser Proxy Policies, and the Sub-Adviser Proxy Policies annually. Each proxy will be considered individually, taking into account the relevant circumstances at the time of each vote.

If a proxy proposal raises a material conflict between the Adviser’s or Sub-Adviser’s interests and a Fund’s interests, the Adviser or Sub-Adviser(s) will resolve the conflict by following the Adviser’s or Sub-Adviser’s policy guidelines or the recommendation of an independent third party.

Each Fund is required to annually file Form N-PX, which lists the Fund’s complete proxy voting record for the 12-month period ending June 30 of each year. Once filed, the Funds’ proxy voting record will be available without charge, upon request, by calling toll-free 1-855-551-5521, on or through the Funds’ website at www.northsquareinvest.com and on the SEC’s web site at www.sec.gov.

CODES OF ETHICS

The Trust, the Adviser, the Sub-Advisers, and the Distributor have each adopted separate Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, access persons of the Adviser, the Sub-Advisers and the Distributor to invest in securities that may be purchased or held by the Funds.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Distributor and the Funds’ Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control (“OFAC”), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity and beneficial owners, if applicable, cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Trust has adopted policies and procedures regarding disclosure of portfolio holdings information (the “Disclosure Policy”). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Trust. The Disclosure Policy applies to each Fund, Adviser, Sub-Adviser and other party involved in the administration, operation or custody of the Funds, including, but not limited to Ultimus, the Board of Trustees, counsel to the Trust, and the Funds’ independent registered public accounting firm. The following policies and procedures describe the circumstances under which the Funds and Adviser, Sub-Advisers and other parties involved in the administration, operation or custody of the Funds, including, but not limited to, Ultimus, the Custodian, the Board of Trustees, Fund Counsel, and the Funds’ independent registered public accounting firm (collectively, the “Service Providers”) may disclose information about the Funds’ portfolio securities. Notwithstanding such policies and procedures, any disclosures of the Funds’ portfolio securities must be consistent with the antifraud provisions of the federal securities laws and the fiduciary obligations of the Funds and the Service Providers. Portfolio holdings information will be deemed public when it has been (1) posted to a Fund’s public website (www.northsquareinvest.com) or (2) disclosed in periodic regulatory filings on the SEC’s website (www.sec.gov).

Disclosure of Portfolio Holdings. The principal Service Provider responsible for dissemination of information about the Funds’ portfolio securities is North Square Investments, LLC in its capacity as investment adviser to the Funds. The Funds and their Service Providers shall only disclose information concerning securities held in the Funds’ portfolios under the following circumstances:

- A. The Adviser may, but is not obligated to, make publicly available the portfolio holdings and/or the top ten holdings for one or more Funds on the Funds’ public websites no earlier than five calendar days after the as-of date of such information (e.g., information as of January 31 may be made available no earlier than February 5). The public disclosure of any Fund’s holdings within the five-calendar day period noted above may only be done by the Adviser after receiving written approval from the Funds’ CCO to do so. In some cases, the Adviser may wait until a Fund’s holdings are previously filed publicly with the SEC (e.g., a Fund’s annual or semi-annual report) and add that filing to the Fund’s website;
- B. The Funds or a Service Provider may disclose the Funds’ portfolio securities holdings to selected third parties when the Funds have a legitimate business purpose for doing so;
- C. Examples of instances in which selective disclosure of the Funds’ portfolio securities may be appropriate include disclosure for due diligence purposes to an investment adviser that is in merger or acquisition talks with the Funds’ investment adviser; disclosure to a newly hired investment adviser or sub-adviser prior to its commencing its duties. Nothing in the Funds’ Policy is intended to prevent the disclosure of any and all portfolio holdings information to the Funds’ Service Providers who generally need access to such information in the performance of their contractual duties and responsibilities, including disclosure to third party service providers of advisory, distribution, Fund Trustees, Directors of the Adviser, custody, fund accounting, sub-administration, independent public accountants, attorneys, proxy voting and other services to the Funds; or disclosure to a rating or ranking organization. Portfolio holdings may also be disclosed to other service providers to the Funds, including pricing services, portfolio management and trading systems. Portfolio managers and other senior officers or spokespersons of the Adviser or Sub-Advisers to the Funds may disclose or confirm the ownership of any individual portfolio holding position to reporters, shareholders, consultants or other interested persons only if such information has been previously publicly disclosed pursuant to the conditions noted above;
- D. As required by the federal securities laws, including the 1940 Act, each Fund shall disclose its portfolio holdings in its applicable regulatory filings, including shareholder reports, reports on Forms N-CSR and N-PORT or

such other filings, reports or disclosure documents as the applicable regulatory authorities may require. For example, the Adviser, Sub-Advisers or their affiliates or service providers may file any report required by applicable law (such as, Schedules 13D, 13G and Form 13F), respond to requests from regulators, and comply with valid subpoenas. Nothing contained in the Funds' policy is intended to prevent the disclosure of portfolio holdings information as may be required by applicable law.

Confidentiality and Duty Not to Trade. The non-public disclosure of Fund portfolio holdings to other third-parties (such as fund evaluation services other than Morningstar and Lipper) may be permissible so long as the third party has signed a confidentiality agreement that is in the form and substance approved by the Funds' CCO. Third parties shall not trade on such information.

Prohibition Against Compensation. Neither the Funds, a Service Provider nor any of their affiliated persons (as that term is defined in the 1940 Act) shall receive compensation in any form, whether in cash or otherwise, in connection with the disclosure of information about the Funds' portfolio securities.

Persons Authorized to Disclose Information. With respect to the quarterly disclosure of portfolio holdings on the Funds' websites, the Adviser is authorized to prepare and post the Funds' portfolio holdings and is also responsible, along with the Funds' administrator, for portfolio holdings disclosure to third party service providers of auditing, custody, proxy voting and other services to the Funds, or disclosure to a rating or ranking organization. With respect to any non-public disclosure of the Funds' portfolio holdings, the Funds' CCO shall be authorized to disclose such information.

Shareholders' Best Interests and Conflicts of Interest. The non-public disclosure of portfolio holdings of the Funds to third parties may only be made following a determination by the Funds' CCO that the disclosure is for a legitimate business purpose and in the best interest of Fund shareholders. In considering whether the disclosure of such information is for a legitimate business purpose and in the best interests of Fund shareholders, the Funds' CCO must consider the conflicts between the interests of the Funds' shareholders, or other of the Adviser's clients and those of the Adviser and any affiliated person of the Funds. The CCO must document any decisions regarding non-public disclosure of portfolio holdings and the rationale therefore. This requirement shall not apply to the disclosure of the Funds' portfolio securities to the Funds' existing service providers of advisory, distribution, custody, fund accounting, sub-administration, independent public accountants, attorneys, proxy voting and other services to the Funds; or disclosure to a rating or ranking organization in connection with the provision of their services to the Funds, or as otherwise provided herein.

The Board, or an authorized committee of the Board, shall receive quarterly reports from the Service Providers stating whether disclosures were made concerning the Funds' portfolio holdings in contravention of these policies and procedures during the previous quarter, and if so, such report shall describe to whom and under what circumstance such disclosures were made.

There is no assurance that the Funds' policies on portfolio holdings information will protect the Funds from the potential misuse of portfolio holdings information by individuals or firms in possession of such information.

Currently, the Adviser posts portfolio holdings information, including top ten holdings, either monthly, quarterly, or promptly after the date such information is filed on the SEC's EDGAR system (generally 60 days) for N-PORT, and the Annual or Semi-Annual Reports. In addition to the Adviser, the Sub-Advisers, Fund Counsel, and the Funds' independent registered public accounting firm, the parties currently receiving non-public portfolio holdings information regarding one or more of the North Square Funds on an ongoing basis pursuant to the various arrangements and conditions described above include:

Advent (SS&C)
Bloomberg
Broadridge
CapBridge
Charles River Development
Dixon MRD & Company
FactSet
Glass Lewis
ICE Data Services
INDATA
ISS
Lipper Inc.
Morningstar
ProxyEdge
Star Compliance
Thomson Financial
Ultimus Fund Solutions, LLC
US Bank, N.A.
Vickers Stock Research Corporation
Wealthtechs

Shareholder In-Kind Distributions. Each Fund may, in certain circumstances, pay redemption proceeds to a shareholder by an in-kind distribution of portfolio securities (instead of cash). In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of the Fund up to seven calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain the confidentiality of the portfolio holdings information and not to trade portfolio securities based on the non-public holdings information.

DETERMINATION OF NET ASSET VALUE

The net asset values per share (the “NAVs”) of a Fund’s shares will fluctuate and are determined as of 4:00 p.m. Eastern Time, the normal close of regular trading on the New York Stock Exchange (the “NYSE”) on each day the NYSE is open for trading. The NAVs may be calculated earlier if trading on the NYSE is restricted or if permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV of each class of each Fund is computed by dividing (a) the difference between the value of the Fund’s securities, cash and other assets and the amount of the Fund’s expenses and liabilities attributable to the class by (b) the number of shares outstanding in that class (assets – liabilities / # of shares = NAV). Each NAV takes into account all of the expenses and fees of that class of the Fund, including management fees and administration fees, which are accrued daily. Due to the fact that different expenses are charged to a Fund’s Class A shares, Class I shares, and Class R6 shares, as applicable, the NAV of a Fund’s classes will vary.

$$\frac{\text{Net Assets of a Fund's Class}}{\text{Shares Outstanding of a Fund's Class}} = \text{NAV of a Fund's Class}$$

Generally, the Funds' investments are valued at market value. Fair value pricing involves subjective judgments, and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has appointed the Adviser as its designee (the "Valuation Designee") for all fair value determinations and responsibilities, with respect to the Funds. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Valuation Designee, subject to review and approval by the Adviser's Valuation Committee, in accordance with procedures approved by the Board. This designation is subject to Board oversight and certain reporting and other requirements designed to facilitate the Board's ability to effectively oversee the Valuation Designee's fair value determinations.

The Funds' securities which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and ask prices.

Securities that are traded on more than one exchange are valued on the exchange determined by the Adviser to be the primary market. Securities primarily traded in the National Association of Securities Dealers Automated Quotation ("NASDAQ"), National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has not been any sale on such day, at the mean between the bid and ask prices. OTC securities which are not traded in the NASDAQ National Market System are valued at the most recent trade price.

Stocks that are "thinly traded" or events occurring when a foreign market is closed but the NYSE is open (for example, the value of a security held by a Fund has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded) may create a situation where a market quote would not be readily available. When a market quote is not readily available, the security's value is based on "fair value" as determined in good faith by the Valuation Designee, subject to review and approval by the Valuation Committee, in accordance with procedures adopted by the Board. The Funds may hold portfolio securities, such as those traded on foreign securities exchanges that trade on weekends or other days when the Funds' shares are not priced. Therefore, the value of the Funds' shares may change on days when shareholders will not be able to purchase or redeem shares.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, amortized to maturity based on their cost to the Funds if acquired within 60 days of maturity or, if already held by the Funds on the 60th day, based on the value determined on the 61st day.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Funds' Prospectus. Shares of the Funds are sold at the next NAV or offering price calculated after receipt of an order for purchase. In order to purchase shares of the Funds, you must invest the initial minimum investment for the relevant class of shares. However, the Adviser reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Funds.

Each Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in the Fund's view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of a Fund within a calendar year). Furthermore, a Fund may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than seven calendar days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the

NYSE is restricted; (ii) for any period during which an emergency exists affecting the sale of a Fund's securities or making such sale or the fair determination of the value of a Fund's net assets is not reasonably practicable; or (iii) for such other periods as the SEC may permit for the protection of the Fund's shareholders. In addition, if shares are purchased using a check or electronic funds transfer through the ACH network and a redemption is requested before the purchase amount has cleared, the Funds may postpone payment of the redemption proceeds up to 15 calendar days while the Funds wait for the purchase amount to clear.

Redemptions In Kind

Each Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by an in-kind distribution of portfolio securities (instead of cash). The securities so distributed would be valued at the same amounts as those assigned to them in calculating the NAV for the Fund shares being redeemed. If a shareholder receives an in-kind distribution, the shareholder could incur brokerage or other charges in converting the securities to cash.

No Fund intends to hold any significant percentage of its portfolio in investments that are classified as illiquid, although each Fund, like virtually all mutual funds, may from time to time hold a small percentage of investments that are classified as illiquid. In the unlikely event a Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held investments that are classified as illiquid, such distribution may contain a pro rata portion of such illiquid investments or the Fund may determine, based on a materiality assessment, not to include illiquid investments in the in-kind redemption. No Fund anticipates that it would ever selectively distribute a greater than pro rata portion of any illiquid investments to satisfy a redemption request. If such investments are included in the distribution, shareholders may not be able to liquidate such investments and may be required to hold such investments indefinitely. A shareholder's ability to liquidate such investments distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such investments distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these investments by the recipient.

FEDERAL INCOME TAX MATTERS

The following is a summary of certain material U.S. federal (and, where noted, state and local) income tax considerations affecting each Fund and its shareholders. The discussion is very general. Current and prospective shareholders are therefore urged to consult their own tax advisers with respect to the specific federal, state, local and foreign tax consequences of investing in the Funds. The summary is based on the laws in effect on the date of this SAI and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect.

Each Fund is treated as a separate entity from other series of the Trust for federal income tax purposes. Each Fund has elected to be and intends to continue to qualify each year for treatment as a "regulated investment company" under Subchapter M of the Code by complying with all applicable requirements of the Code, including, among other things, requirements as to the sources of each Fund's income, diversification of the Fund's assets and timing of Fund distributions. To so qualify, a Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in "qualified publicly traded partnerships" (*i.e.*, partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income); (b) diversify its holdings so that, at the end of each quarter of the Fund's taxable year, (i) at least 50% of the market value

of the Fund's assets is represented by cash, securities of other regulated investment companies, U.S. Government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund's assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. Government securities or securities of other regulated investment companies) of any one issuer, in the securities (other than the securities of other regulated investment companies) of any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more "qualified publicly traded partnerships;" and (c) distribute an amount equal to the sum of at least 90% of its investment company taxable income (computed without regard to the dividends-paid deduction) and 90% of its net tax-exempt income, if any, for the tax year (including, for purposes of satisfying this distribution requirement, certain distributions made by the Fund after the close of its taxable year that are treated as made during such taxable year).

As a regulated investment company, no Fund will be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it distributes to its shareholders provided that it satisfies a minimum distribution requirement. In order to also avoid liability for a 4% non-deductible federal excise tax, each Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period generally ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which a Fund paid no federal income tax. Each Fund will be subject to income tax at regular corporate tax rates on any taxable income or gains that it does not distribute to its shareholders. Each Fund's policy is to distribute to its shareholders all investment company taxable income (determined without regard to the deduction for dividends paid) and any net capital gain (the excess of net long-term capital gain over net short-term capital loss) for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Funds will not be subject to any federal income or excise taxes. As of October 31, 2024, the Funds accumulated the following non-expiring capital loss carryforwards:

	Short-Term	Long-Term
North Square Strategic Income Fund	\$4,185,185	\$673,526
North Square Select Small Cap Fund	\$0	\$0
North Square Altrinsic International Equity Fund	\$0	\$0
North Square McKee Bond Fund	\$5,066,648	\$6,793,243

If, for any taxable year, a Fund were to fail to qualify as a regulated investment company or were to fail to meet certain minimum distribution requirements under the Code, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, in the event of a failure to qualify, a Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, including any distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends received deduction in the case of corporate shareholders. Moreover, if a Fund were to fail to qualify as a regulated investment company in any year, it would be required to pay out its earnings and profits accumulated in that year in order to qualify again as a regulated investment company. Under certain circumstances, a Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so the Fund might incur significant Fund-level taxes and might be forced to dispose of certain assets. If a Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a regulated investment company in a subsequent year.

Shareholders generally will be subject to federal income taxes on distributions made by a Fund whether paid in cash or additional shares. Distributions of net investment income (including interest, dividend income and net short-term capital gain in excess of any net long-term capital loss, less certain expenses), other than qualified dividend income, will be taxable to shareholders as ordinary income. Distributions of qualified dividend income generally will be taxed to non-corporate shareholders at the federal income tax rates applicable to net capital gain, provided the Fund reports the amount distributed as qualified dividend income.

In general, dividends may be reported by a Fund as qualified dividend income if they are attributable to qualified dividend income received by the Fund. Qualified dividend income generally means dividend income received from the Fund's investments in common and preferred stock of U.S. companies and stock of certain qualified foreign corporations, provided that certain holding period and other requirements are met by both the Fund and its shareholders. If 95% or more of a Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

A foreign corporation is treated as a qualified foreign corporation for this purpose if it is incorporated in a possession of the United States or it is eligible for the benefits of certain income tax treaties with the United States and meets certain additional requirements. Certain foreign corporations that are not otherwise qualified foreign corporations will be treated as qualified foreign corporations with respect to dividends paid by them if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Passive foreign investment companies are not qualified foreign corporations for this purpose. Dividends received by a Fund from REITs generally do not qualify for treatment as qualified dividend income.

Distributions by a Fund to its shareholders that a Fund properly reports as "Section 199A dividends," as described below, are treated as qualified REIT dividends in the hands of non-corporate shareholders. Non-corporate shareholders are permitted a federal income tax deduction equal to 20% of qualified REIT dividends received by them, subject to certain limitations. Generally, a "Section 199A dividend" is any dividend or portion thereof that is attributable to certain dividends received by a regulated investment company from REITs, to the extent such dividends are properly reported as such by the regulated investment company in a written notice to its shareholders. A Section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying regulated investment company shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. A Fund is permitted to report such part of its dividends as Section 199A dividends as are eligible, but is not required to do so.

Dividends paid by a Fund may qualify in part for the dividends-received deduction available to corporate shareholders, provided the Fund reports the amount distributed as a qualifying dividend and certain holding period and other requirements under the Code are satisfied. The reported amount, however, cannot exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. Eligibility for qualified dividend income treatment and the dividends-received deduction may be reduced or eliminated if, among other things, (i) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property or (ii) certain holding period requirements are not satisfied at both the Fund and shareholder levels. In addition, qualified dividend income treatment is not available if a shareholder elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest.

Distributions of net capital gain, if any, that a Fund reports as capital gain dividends will be taxable to non-corporate shareholders as long-term capital gain without regard to how long a shareholder has held shares of the Fund. A Fund may retain certain amounts of capital gains and designate them as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital

gain, their proportionate shares of the undistributed amounts so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on those undistributed amounts against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase their federal income tax basis in their shares by an amount equal to the excess of the amounts of undistributed net capital gain included in their respective income over their respective income tax credits.

Distributions in excess of earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholder's basis in his or her Fund shares. A distribution treated as a return of capital will reduce the shareholder's basis in his or her shares, which will result in an increase in the amount of gain (or a decrease in the amount of loss) that will be recognized by the shareholder for tax purposes on a later sale of such shares. After the shareholder's basis is reduced to zero, any distributions in excess of earnings and profits will be treated as a capital gain, assuming the shareholder holds his or her shares as capital assets.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (among other categories of income) are generally taken into account in computing a shareholder's net investment income.

Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable for federal income tax purposes as if received on December 31 of the calendar year in which declared. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the federal alternative minimum tax. In addition, certain distributions made after the close of a taxable year of a Fund may be "spilled back" and treated for certain purposes as paid by the Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a regulated investment company's undistributed income and gain subject to the 4% excise tax described above, such "spilled back" dividends are treated as paid by the regulated investment company when they are actually paid.

A redemption of Fund shares may result in recognition of a taxable gain or loss. Assuming the redeemed shares are held as capital assets, the gain or loss will generally be treated as a long-term capital gain or loss if the shares are held for more than one year, and as a short-term capital gain or loss if the shares are held for one year or less. Any loss realized upon a redemption or exchange of shares held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long term capital gains during such six month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the same Fund or other substantially identical stock or securities are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

If a shareholder recognizes a loss with respect to a Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder other than an S corporation (or certain greater amounts over a combination of years), the shareholder must file with the Internal Revenue Service (the "IRS") a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is so reportable does not affect the legal determination of whether the taxpayer's treatment of the loss is proper.

A Fund's transactions in options and other similar transactions, such as futures, may be subject to special provisions of the Code that, among other things, affect the character of any income realized by the Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses, affect the holding period of the Fund's securities, affect whether distributions will be eligible for the dividends-received deduction or be treated as qualified dividend income and affect the determination of whether capital gain and loss is characterized as long-term or short-term capital gain or loss. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions may also require a Fund to "mark-to-market" certain types of the positions in its portfolio (*i.e.*, treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. Each Fund will monitor these transactions and will make the appropriate entries in its books and records, and if a Fund deems it advisable, will make appropriate elections if available in order to mitigate the effect of these rules, prevent disqualification of the Fund as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes.

A Fund's transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted above, distributions of net short-term capital gain are taxable to shareholders as ordinary income while distributions of net long-term capital gain are taxable to shareholders as long-term capital gain, regardless of how long the shareholder has held shares of the Fund.

A Fund's entry into a short sale transaction, an option or certain other contracts, such as futures, could be treated as the constructive sale of an appreciated financial position, causing the Fund to realize gain, but not loss, on the position.

If a Fund invests in certain pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund elects to include market discount in income currently), the Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, a Fund must distribute, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income to shareholders to avoid federal income and excise taxes. Therefore, a Fund may have to sell portfolio securities (potentially under disadvantageous circumstances) to generate cash, or may have to undertake leverage by borrowing cash, to satisfy these distribution requirements. Dispositions of portfolio securities may result in additional gains and additional distribution requirements.

If a Fund invests in a market discount bond, it will be required to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount, unless the Fund elects to include the market discount in income as it accrues as discussed above. A market discount bond is a security acquired in the secondary market at a price below its redemption value (or its adjusted issue price if it is also an original issue discount bond).

A Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries, which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the United States may reduce or eliminate such taxes in some cases. So long as a Fund qualifies for treatment as a regulated investment company and incurs "qualified foreign taxes," if more than 50% of the value of its net assets at the close of its taxable year consist of stock or securities of foreign corporations, the Fund may elect to "pass through" to its shareholders the amount of such foreign taxes paid. If this election is made, information with respect to the amount of the foreign income taxes that are allocated to the Fund's shareholders will be provided to them and any shareholder subject to tax on dividends

will be required (i) to include in ordinary gross income (in addition to the amount of the taxable dividends actually received) his/her proportionate share of the foreign taxes paid that are attributable to such dividends; and (ii) either to deduct his/her proportionate share of such foreign taxes in computing his/her taxable income or to claim that amount as a foreign tax credit (subject to applicable limitations) against U.S. income taxes.

Shareholders who do not itemize deductions for U.S. federal income tax purposes will not be able to deduct their pro rata portion of qualified foreign taxes paid by the Fund, although such shareholders will be required to include their shares of such taxes in gross income if the Fund makes the election described above. Qualified foreign taxes generally include taxes that would be treated as income taxes under U.S. tax regulations but do not include most other taxes, such as stamp taxes, securities transaction taxes, and similar taxes. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability.

If a Fund makes the election to pass through qualified foreign taxes and a shareholder chooses to take a credit for the foreign taxes deemed paid by such shareholder, the amount of the credit that may be claimed in any year may not exceed the same proportion of the U.S. tax against which such credit is taken that the shareholder's taxable income from foreign sources (but not in excess of the shareholder's entire taxable income) bears to his entire taxable income. For this purpose, long-term and short-term capital gains a Fund realizes and distributes to shareholders will generally not be treated as income from foreign sources in their hands, nor will distributions of certain foreign currency gains subject to Section 988 of the Code or of any other income realized by the Fund that is deemed, under the Code, to be U.S.-source income in the hands of the Fund. This foreign tax credit limitation may also be applied separately to certain specific categories of foreign-source income and the related foreign taxes. As a result of these rules, which may have different effects depending upon each shareholder's particular tax situation, certain shareholders may not be able to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Shareholders who are not liable for U.S. federal income taxes, including tax-exempt shareholders, will ordinarily not benefit from this election. If a Fund does make the election, it will provide required tax information to shareholders. A Fund generally may deduct any foreign taxes that are not passed through to its shareholders in computing its income available for distribution to shareholders to satisfy applicable tax distribution requirements.

Foreign exchange gains or losses realized by a Fund in connection with certain transactions involving foreign currency-denominated debt securities, certain options and futures contracts relating to foreign currency, foreign currency forward contracts, foreign currencies, or payables or receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains or losses to be treated as ordinary gain or loss and may affect the amount, timing and character of distributions to shareholders.

A Fund may purchase the securities of certain foreign companies called passive foreign investment companies ("PFICs"). PFICs may be the only or primary means by which a Fund may invest in some countries. If a Fund invests in PFICs, it may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend to shareholders. Additional charges in the nature of interest may be imposed on either a Fund or shareholders with respect to deferred taxes arising from such distributions or gains. Capital gains on the sale of such holdings will be deemed to be ordinary income regardless of how long such PFICs are held. A "qualified electing fund" election or a "mark to market" election may generally be available that would ameliorate these adverse tax consequences, but such elections could require a Fund to recognize taxable income or gain (subject to the distribution requirements applicable to regulated investment companies, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax on a Fund, the Fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the Fund. In order for a Fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to the Fund on an annual basis, which it might not agree to do. A Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments.

A Fund is required to withhold (as “backup withholding”) a portion of reportable payments, including dividends, capital gain distributions and the proceeds of redemptions and exchanges or repurchases of Fund shares, paid to shareholders who have not complied with certain IRS regulations. The backup withholding rate is currently 24%. In order to avoid this withholding requirement, shareholders must certify on IRS Forms W-9 or on certain other documents, that the Social Security Numbers or other Taxpayer Identification Numbers they provide are their correct numbers and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. A Fund may nevertheless be required to backup withhold if it receives notice from the IRS or a broker that a number provided is incorrect or that backup withholding is applicable as a result of previous underreporting of interest or dividend income.

Ordinary dividends and certain other payments made by a Fund to non-U.S. shareholders are generally subject to withholding tax at a 30% rate (or a lower rate as may be determined in accordance with any applicable treaty). In order to obtain a reduced rate of withholding, a non-U.S. shareholder will be required to provide an IRS Form W-8BEN or similar form certifying its entitlement to benefits under a treaty. The withholding tax does not apply to regular dividends paid to a non-U.S. shareholder who provides an IRS Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. shareholder’s conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the non-U.S. shareholder were a U.S. shareholder. A non-U.S. corporation receiving effectively connected dividends may also be subject to additional “branch profits tax” imposed at a rate of 30% (or a lower treaty rate).

The 30% withholding tax described in the preceding paragraph generally will not apply to distributions of net capital gain, to redemption proceeds, or to dividends that a Fund reports as (a) interest-related dividends, to the extent such dividends are derived from the Fund’s “qualified net interest income,” or (b) short-term capital gain dividends, to the extent such dividends are derived from the Fund’s “qualified short-term gain.” “Qualified net interest income” is a Fund’s net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. “Qualified short-term gain” generally means the excess of the net short-term capital gain of a Fund for the taxable year over its net long-term capital loss, if any. In order to qualify for an exemption from withholding, a non-U.S. shareholder will need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or other applicable form). Backup withholding will not be applied to payments that are subject to this 30% withholding tax.

Unless certain non-U.S. entities that hold Fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to the Fund’s distributions to such non-U.S. entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

This discussion and the related discussion in the Prospectus have been prepared by management of the Funds, and counsel to the Trust has expressed no opinion in respect thereof.

Shareholders and prospective shareholders of the Funds should consult their own tax advisers concerning the effect of owning shares of the Fund in light of their particular tax situations.

Equalization Accounting

The Fund may use “equalization accounting” to determine the portion of its income and gains that has been distributed with respect to each taxable year. Under equalization accounting, the Fund would allocate a portion of its undistributed investment company taxable income and net capital gain to redemption proceeds. This method would allow the Fund to reduce the amount of such income and gains that it distributes to non-redeeming shareholders but would not reduce the total return on a shareholder’s investment. If the IRS determines that the Fund’s equalization method is improper

and that the Fund has under-distributed its income and gain for any taxable year, the Fund may be liable for federal income and/or excise tax. Equalization accounting is not available for a fund that is a personal holding company for federal income tax purposes.

DIVIDENDS AND DISTRIBUTIONS

Each Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund's net investment income, substantially all of which will be declared as dividends to the Fund's shareholders.

The amount of income dividend payments by a Fund is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board. The Funds do not pay "interest" or guarantee any fixed rate of return on their investments..

Each Fund also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain the Fund may realize from transactions involving investments held for less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any available carryover of capital losses), although a distribution from capital gains, will be distributed to shareholders with and as a part of the income dividends paid by the Fund and will be taxable to shareholders as ordinary income for federal income tax purposes. If during any year a Fund realizes a net gain on transactions involving investments held for more than the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses available to be carried over) generally will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax adviser.

Any dividend or distribution paid by a Fund reduces the Fund's NAVs on the date paid by the amount of the dividend or distribution per share. Accordingly, a dividend or distribution paid shortly after a purchase of shares by a shareholder will generally be taxable, even if it effectively represents a partial return of the shareholder's capital.

Dividends and other distributions will be made in the form of additional shares of a Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of dividends and/or distributions by notifying the Transfer Agent in writing or by telephone, but any such change will be effective only as to dividends and other distributions for which the record date is five or more calendar days after the Transfer Agent has received the request.

A Fund's investments in partnerships, if any, including in qualified publicly traded partnerships, may result in that Fund being subject to state, local or foreign income, franchise or withholding tax liabilities.

GENERAL INFORMATION

Exchange Place Advisors Trust (formerly North Square Investments Trust) is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on August 2, 2018. The Trust has a number of outstanding series of shares of beneficial interest, each of which represents interests in a separate portfolio of securities. The Trust's Declaration of Trust permits the Trustees to create additional series of shares, to issue an unlimited number of full and fractional shares of beneficial interest of each series, including the Funds, and to divide or combine the shares of any series into a greater or lesser number of shares without thereby materially changing the proportionate beneficial interest in the series.

The Trust may offer more than one class of shares of any series. The North Square Strategic Income Fund currently offers a Class A and Class I share class. The North Square Select Small Cap Fund and the North Square Altrinsic International Equity Fund currently offer only a Class I share class. The North Square McKee Bond Fund currently offers a Class R6 and Class I share class.

The Trust has reserved the right to create and issue additional series or classes. Subject to the distinctions permitted among classes of the Trust or any series as established by the Board consistent with the requirements of the 1940 Act, each share of the Trust or any series shall represent an equal beneficial interest in the net assets of the Trust or such series, and each shareholder of the Trust or any series shall be entitled to receive such shareholder's pro rata share of distributions of income and capital gains, if any, made with respect to the Trust or such series. Upon redemption of the shares of any series, the applicable shareholder shall be paid solely out of the funds and property of such series of the Trust. Except as otherwise provided by the Board, shareholders shall have no preemptive or other right to subscribe to any additional shares or other securities issued by the Trust.

The Board may require shareholders to redeem shares for any reason under terms set by the Board. When issued, shares are fully paid and non-assessable. The Board may, however, cause shareholders, or shareholders of a particular series or class, to pay certain transfer agency, servicing or similar agent charges by setting off such charges due from such shareholder from declared but unpaid dividends owed such shareholder and/or by reducing the number of shares in the account of such shareholder by that number of full and/or fractional shares which represents the outstanding amount of such charges due from such shareholder.

Shareholders are entitled to one vote for each share held on matters on which they are entitled to vote (and a proportionate fractional vote for each fraction of a share). The Trust is not required and has no current intention to hold annual meetings of shareholders, although the Trust will hold special meetings of Fund shareholders when in the judgment of the Board of the Trust it is necessary or desirable to submit matters for a shareholder vote or as otherwise required by the 1940 Act or other applicable federal law. It is not anticipated that the Trust will hold shareholders' meetings unless required by law or its Declaration of Trust or By-Laws. On any matters submitted to a vote of the shareholders, all shares of the Trust then entitled to vote shall be voted in aggregate, except: (i) when required by the 1940 Act, shares shall be voted by individual series or class; (ii) when the matter involves any action that the Board has determined will affect only the interests of one or more series, then only shareholders of such series shall be entitled to vote thereon; and (iii) when the matter involves any action that the Board has determined will affect only the interests of one or more classes, then only the shareholders of such class or classes shall be entitled to vote thereon. Accordingly, shareholders of each series generally vote separately, for example, to approve investment advisory contracts or changes in fundamental investment policies or restrictions, but shareholders of all series may vote together to the extent required under the 1940 Act, such as in the election or selection of Trustees, principal underwriters and accountants for the Trust. Under certain circumstances, the shareholders of one or more series could control the outcome of these votes.

Shares of each class of a series represent an equal pro rata interest in such series and, generally, have identical voting, dividend, liquidation, and other rights, preferences, powers, terms and conditions, except that: (i) each class shall have a different designation; (ii) each class of shares shall bear any class expenses relevant to that specific class; and (iii) each class shall have separate voting rights on any matter submitted to shareholders in which the interests of one class differ from the interests of any other class. Upon liquidation or dissolution of a Fund, shareholders of the Fund would generally be entitled to share pro rata in the net assets of the Fund's available for distribution to shareholders.

The shareholders of the Funds have the power to vote only: (i) for the election or removal of Trustees as and to the extent provided in the Trust's Declaration of Trust; (ii) with respect to such additional matters relating to the Trust as may be required by federal law including the 1940 Act, or any registration of the Trust with the SEC (or any successor agency) or any state; and (iii) as the Board may otherwise consider necessary or desirable in its sole discretion.

The Trust is an entity of the type commonly known as a “Delaware statutory trust.” Under Delaware law and the Trust’s Declaration of Trust, shareholders are entitled to the same limitation of personal liability extended to shareholders of corporations organized under Delaware law. Therefore, shareholders generally will not be subject to personal liability for Fund obligations. The risk that a shareholder will incur personal liability for Fund obligations is limited to the circumstances in which a state court may not apply Delaware law or the terms of the Trust’s Declaration of Trust.

FINANCIAL STATEMENTS

Incorporated by reference herein are the financial statements of the Funds dated as of the fiscal year ended October 31, 2024, which include the “Report of Independent Registered Public Accounting Firm”, “Schedule of Investments”, “Statement of Assets and Liabilities”, “Statement of Operations”, “Statements of Changes in Net Assets”, “Financial Highlights” and “Notes to Financial Statements.” A copy of the Funds’ financial statements can be obtained at no charge on the Funds’ website, www.northsquareinvest.com, by calling 1-855-551-5521, or by writing to the Funds at the address located on the cover page.

**APPENDIX A -
DESCRIPTION OF SECURITIES RATINGS**

Corporate Bonds (Including Convertible Bonds)

Moody's

Aaa	Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.
Aa	Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
A	Obligations rated A are considered upper-medium grade and are subject to low credit risk.
Baa	Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.
Ba	Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.
B	Obligations rated B are considered speculative and are subject to high credit risk.
Caa	Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.
Ca	Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery.
C	Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.
Note	Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P

AAA	An obligation rated AAA has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.
AA	An obligation rated AA differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.
A	An obligation rated A is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.
BBB	An obligation rated BBB exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Note	Obligations rated BB, B, CCC, CC, and C are regarded as having significant speculative characteristics. BB indicates the least degree of speculation and C the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.
BB	An obligation rated BB is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial or economic conditions, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.
B	An obligation rated B is more vulnerable to nonpayment than obligations rated BB, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.
CCC	An obligation rated CCC is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.
CC	An obligation rated CC is currently highly vulnerable to nonpayment.
C	The C rating may be used to cover a situation where a bankruptcy petition has been filed or similar action has been taken, but payments on this obligation are being continued.
D	An obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.
Note	Plus (+) or minus (-). The ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories. The "r" symbol is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns, which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk-such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

Preferred Stock

Moody's

Aaa	An issue that is rated "Aaa" is considered to be a top-quality preferred stock. This rating indicates good asset protection and the least risk of dividend impairment within the universe of preferred stocks.
Aa	An issue that is rated "Aa" is considered a high-grade preferred stock. This rating indicates that there is a reasonable assurance the earnings and asset protection will remain relatively well maintained in the foreseeable future.

A	An issue that is rated “A” is considered to be an upper-medium grade preferred stock. While risks are judged to be somewhat greater than in the “Aaa” and “Aa” classification, earnings and asset protection are, nevertheless, expected to be maintained at adequate levels.
Baa	An issue that is rated “Baa” is considered to be a medium-grade preferred stock, neither highly protected nor poorly secured. Earnings and asset protection appear adequate at present but may be questionable over any great length of time.
Ba	An issue that is rated “Ba” is considered to have speculative elements and its future cannot be considered well assured. Earnings and asset protection may be very moderate and not well safeguarded during adverse periods. Uncertainty of position characterizes preferred stocks in this class.
B	An issue that is rated “B” generally lacks the characteristics of a desirable investment. Assurance of dividend payments and maintenance of other terms of the issue over any long period of time may be small.
Caa	An issue that is rated “Caa” is likely to be in arrears on dividend payments. This rating designation does not purport to indicate the future status of payments.
Ca	An issue that is rated “Ca” is speculative in a high degree and is likely to be in arrears on dividends with little likelihood of eventual payments.
C	This is the lowest rated class of preferred or preference stock. Issues so rated can thus be regarded as having extremely poor prospects of ever attaining any real investment standing.
Note	Moody’s applies numerical modifiers 1, 2, and 3 in each rating classification: the modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.
S&P	
AAA	This is the highest rating that may be assigned by Standard & Poor’s to a preferred stock issue and indicates an extremely strong capacity to pay the preferred stock obligations.
AA	A preferred stock issue rated AA also qualifies as a high-quality, fixed-income security. The capacity to pay preferred stock obligations is very strong, although not as overwhelming as for issues rated AAA.
A	An issue rated A is backed by a sound capacity to pay the preferred stock obligations, although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions.
BBB	An issue rated BBB is regarded as backed by an adequate capacity to pay the preferred stock obligations. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to make payments for a preferred stock in this category than for issues in the A category.
BB, B, CCC	Preferred stock rated BB, B, and CCC is regarded, on balance, as predominantly speculative with respect to the issuer’s capacity to pay preferred stock obligations. BB indicates the lowest degree of speculation and CCC the highest. While such issues will likely have some quality and protective

characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

CC	The rating CC is reserved for a preferred stock issue that is in arrears on dividends or sinking fund payments, but that is currently paying.
C	A preferred stock rated C is a nonpaying issue.
D	A preferred stock rated D is a nonpaying issue with the issuer in default on debt instruments.
N.R.	This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular type of obligation as a matter of policy.
Note	Plus (+) or minus (-). To provide more detailed indications of preferred stock quality, ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Short Term Ratings

Moody's

Moody's employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

Prime-1	<p>Issuers rated Prime-1 (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:</p> <ul style="list-style-type: none">• Leading market positions in well-established industries.• High rates of return on funds employed.• Conservative capitalization structure with moderate reliance on debt and ample asset protection.• Broad margins in earnings coverage of fixed financial charges and high internal cash generation.• Well-established access to a range of financial markets and assured sources of alternate liquidity.
Prime-2	<p>Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.</p>
Prime-3	<p>Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.</p>

Not Prime Issuers rated Not Prime do not fall within any of the Prime rating categories.

S&P

A-1 A short-term obligation rated A-1 is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B A short-term obligation rated B is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C A short-term obligation rated C is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D A short-term obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

APPENDIX B - PROXY VOTING POLICIES AND PROCEDURES

EXCHANGE PLACE ADVISORS TRUST (FORMERLY NORTH SQUARE INVESTMENTS TRUST) PROXY VOTING POLICIES AND PROCEDURES

Exchange Place Advisors Trust (the “Trust”) is registered as an open-end investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisers

The Board believes that the investment adviser of each Fund (each an “Adviser” and, collectively, the “Advisers”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust shall therefore defer to, and rely on, the Adviser of each Fund to make decisions on how to cast proxy votes on behalf of such Fund.

The Trust hereby designates the Adviser of each Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Adviser shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Adviser shall perform these duties in accordance with the Adviser’s proxy voting policy, a copy of which shall be presented to this Board for its review. Each Adviser shall promptly provide to the Board updates to its proxy voting policy as they are adopted and implemented.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If a Fund or an Adviser has a website, a copy of the Adviser’s proxy voting policy and this Policy may be posted on such website. A copy of such policies and of each Fund’s proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund’s toll-free telephone number as printed in the Fund’s prospectus. The Trust’s administrator shall reply to any Fund shareholder request within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Adviser shall provide a complete voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as adviser, to the Trust’s co-administrator within 30 days after June 30 of each year. The Trust’s administrator will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.

PROXY VOTING DISCLOSURES

A. The Trust shall include in its registration statements:

1. A description of these Policies and Procedures and of the Adviser’s Policies and Procedures; and
2. A statement disclosing that information regarding how the Fund(s) voted proxies relating to portfolio securities held by the Fund(s) during the most recent twelve-month period ended June 30 is available without charge, upon request, by calling the Fund’s toll-free telephone number or through a specified Internet address or both and on the SEC website.

B. The Trust shall include in its Annual and Semi-Annual Reports to shareholders:

1. A statement that a description of these Policies and Procedures is available without charge, upon request, by calling the Fund's toll-free telephone number or through a specified Internet address or both and on the SEC website.
2. A statement that information regarding how the Fund(s) voted proxies relating to portfolio securities held by the Funds during the most recent 12-month period ended June 30 is available without charge, upon request, by calling the Fund's toll-free telephone number or through a specified Internet address or both and on the SEC website.

Responsible Party: Adviser

See each Adviser's/Sub-Adviser's Manual for its Proxy Voting Policy

PROXY VOTING POLICY AND PROCEDURES

I. STATEMENT OF POLICY

Proxy voting is an important right of shareholders and reasonable care and diligence must be undertaken to ensure that such rights are properly and timely exercised. We believe that active ownership, including exercising our proxy voting rights, benefits all stakeholders and can enhance a company's long-term value creation. As long-term investors, proxy voting offers additional opportunities to deepen engagement with companies and foster dialogue. When Altrinsic has discretion to vote the proxies of its clients, it will vote those proxies in the best interest of its clients and in accordance with these procedures. Certain clients may retain proxy voting authority and in those circumstances Altrinsic has no proxy voting responsibility.

II. PROXY VOTING PROCEDURES

All proxies received by Altrinsic will be forwarded to a Portfolio Manager, or his designee, with a list of accounts that hold the security, together with the number of votes each account controls (reconciling duplications), and the date by which Altrinsic must vote the proxy in order to allow enough time for the completed proxy to be returned to the issuer prior to the vote taking place. Operations will keep a record or be able to readily access a report from the electronic filing of each proxy received.

Absent material conflicts (See §IV below), a Portfolio Manager, or his designee, will determine how Altrinsic should vote the proxy. The Portfolio Manager, or his designee, will provide the proxy voting ballot to Operations. Operations will provide the proxy with the proposed vote to Compliance for review. Upon completion of review, Compliance will approve the proxy ballot and return it to Operations. Operations is responsible for voting the proxy electronically in a timely and appropriate manner.

After a vote has been cast, Operations will provide Compliance with a proxy vote report.

Compliance will review this report to confirm that the proxy was voted in accordance with the provided instructions and was voted in a timely manner. Altrinsic or its clients may retain a third party to assist in coordinating and voting proxies with respect to client securities. Currently, Altrinsic does not directly engage with any third-party proxy voting companies for research.

III. VOTING GUIDELINES

In the absence of specific voting guidelines from the client, Altrinsic will vote proxies in the best interest of its clients. Each proposal will be evaluated separately but the following guidelines will generally be followed:

- Altrinsic will vote in favor of routine corporate housekeeping proposals, including election of directors (where no corporate governance issues are implicated) and selection of auditors;
- Altrinsic will vote against proposals that make it more difficult to replace members of the issuer's board of directors, including proposals to stagger the board, cause

1. management to be overrepresented on the board, introduce cumulative voting, introduce unequal voting rights and create supermajority voting;
 - Altrinsic will vote against any resolution that gives boards authorization to issue more than 15% of share capital without shareholder approval, either through a rights issue or direct issuance; and
 - Altrinsic will vote against any resolution that gives boards authority to waive pre-emption rights for material share issuances.
- 2.

For other proposals, Altrinsic shall determine on a case-by-case basis the vote which is in the best interests of its clients and may take into account certain factors, including but not limited to:

- Whether the proposal was recommended by management and Altrinsic's opinion of management;
- The effect on shareholder value;
- The issuer's business practices;
- Stock dilution and equity-based compensation;
- Whether the proposal acts to entrench existing management; and
- Whether the proposal fairly compensates management for past and future performance

A. PROXIES OF CERTAIN NON-US ISSUERS

Proxy voting in certain countries may require "share blocking". Share blocking is intended to facilitate the voting process; however, it also imposes constraints. Shareholders wishing to vote their proxies must deposit their shares before the date of the meeting with a designated depository which results in the shares being unavailable to sell. Accordingly, if share blocking is required, we will generally choose not to vote those shares.

IV. CONFLICTS OF INTEREST

Compliance will review the proxy vote proposed by the Portfolio Manager, or his designee, and identify any conflicts of interest that exist between Altrinsic and its clients. Such conflicts could include, but are not limited to, Altrinsic's or its affiliates' relationships with the issuer or its affiliates.

If a potential or actual conflict exists, Altrinsic will determine whether voting in accordance with the voting guidelines and factors described above is in the best interests of the client including clients that are subject to ERISA. If Altrinsic determines that a material conflict exists and that voting in accordance with the voting guidelines and factors described above is not in the best interests of the clients, Altrinsic will make the appropriate disclosures to clients and either request that the client vote the proxy(ies) or abstain from voting.

V. DISCLOSURE

Clients may contact Compliance in order to obtain information on how Altrinsic voted such client's proxies and/or to request a copy of these policies and procedures. If a client requests this information, a written response will be provided to the client that lists, with respect to each voted proxy about which the client has inquired (a) the name of the issuer; (b) the proposal voted upon; and (c) how Altrinsic voted the client's proxy.

VI. RECORDKEEPING

Compliance, with the assistance of the operations team, will maintain files relating to Altrinsic's proxy voting policy, procedures and voting decisions in an easily accessible place. Records will be maintained and preserved for five years from the end of the fiscal year during which the last entry was made on a record, with records for the first two years kept in the offices of Altrinsic. The following records will be included in the files:

- Copies of this proxy voting policy and procedures, and any amendments thereto;
- A record of each vote that Altrinsic casts¹;
- A copy of Altrinsic's review and resolution of any proxy voting conflicts; and
- A copy of each written client request for information on how Altrinsic voted such client's proxies, and a copy of any written response to any client request for information on how Altrinsic voted its proxies.

Operations will retain copies of each proxy statement that Altrinsic receives, provided however, that Altrinsic may rely on obtaining a copy of proxy statements from the SEC's EDGAR system for those proxy statements that are so available² and any document that Altrinsic created that was material to making a decision how to vote proxies, or that memorializes the decision.

¹ Altrinsic may rely on a third party to retain a copy of the votes cast, provided the third party undertakes to provide a copy of the record promptly upon request.

² Altrinsic may choose instead to have a third party retain a copy of proxy statements, provided that the third party undertakes to provide a copy of the proxy statements promptly upon request.

Effective: June 1, 2024

CSM ADVISORS, LLC
PROXY VOTING POLICIES AND PROCEDURES

CSM Advisors will accept the authority to vote proxies on behalf of the client.

Objective

The objective of our proxy voting process is to maximize the long-term investment performance of our clients.

Policy

Vote all proxy proposals in accordance with management recommendations except in instances where the effect of particular resolutions could adversely affect shareholder value. In such cases, it is CSM Advisors' policy to vote against these proposals. Examples of proposals that could negatively impact shareholder interest include, but are not limited, to the following:

- Anti-takeover amendments such as fair price provisions and staggered board provisions;
- Poison pill provisions designed to discourage another entity from seeking control;
- Greenmail attempts;
- Golden parachutes and related management entrenchment measures; and
- Oversized stock option grants and strike price revisions.

Procedures

Our procedure for processing proxy statements is as follows:

- Upon receipt, all proxy material will be forwarded to the Senior Vice President of Equities for his/her review. Specifically, proxies will be reviewed for material conflicts of interest and in such cases will be addressed by the Compliance Department to ensure that resolutions are voted in the best interest of shareholders.
- The Administrative Assistant will vote the resolutions according to the instructions of the Senior Vice President of Equities. The vote will be reviewed and signed by the Chief Investment Officer or Senior Vice President of Equities.
- If any proposals are considered to have a potentially negative impact on investment performance, the Chief Investment Officer or Senior Vice President of Equities will review the particular resolutions thoroughly with the equity portfolio manager responsible for the investment.
- After this review, if the Chief Investment Officer or Senior Vice President of Equities determines that specific proposals could have a negative impact on investment performance, they will vote against those proposals.
- The Chief Investment Officer or Delegate will review any exceptional provisions which are of significant investment interest with the Chief Executive Officer before voting on those issues.
- Copies of all proxy material, along with our voting record, will be maintained by the Investment Administrative Assistant and can be obtained by emailing [info@csCSM Advisors.com](mailto:info@csCSMAdvisors.com).
- The Chief Investment Officer or Delegate will review our proxy voting record with the Chief Executive Officer annually, or more often if necessary.

Authorization to Vote Proxies

- The default will be for CSM Advisors to vote all proxies for securities that it currently owns that are received via mail or electronic proxy service. It is the client's responsibility to make sure that proxies are forwarded to our attention. No reconciliation is made to the proxies received and the shares owned by any particular client. Voting is completed on a best effort basis.
- Clients must notify CSM Advisors in writing if they do not want CSM Advisors to vote proxies. These notifications will be kept on file. If CSM Advisors is not authorized to vote proxies, the client will receive their proxy statements directly from their custodian.
- Clients may direct CSM Advisors to vote any particular solicitation by contacting their relationship manager.
- In the event of a conflict of interest, CSM Advisors shall notify the client to determine the best course of action.

Securities out on loan

It is CSM Advisors' practice to generally not recall securities unless there is a specific issue that we feel warrants forfeiting the securities lending income. It is generally believed that in most cases the certainty of the securities lending income outweighs the potential, but unknown benefit, of the proxy vote.

In the event management has knowledge that a material event will occur affecting securities on loan, CSM Advisors will follow one of the following procedures.

1. Request that the security lending agent recall the security on loan to enable CSM Advisors to vote the Proxy.
2. Request that the borrower vote the Proxy per our instructions. CSM Advisors would keep proof of their execution on file.
3. If the security was eligible, but not currently out on loan, CSM Advisors would instruct the security lending agent to place a hold on the position until we have the opportunity to vote shares.

**Red Cedar Investment Management, LLC (“RCIM”)
Proxy Voting Policy**

Overview

A. Proxy Voting Policy and Procedures

1. *Policy:* RCIM, as a matter of policy and as a fiduciary to our clients, has responsibility for voting proxies for portfolio securities consistent with the best interests of our clients. Our firm maintains written policies and procedures as to the handling, research, voting and reporting of proxy voting and makes appropriate disclosures about our firm’s proxy policies and practices. Our policy and practice include the responsibility to monitor corporate actions, receive and vote client proxies and disclose any potential conflicts of interest as well as making information available to clients about the voting of proxies for their portfolio securities and maintaining relevant and required records.
2. *Responsibility:* The Investment Committee has the responsibility for the implementation and monitoring of our proxy voting policy, practices, disclosures and record keeping. The Investment Committee may delegate certain policy responsibilities to other employees, acting individually or collectively, for whom the Investment Committee shall retain supervision and oversight.
3. *Procedures:* RCIM has adopted procedures to implement the firm’s policy and conducts reviews to monitor and ensure the firm’s policy is observed, implemented properly and amended or updated, as appropriate, which include the following:

B. Delegation of Proxy Voting Authority and Voting Obligation

1. Terms and conditions defining and/or limiting the scope of RCIM’s proxy voting authority and voting obligations, as agreed upon with the client, are documented as part of the investment management agreement and/or Investment Policy Statement of such client(s).
2. RCIM will use its best efforts to vote proxies on behalf of clients and will vote proxies where it is afforded the ability to do so. There may be instances, for example, where, at the time the vote is due, client securities have been loaned or other issues exist that prevent RCIM from the ability to vote client proxies.
3. Additionally, RCIM will vote proxies when doing so is in the best interest of its clients. In some situations, acting in the client’s best interest may include abstention from voting. For example, where the cost of voting securities outweighs the benefits (e.g., voting on international securities where personal appearance is required, not having sufficient information to vote the proxy, a client account has been terminated, etc.), RCIM may act accordingly.
4. All employees will forward any proxy materials received on behalf of clients to the Proxy Manager (which shall be the applicable Portfolio Manager).

C. Use of Independent Third Party

In order to carry out its fiduciary duties and to minimize material conflicts of interest, RCIM will employ an independent third party to assist in voting proxies. The independent third party shall:

1. Research all proxies for which RCIM has the responsibility and authority to vote;
2. Automatically vote the proxies consistent with the guidelines approved and adopted by RCIM;
3. Contact RCIM for a decision on how to vote a proxy in the event it is unable to research a proxy vote, or it does not have an approved guideline to follow. If there is an opportunity for RCIM to appropriately research the proxy, the Firm will cast a vote based on the results of its research or choose to abstain from voting the proxy; and
4. RCIM will generally vote proxies in accordance with pre-determined policy/guidelines. RCIM may not vote a proxy if it has sold the affected security between the record date and the meeting date.

D. Annual Proxy Guidelines Approval

Subject to the policies set forth above, the following shall occur at least once annually:

1. The independent third party shall submit its proposed proxy voting guidelines to RCIM. The proposed guidelines detail how it intends to vote proxies.
 - The Proxy Manager, or its designee, shall review the proposed guidelines and determine whether to adopt some or all of the guidelines or modify them in any manner. The Proxy Manager, or its designee, may rely on counsel or anyone else deemed appropriate and/or may rely on any written documents deemed material. RCIM shall maintain documentation of the review and submit modifications, if any to the independent third party.
3. Adapted guidelines can be changed at any time.

E. Proxy Voting Procedures

1. Voting Proxies

- a. The independent third party shall vote the proxies in a timely manner in accordance with RCIM's adopted guidelines (as set forth in the paragraph above) or instructions.
- b. Any document prepared by RCIM that were material to making a decision how to vote a proxy or that memorialized the basis for the decision (e.g. minutes) will be retained.

Conflicts of Interest

RCIM does not address material conflicts of interest that could arise between RCIM and its clients related to proxy voting matters. Since RCIM relies on a third party to cast proxy votes independently, as described above, RCIM has determined that any potential conflict of interest between RCIM and its clients is adequately mitigated.

However, when RCIM is involved in making the determination as to how a particular proxy will be voted, RCIM shall disclose the conflict to the Chief Compliance Officer ("CCO"). The CCO, or their designee, will determine whether the proxy may be voted by RCIM, whether to seek legal advice, or whether to refer the proxy to the client(s) (or another fiduciary of the client(s)) for voting purposes. The CCO or their designee shall document the review and any actions required.

Proxy Overrides

For those proxies where RCIM intends to override the third party's recommendation because the determination has been made that the client would be best served with a vote contrary to the third party's recommendation, the Proxy Manager shall inform the Investment Committee, or its designee, of how it voted. A review of any such overrides shall be documented in the Investment Committee agenda.

Proxy Referrals

In the event the independent third party has not issued any recommendations and/or referred specific proxies to RCIM, the Proxy Manager, or its designee, may instruct the independent third party on how to vote the proxy. These actions shall be documented by the Proxy Manager.

Monitoring of the Independent Third Party

RCIM will perform due diligence at the onset of the relationship and periodically thereafter to assess the independent third party's ability to adequately analyze proxy issues and manage its conflicts of interest. In order to make this assessment, RCIM shall consider, among other things:

Oversight structure and personnel performing services on behalf of RCIM;

Policies, procedures and related controls, including those that ensure vote recommendations are in accordance with voting guidelines and are based on current and accurate information;

Policies and procedures related to the identification, management and disclosure of conflicts of interest impacting services provided; and

Changes in the independent third party's business and specific conflicts of interest in order to reasonably determine whether its conflicts of interest may materially and adversely affect RCIM's clients and, if so, whether any actions should be taken as a result.

Client Requests for Information

All client requests for information regarding proxy votes, or policies and procedures, received by any employee should be forwarded to the CCO, or their designee.

In response to any request, the CCO will prepare a written response to the client with the information requested, and as applicable will include the name of the issuer, the proposal voted upon, and how RCIM voted the client's proxy with respect to each proposal about which the client inquired.

Upon request, RCIM shall provide, at no cost to the client:

A description of its proxy voting policies and procedures (this may be included in RCIM's ADV Part 2A);

- A copy of these policies and procedures upon written request; and/or
- The manner in which the client may obtain information on how RCIM voted the proxy or proxies.

Records of client requests on how the proxies were voted and a copy of the written responses will be retained.

Disclosures

- RCIM provides required disclosures in response to Item 17 of Form ADV Part 2A summarizing this proxy voting policy and procedures, including a statement that clients may request information regarding how RCIM voted a client's proxies;
- RCIM's disclosure brochure (Form ADV Part 2A) includes a description of how clients may obtain a copy of the firm's proxy voting policies and procedures; and
- RCIM's proxy voting practice is disclosed in the firm's advisory agreement(s).

Approved: August 2014

Revised: May 2018, June 2019, February 2020

ADVISORY RESEARCH, INC.

PROXY VOTING POLICIES AND PROCEDURES

Advisory Research seeks to vote or otherwise process, such as by a decision to abstain from voting or to take no action on, proxies over which it has voting authority in the best interests of Advisory Research's clients.

Institutional Shareholder Services Engagement. Advisory Research has engaged Institutional Shareholder Services ("ISS") to provide proxy voting services for Clients over which Advisory Research exercises proxy voting authority. Advisory Research has adopted ISS' standard proxy voting guidelines, which are applied by ISS to all Advisory Research proxy votes. Advisory Research generally votes in accordance with its proxy voting guidelines; however, Advisory Research may opt to override the guidelines if it is decided to be the best interest of its Clients. Advisory Research believes that the use of standard proxy voting guidelines and the use of an independent third party, such as ISS, mitigate potential conflicts of interest between Advisory Research and its Clients.

Receipt of Proxy Materials. Proxy materials from issuers, custodians or broker-dealers with respect to any securities held in Client accounts are sent generally electronically to Advisory Research in care of ISS. On rare occasions, Advisory Research receives proxy materials from issuers, custodians or broker-dealers through the mail in hard copy form, which are then forwarded to ISS for processing.

Proxy Administration & ISS Oversight. ISS monitors Advisory Research's Client accounts and their ballot activity on an ongoing basis. To assist with this process (and wherever possible), ISS compares holdings quantities provided electronically by Advisory Research with those indicated on each ballot. Discrepancies are generally brought to the attention of the Client's custodian and/or proxy agent (such as Broadridge) as appropriate, but may also be referred to Advisory Research by ISS for additional assistance.

Primarily through its use of the ISS service, ARI uses its best efforts to obtain ballots from its Clients custodians and to vote every proxy which it or ISS receives when Advisory Research has been granted the authority to do so. However, there are situations in which Advisory Research or ISS may not be able to process a ballot. For example, if Advisory Research or ISS received a proxy statement in an untimely manner, there may not be sufficient time to process the vote. We believe that the use of a third party service, such as ISS, and our Client relationships with multiple custodians reduce the likelihood of this occurring.

Voting Decisions. Votes are generally processed by ISS pursuant to Advisory Research's accepted proxy voting guidelines. Any recommendations by the investment team members to vote against the guidelines should be brought to the attention of the Compliance Department who ensures the head portfolio manager is aware. Any resulting override shall be documented and then submitted to ISS by Compliance personnel.

In certain situations, Advisory Research may have a relationship with an issuer that could pose a potential conflict of interest when voting the shares of that issuer on behalf of Clients (such as if the issuer is also a Client of Advisory Research). Advisory Research believes that the use of an independent third party, such as ISS, and the use of standard, pre-determined proxy voting guidelines should adequately address possible conflicts of interest in most cases. In unusual cases, such as if an agenda item is not addressed by the standard guidelines or if an Advisory Research employee has recommended a vote against the guidelines, Advisory Research may use other alternative procedures such as engaging a different independent third party to present a recommendation or forwarding the proxies to Clients so that they may vote the proxies themselves.

Record of Votes Cast. Advisory Research has access to voting records for each issue and each Client via ISS.

Client Directed Votes. Although Advisory Research has adopted standard proxy voting guidelines, the client may request that Advisory Research vote proxies for their account in a particular manner. Such requests should be provided to Advisory Research in writing and will be addressed on a case by case basis with the client.

Client Requests for Voting Record. Clients may request proxy voting information. Advisory Research will respond to such requests showing how Client shares were voted on particular issues. The Compliance Department will maintain a copy of all such requests and responses.

Form N-PX. Advisory Research will provide a completed annual voting record, as required by the Proxy Rule, for each advised or sub-advised fund as requested. Advisory Research will also provide its current proxy voting policies and procedures and any subsequent amendments to the advised and sub-advised funds.

Recordkeeping

Advisory Research or a service provider maintains, in accordance with Rule 204-2 of the Advisers Act:

1. Copies of all proxy voting policies and procedures;
2. Copies of proxy statements received (unless maintained elsewhere as described below);
3. Records of proxy votes cast on behalf of Clients;
4. Documents prepared by Advisory Research that are material to a decision on how to vote or memorializing the basis for a decision;
5. Written Client requests for proxy voting information and
6. Written responses by Advisory Research to written or oral Client requests.

Advisory Research will obtain an undertaking from any service provider that the service provider will provide copies of proxy voting records and other documents promptly upon request if Advisory Research relies on the service provider to maintain related records. Advisory Research or its service provider may rely on the SEC's EDGAR system to keep records of certain proxy statements if the proxy statements are maintained by issuers on that system (as is generally true in the case of larger U.S.-based issuers).
